

Extract of Company Operation and Financial Information of
Country Garden Holdings Company Limited

Risk factors

Risks relating to our business

We are heavily dependent on the performance of the property market in the PRC, particularly in Guangdong Province

Our business and prospects depend on the performance of the PRC property market. Any housing market downturn in China generally or in the regions where we have property developments could adversely affect our business, financial condition and results of operations. Our property developments currently are largely located in Guangdong Province. We established our business by developing private residential properties in Shunde District in 1997 and began expanding our project development activities to other locations in Guangdong Province in 1998. As of June 30, 2009, we had developed or were developing 30 projects in Guangdong Province and 28 projects outside Guangdong Province. The projects in Guangdong Province and outside Guangdong Province have an aggregate GFA (including completed properties, properties under development and properties for future development) of approximately 29,856,561 sq.m. and 26,917,593 sq.m., respectively. Although we are pursuing further business opportunities in other locations in the PRC, we intend to maintain and increase our market share in Guangdong Province.

Demand for private residential properties in the PRC, including Guangdong Province, has experienced rapid growth in the last decade but such growth is often coupled with volatility in market conditions and fluctuations in property prices. We cannot assure you that property development and investment activities will continue at past levels or that we will be able to benefit from the future growth in the property market in Guangdong Province or the PRC. Any adverse developments in national and local economic conditions as measured by such factors as GDP growth, employment levels, job growth, consumer confidence, interest rates and population growth in the PRC, particularly in the regions where our projects are located, may reduce demand and depress prices for our products and services and would have a material adverse effect on our business, financial condition and results of operations. Demand for and prices of properties in the PRC are also directly affected by the macroeconomic control measures adopted by the PRC government from time to time. See “—Risks relating to the property sector in the PRC—The property industry in the PRC is subject to government regulations and policies, which could have the effect of slowing down the industry’s growth”. Any further adverse development in the market condition of the property market in the PRC could have a material adverse effect on our business, financial condition and results of operations.

Current global economic slowdown and financial crisis have negatively impacted, and may continue to negatively impact, our business

The current global economic slowdown and turmoil in the global financial markets beginning in the second half of 2008 have had a negative impact on the PRC economy, which in turn has affected the PRC property market. For example:

- the slowdown in economic growth and tightened credit have resulted in a lower demand for residential and commercial properties and declining property prices;
- the slowdown in economic growth has adversely impacted home owners and potential property purchasers, which may lead to a further decline in the general demand for property products and a further erosion of their selling prices; and

- the tightening of credit has negatively impacted the ability of property developers and potential property purchasers to obtain financings.

As a result, our revenue and GFA sold decreased by 11.4% and 17.8%, respectively in 2008 as compared to 2007. Although certain parts of the PRC property market showed signs of recovery in the second quarter of 2009 in large part due to stimulus measures adopted by the PRC government, we cannot assure you that the property market will continue to recover or that the PRC government will maintain its stimulus measures. Nor can we predict as to how long the current economic slowdown may last and to what extent it may impact us. If the current global economic slowdown and financial crisis continue for a prolonged period, it would materially and adversely impact the demand for our products and our ability to obtain necessary financing for our operations, thereby causing a material adverse effect on our business, financial condition, results of operations and prospects.

Increasing competition in the PRC, particularly in Guangdong Province, may adversely affect our business and financial condition

In recent years, a large number of property developers have undertaken property development and investment projects in Guangdong Province and elsewhere in the PRC. Our major competitors include large national and regional property developers and overseas developers (including a number of leading Hong Kong property developers), some of which may have better track records and greater financial and other resources than us. In addition, we also compete with small local homebuilders.

The intensity of the competition among property developers in Guangdong Province and other parts in the PRC for land, financing, raw materials and skilled management and labor resources may result in increased cost for land acquisition and construction, a decrease in property prices and delays in the government approval process. An oversupply of properties available for sale could also depress the prices of the commodity properties we sell. Any of the above may adversely affect our business, financial condition and results of operations.

In addition, the property markets in Guangdong Province and elsewhere in the PRC are rapidly changing. If we cannot respond to changes in market conditions in Guangdong Province or elsewhere or changes in customer preferences more swiftly or more effectively than our competitors, our business, results of operations and financial condition could be adversely affected.

We may not have adequate funding resources to finance land acquisitions or property developments, or to service our financing obligations

The property development business is capital intensive. We finance our property developments primarily through a combination of internal funding, borrowings from banks, capital markets financing (such as our initial public offering in April 2007 (the "IPO") and the offering of RMB4,314.0 million aggregate principal amount of U.S. dollar settled 2.5% convertible bonds due 2013 (the "Convertible Bonds"), of which RMB3,595.0 million were issued on February 22, 2008, with the remaining issued on March 3, 2008) and pre-sales and sales proceeds. Further, purchasers who choose to pay the purchase price in full without taking out a mortgage may not pay the full purchase price on time and this may affect our cashflow position. We cannot assure you that we will have sufficient cash flow available for land acquisitions or property

developments or that we will be able to achieve sufficient pre-sales and sales to fund land acquisitions or property developments. In addition, we cannot assure you that we will be able to secure external financing on terms acceptable to us or at all.

As of June 30, 2009, we had RMB14,974.8 million of outstanding borrowings (including the Convertible Bonds), of which RMB4,781.1 million were short-term borrowings. Our interest expense on bank borrowings and the Convertible Bonds for the years ended December 31, 2006, 2007 and 2008 and the six months ended June 30, 2009 was RMB264.8 million, RMB283.6 million, RMB832.3 million and RMB478.4 million respectively.

Our ability to arrange adequate financing for land acquisitions or property developments on terms that will allow us to earn reasonable returns depends on a number of factors that are beyond our control. The PRC government has in the past taken a variety of policy initiatives in the financial sector to tighten lending procedures for property developers.

The PBOC issued the Circular on Further Strengthening the Management of Loans for Property Business (中國人民銀行關於進一步加強房地產信貸業管理的通知) on June 5, 2003 to specify the requirements for banks providing loans for the purposes of property development. These requirements include:

- that property loans by commercial banks to real estate development enterprises may be granted only as property development loans and it is strictly forbidden to extend such loans as current capital loans for property development projects or other purposes. No lending of any type shall be granted to enterprises which have not obtained the relevant land use rights certificates, construction land permits, construction planning permit and construction work permits; and
- that commercial banks may not grant loans to property developers to finance land premium payments.

In addition, PBOC has raised the benchmark one-year lending rate several times between 2004 and 2008. The PBOC increased the reserve requirement ratio for commercial banks several times between 2006 and 2008 to curtail the overheating of the property sector. The reserve requirement refers to the amount of funds that banks must hold in reserve with the PBOC against deposits made by their customers. The increases in the bank reserve requirement ratio may negatively impact the amount of funds available to lend to businesses, including us, by commercial banks in China. Since the commencement of the global economic slowdown in the second half of 2008, the PRC government has adopted measures intended to stimulate economic development, including lowering benchmark lending rates and the reserve requirement ratio for commercial banks. However, we cannot assure you that PBOC will not raise lending rates or reserve requirement ratios in the future, or that our business, financial condition and results of operations will not be adversely affected as a result of these adjustments.

The fiscal and other measures adopted by the PRC government from time to time may limit our flexibility and ability to use bank loans to finance our property developments and therefore may require us to maintain a relatively high level of internally-sourced cash. As a result, we may not have adequate resources to fund land acquisitions or property developments, or to service our financing obligations, and our business and financial condition may be materially adversely affected. In addition, the increase of benchmark lending rates has led to higher interest rates for mortgage loans, which may depress the demand in the property market in general.

We may not be able to obtain a sufficient number of sites or retain sites suitable for property developments

We derive the majority of our revenue from the sale of properties that we have developed. This revenue stream is dependent on our ability to complete and sell our property developments. To maintain or grow our business in the future, we will be required to replenish our land reserve with suitable sites for developments. Our ability to identify and acquire a sufficient number of suitable sites is subject to a number of factors that are beyond our control.

The PRC government controls substantially all of the country's land supply and regulates the means by which property developers, including us, obtain land sites for property developments. As a result, the PRC government's land supply policies affect our ability to acquire land use rights for sites we identify and the costs of any acquisition. In May 2002, the PRC government introduced regulations requiring government departments and agencies to grant state-owned land use rights for residential or commercial property developments through public tender, auction or listing-for-sale. We will be required to go through these processes before we can acquire the land use rights to the desirable sites, which may result in higher land premiums than those we paid in the past. While we believe that our current level of land reserve should be able to support our property development projects for five years or more, the viability or growth of our business may not be sustainable if we are unable to obtain additional land sites for development at prices that allow us to achieve reasonable returns.

In addition, the PRC government in the past two years has adopted a number of initiatives to control the growth of China's residential property sector and to promote the development of more affordable housing. For example:

- one of these initiatives requires the local governments, when approving new residential projects after June 1, 2006, to ensure that at least 70% of their annual land supply (in terms of estimated GFA) consists of units that are less than 90 sq.m. in size; and
- in an announcement made on May 30, 2006, the Ministry of Land and Resources has stated that land supply priority shall be given to ordinary commodity houses at middle to low prices and in medium to small sizes (including affordable housing).

These policy initiatives and other measures adopted by the PRC government from time to time may limit our ability to acquire suitable land for our development, which may have a material adverse effect on our business, financial condition and results of operations.

Our land may be forfeited by the PRC government if we fail to comply with the terms of the land grant contracts

Under PRC laws and regulations, if a property developer fails to develop land according to the terms of the land grant contract (including those relating to payment of fees, designated use of land, time for commencement and completion of the developments of the land), the relevant government authorities may issue a warning to, or impose a penalty on, the developer or require the developer to forfeit the land. Specifically, under current PRC laws and regulations, if we fail to commence development for more than one year from the commencement date stipulated in the land grant contract, the relevant PRC land bureau may serve a warning notice on us and impose an idle land fee on the land of up to 20.0% of the land premium. If we fail to commence development for more than two years from the commencement date stipulated in the land grant

contract, the land is subject to forfeiture to the PRC government unless the delay in development is caused by government actions, force majeure or necessary preparatory work. Recently, in the “Notice on Enhancing the Economical and Intensive Use of Land” (國務院關於促進節約集約用地的通知) promulgated by the State Council on January 3, 2008, this policy was reinforced. This notice states, among other things, that (i) policies in relation to the forfeiture of land use rights without compensation for land which has remained idle for more than two years shall be strictly implemented; (ii) if any land remains idle for one year, an idle land fee of 20% of the relevant land premium shall be levied; (iii) before June 2008, all provincial, regional and municipal governments are required to submit to the State Council reports on the status of the clearance and handling of idle land; (iv) the prohibition of land supply for villa projects shall continue; (v) the Ministry of Land and Resources and other authorities are required to research and commence the drafting of implementation rules concerning the levy of land appreciation fees on idle land; (vi) in relation to the supply of residential land, planning conditions such as plot ratio limits and the number and type of flats that can be constructed shall be taken into account in land grant contracts and allocation decisions to ensure that at least 70% of the total land grant for residential development will consist of low rental housing, economy housing, limited pricing housing and units of less than 90 sq.m. in size; and (vii) financial institutions are required to exercise caution when approving financing for any property developer who, after one year from the commencement date stipulated in the land grant contract, fails to complete at least one-third of the development of their project or provide at least 25% of the total investment in the project.

Moreover, according to the “Notice on Implementation of the State Council’s Certain Opinions on Resolving Residence Difficulties of Urban Low-income Families and Further Strengthening Macro-control of Land Supply” (關於認真貫徹《國務院關於解決城市低收入家庭住房困難的若干意見》進一步加強土地供應 調控的通知) issued by the Ministry of Land and Resources on September 30, 2007, even if the commencement of the land development is in compliance with the land grant contract, if (i) the developed GFA on the land is less than one-third of the total GFA of the project under the land grant contract or the total capital invested is less than one-fourth of the total estimated investment of the project under the land grant contract and (ii) there has been a suspension of the development of the land for over one year in time without government approval, the land will be treated as idle land and the property developer may be restricted or prevented from participating in future land bidding. This notice also calls for control over supply of large land parcels and states that the development period of an individual parcel of land in principal should not exceed three years. Detailed rules for these notices have yet to be promulgated. We cannot assure you that circumstances leading to forfeiture of land or delays in the completion of a property development may not arise in the future. If we are required to forfeit land, to pay idle land fee, or even to pay appreciation land premium, we will not be able to continue our property development on the forfeited land or recover the costs incurred for the initial acquisition of the forfeited land or recover development costs and other costs incurred up to the date of forfeiture, and our business, financial condition and results of operations may be adversely affected.

We may not be able to successfully manage our growth

We have been rapidly expanding our operations in recent years. As we continue to grow, we must continue to improve our managerial, technical and operational knowledge and allocation of resources, and to implement an effective management information system. We are also in the process of upgrading our accounting system. To effectively manage our expanded operations,

especially projects outside Guangdong Province, we need to recruit, as well as strengthen internal training for, managerial, accounting, internal audit, engineering, technical, sales and other staff to satisfy our development needs. As of December 31, 2006, 2007, 2008 and June 30, 2009 we had 17,968, 27,839, 29,068 and 25,234 full-time employees, respectively. In order to fund our ongoing operations and our future growth, we need to have sufficient internal sources of liquidity or access to additional financing from external sources. Further, we will be required to manage relationships with a greater number of customers, suppliers, contractors, service providers, lenders and other third parties. We will need to further strengthen our internal control and compliance functions to ensure that we are able to comply with our legal and contractual obligations and reduce our operational and compliance risks. We cannot assure you that we will not experience issues such as capital constraints, construction delays, operational difficulties at new operational locations or difficulties in expanding existing business and operations and training an increasing number of personnel to manage and operate the expanded business. We also cannot assure you that our expansion plans will not adversely affect our existing operations and thereby have a material adverse effect on our business, financial condition, results of operations and future prospects.

We may not be successful in expanding into each new city that we target or in developing each new business segment that we explore

We are expanding our development projects into new geographical locations outside Guangdong Province, including Hunan Province, Inner Mongolia, Jiangsu Province, Liaoning Province, Hubei Province, Anhui Province, Heilongjiang Province, Tianjin Municipality and Chongqing Municipality. When suitable opportunities arise, we expect to continue to expand our operations to other cities in China that have high growth potential. We cannot assure you that we will be able to operate in these new areas successfully.

Further, our plans include projects that differ significantly from our past and current projects in terms of targeted customers and business segments. Our primary experience to date has been in developing high quality residential properties for sale, construction and decoration of those properties, management of residential developments, and hotel operation. We have plans to expand into the business of developing office buildings in other areas in the PRC for our own use or for leasing to other companies. This is a relatively new business for us, and we cannot assure you that we will be successful in expanding into this area. We may not realize any revenue from this business, and even if revenue is realized, we cannot assure you that the market demand for office space will be sufficient to provide us with an adequate return on our investment.

Our expansion and the need to integrate operations arising from our expansion particularly into other fast growing cities in the PRC, may place a significant strain on our managerial, operational and financial resources and further contribute to an increase in our financing requirements.

The PRC government has implemented restrictions on the payment terms for land use rights

On September 28, 2007, the Ministry of Land and Resources issued a new regulation, which provides that property developers must fully pay the land premium for the entire parcel under the land grant contract before they can receive a land use rights certificate and commence development on the land. This regulation became effective on November 1, 2007. As a result, property developers are not allowed to bid for a large piece of land, make partial payment, and then apply for a land use rights certificate for the corresponding portion of land in order to

commence development, which was the practice in many Chinese cities. The implementation of the regulation require property developers to maintain a higher level of working capital. We cannot assure you that our cash flow position, financial condition or business plans will not be materially and adversely affected as a result of the implementation of this regulation.

We may not be able to obtain land use rights certificates with respect to certain parcels of land in which we currently have interests

We have entered into land grant contracts to acquired certain parcels of land for which we have not yet obtained land use rights certificates. As of August 31, 2009, these parcels of land occupied an aggregate site area of approximately 9,155,058 sq.m. with an aggregate expected GFA of approximately 11,893,146 sq.m. for future development. If we fail to obtain the land use rights certificates with respect to these parcels of land in a timely manner, or at all, we may not be able to acquire new land in replacement on terms acceptable to us, or at all. This would have a material adverse effect on our business, financial condition, results of operations and business prospects going forward. See “Business—Description of our property projects”.

Our business and results of operations may be adversely affected if we fail to obtain, or there are material delays in obtaining, the requisite governmental approvals

The property industry in the PRC is heavily regulated by the PRC government. To establish a property development subsidiary in China, we must go through various PRC governmental approval and filing processes and obtain the requisite approvals and licenses for our investment in such subsidiary and its property development and related business operations. Our property development subsidiaries must comply with a variety of legal and regulatory requirements, as well as the policies and procedures established by local authorities to implement such laws and regulations. To undertake and complete a property development, a property developer must obtain permits, licenses, certificates and other approvals from the relevant administrative authorities at various stages of the property development, including land use rights documents, planning permits, construction permits, pre-sale permits and certificates or confirmations of completion and acceptance. Each approval is dependent on the satisfaction of a set of conditions.

Currently, one of our projects under development has not received its project approval as required under PRC regulations. We cannot assure you that the relevant government authorities will not impose penalties on us, such as ordering suspension of construction or operations or imposing a fine. In addition, from time to time we establish new subsidiaries or increase the registered capital of our existing subsidiaries according to our business development plan. Our capital contributions to the registered capital of nine of our subsidiaries are currently overdue primarily due to tightened credit and foreign exchange control as a result of the global economic slowdown commencing in the second half of 2008. One of these companies is a property developer, which is required to file with the MOFCOM for any increase in registered capital. This filing has not been completed. We are in the process of applying for the decrease of registered capital or the dissolution of the relevant companies.

We currently provide shuttle services to the residents of our properties through our subsidiary, Guangzhou Country Garden Shuttle Bus Services Co., Ltd. (“Country Garden Shuttle Bus”). Country Garden Shuttle Bus is required to obtain approval from the Department of Foreign Trade and Economic Cooperation of Guangdong Province. Country Garden Shuttle Bus, however, has not received such approval. If we fail to obtain such approval, we may be subject to a fine which

may be substantial, required to dissolve this subsidiary and will need to find a third-party transportation services provider, which may cause temporary disruption to our shuttle bus services or increase our operating costs.

We cannot assure you that we will not encounter significant problems in satisfying the conditions to the approvals necessary for our business operations, or that we will be able to adapt ourselves to new laws, regulations or policies that may come into effect from time to time and to which we are subject or the particular processes related to the granting of the approvals. There may also be delays on the part of the administrative bodies in reviewing our applications and granting approvals. If we fail to obtain, or experience material delays in obtaining, the requisite governmental approvals, licenses and filings, our investment in our PRC subsidiaries and the schedule of development and sale of our developments could be substantially disrupted, resulting in a material adverse effect on our business, financial condition and results of operations.

Our profit margin is sensitive to fluctuations in the cost of construction materials

Construction costs comprise one of the predominant components of our cost of sales. Construction costs encompass all costs for the design and construction of a project, including payments to third-party contractors, costs of construction materials, foundation and substructure, fittings, facilities for utilities and related infrastructure such as roads and pipelines. Historically, construction material costs have been the principal driver of the construction costs of our property development projects, with the cost of third-party contractors remaining relatively stable. However, as the construction material costs are often included in the construction costs paid to our contractors, it has been difficult for us to estimate such costs.

Construction costs may fluctuate as a result of the volatile price movement of construction materials such as steel and cement. We seek to reduce our exposure to short-term price fluctuations of construction materials and limit project cost overruns by centralizing our procurement to lower our purchase costs. We also manage the cost of outsourced construction work through a process of tenders which, among other things, takes into account procurement of supplies of principal construction materials such as steel and cement of our property development projects at fixed prices. In line with industry practice, if there is a significant price fluctuation (depending on the specific terms of each contract), we will be required to re-negotiate, top up or refund, depending on the price movement, existing construction contracts. Additionally, should our existing contractors fail to perform under their contracts, we might be required to pay more to contractors under replacement contracts. Our profit margin is sensitive to changes in the market prices for construction materials and our project margins will be adversely affected if we are not able to pass all of the increased costs onto our customers.

We are subject to legal and business risks if we fail to obtain or maintain qualification certificates

Property developers in the PRC must obtain a formal qualification certificate (資質證書) in order to carry out property development business in the PRC. According to the Provisions on Administration of Qualification of Real Estate Developers (房地產開發企業資質管理規定), newly established developers must first apply for a temporary qualification certificate (暫定資質證書), which can be renewed for a maximum of two additional one-year periods, by which time a formal qualification certificate must have been issued. Before commencing their business

operations, entities engaged in property management, construction, or fitting and decoration are required to obtain qualification certifications in accordance with the Measures on Administration of Qualification of Property Management Enterprises (物業管理企業資質管理辦法) and the Provisions on Administration of Qualification of Construction Enterprises (建築業企業資質管理規定). Property developers in the PRC are required to produce a valid qualification certificate when they apply for a pre-sale permit.

All qualification certificates are subject to renewal on an annual basis. In reviewing an application to renew a qualification certificate, the local authority takes into account the property developer's registered capital, property development investments, history of property development and quality of property construction, as well as the expertise of the developer's management and whether the developer has any illegal or inappropriate operations.

Each of our project companies, with the assistance of our group office, is responsible for the annual submission of its renewal application. If any one of our project companies is unable to meet the relevant qualification requirements, the local authorities will normally grant that project company, subject to a penalty of between RMB50,000 and RMB100,000, a grace period to rectify any insufficiency or non-compliance. Failure to satisfy the requirements within the specified time frame could result in rejection of the application for renewal of the qualification certificate and revocation of the business license of the project company. As of August 31, 2009, each of our project companies had obtained a valid qualification certificate except for five newly established project companies and 10 project companies, which are in the process of applying for extension or alteration of their respective certificates. None of the five new project companies have commenced property development.

We cannot assure you that the qualification certificates of all of our existing project companies will continue to be renewed or extended or that formal qualification certificates for new project companies will be obtained in a timely manner, or at all. If our project companies are unable to obtain or renew their qualification certificates, they will not be permitted to continue their businesses, which could have a material adverse effect on our business and financial condition.

We face significant property development risks before we realize any benefits from a development

Property developments typically require substantial capital outlays during the construction periods, and it may take months or years before positive cash flows, if any, can be generated by pre-sales of properties to be completed or sales of completed properties. The time and costs required to complete a property development may increase substantially due to many factors beyond our control, including the shortage or increased cost of material, equipment, technical skills and labor, adverse weather conditions, natural disasters, labor disputes, disputes with contractors, accidents, changes in government priorities and policies, changes in market conditions, delays in obtaining the requisite licenses, permits and approvals from the relevant authorities and other unforeseeable problems and circumstances. Any of these factors, singly or in the aggregate, may lead to a delay in, or the failure of, the completion of a property development and result in costs substantially exceeding those originally budgeted. Failure to complete a property development according to its original plan, if at all, may have an adverse effect on our reputation and could give rise to potential liabilities. As a result, our returns on investments, if any, might not be timely recognized or might be lower than originally expected.

We face risks relating to fluctuations of results of operations from period to period

Our results of operations tend to fluctuate from period to period. The number of properties that we can develop or complete during any particular period is limited due to the substantial capital required for land acquisition, demolition and resettlement and construction, as well as limited land supplies and lengthy development periods before positive cash flows may be generated. In addition, in recent years, we have begun to develop larger scale property developments and, as a result, we develop properties in multiple phases over the course of several years. Typically, as the overall development moves closer to completion, the sales prices of the properties in such larger scale property developments tend to increase because a more established residential community is offered to purchasers. In addition, seasonal variations have caused fluctuations in our revenues and profits from quarter to quarter. For example, the sales of properties in the first quarter of each year is typically higher due to the long vacation periods toward the end of the year. On the contrary, during the Chinese New Year holidays, winter weather conditions can hinder construction of development projects, especially in northern China. Our revenue and profits, recognized upon the delivery of properties, in the first half of a year are often much lower than in the second half, and we will continue to experience significant fluctuations in revenue and profits on an interim basis. As a result, our results of operations fluctuate and our interim results do not proportionally reflect our annual results.

We will be increasingly affected by independent contractors

We expect that as our business grows in terms of the number of projects and geographical coverage, we will increasingly engage independent contractors to provide various services, including design, construction and installation, engineering, construction supervision, fitting and decoration, most of which have been provided primarily by our own subsidiaries to date. Until recently, a majority of our construction work was undertaken by Guangdong Giant Leap Construction Co. Ltd (“Giant Leap Construction Co.”), our wholly-owned subsidiary. As we have expanded to regions outside Guangdong Province, we have outsourced increasingly more construction work which in turn has increased our reliance on independent contractors. With respect to the outsourced work, we intend to continue our current practice of selecting independent contractors through a process of tenders by inviting contractors to tender based on their reputation for quality, their track record and references, and their reputation for supervising the construction process once a contract is awarded. We cannot assure you of the availability of qualified independent contractors in the market at the time of our intended outsourcing, nor can we assure you that the services rendered by our independent contractors will always be satisfactory or meet our quality requirements. Moreover, the completion of our property developments may be delayed, and we may incur additional costs, due to a contractor’s financial or other difficulties. Any of these factors could have a material adverse effect on our business, financial condition and results of operations.

We face contractual and legal risks relating to the pre-sale of properties, including the risk that property developments may not be completed and the risk that changes in laws and regulations in relation to the pre-sales of properties may adversely affect our business, cash flow, financial condition and results of operations

We face contractual risks relating to the pre-sales of properties. For example, if we fail to meet the completion time as stated in the pre-sale contracts, purchasers of pre-sold units have the right to claim damages under the pre-sale contracts. If we still fail to deliver the properties to the

purchasers within the grace period stipulated in the contract, the purchasers have the right of termination. If the actual GFA of a completed property delivered to purchasers deviates by more than 3% from the GFA originally stated in the pre-sale contracts, purchasers have the right of termination or the right to claim damages.

Proceeds from the pre-sales of our properties are an important source of funds for our property developments and have an impact on our liquidity position. On August 5, 2005, the PBOC recommended in a report entitled "2004 Real Estate Financing Report" that the practice of pre-selling uncompleted properties be discontinued, on the ground that it creates significant market risks and generates transactional irregularities. At the "two meetings" (the plenary session of the National People's Congress and that of the Chinese People's Political Consultative Conference) held in March 2006, a total of 33 delegates to the National People Congress, including Bai Hexiang, head of the Nanning Central Sub-Branch of PBOC put forward a motion to abolish the system for sale of forward delivery housing. In May 2006, Cheng Jiansheng, head of the Real Estate Finance Division of the Financial Market Department of PBOC published an article pointing out that the way to perfect the system for commodity housing presale of China is to abolish the financing function of presale. On July 24, 2007, an economy research group under the National Development and Reform Commission ("NDRC") proposed to change the existing system for sale of forward delivery housing into one for sale of completed housing. While the recommendation has not been adopted by any PRC governmental authority and has no mandatory effect, we cannot assure you that the PRC governmental authority will not ban or impose material limitations on the practice of pre-selling of uncompleted properties in the future. Future implementation of any restrictions on our ability to pre-sell our properties, including any requirements to increase the amount of up-front expenditure we must incur prior to obtaining the pre-sale permit, would extend the time required for recovery of our capital outlay and would force us to seek alternative means to finance the various stages of our property developments. This, in turn, could have a material and adverse effect on our business, cash flow, financial condition and results of operations.

Our sales and pre-sales will be affected if mortgage financing becomes more costly or otherwise less attractive

A majority of purchasers of our residential properties rely on mortgages to fund their purchases. An increase in interest rates may significantly increase the cost of mortgage financing, thus reducing the attractiveness of mortgages as a source of financing for property purchases and adversely impacting the affordability of residential properties. Under PRC law, monthly mortgage payments are limited to 50% of an individual borrower's monthly income. In addition, to curtail the overheating of the property sector, between 2006 and 2008, the PRC government implemented, among other things, regulations that increased the down payment requirement for mortgage loans in respect of residential and commercial properties. Beginning in the second half of 2008, in order to combat the impact of the global economic slowdown, the PRC government lowered the minimum interest rate for individual mortgage loans to 70% of the corresponding PBOC benchmark bank lending rates. Further, the minimum down payment ratio of residential properties was lowered to 20%. However, we cannot assure you that the PRC government and commercial banks will not increase down payment requirements, impose other conditions or otherwise change the regulatory framework in a manner that would make mortgage financing unavailable or unattractive to potential property purchasers. Nor can we assure you that such regulatory changes from time to time will not adversely affect our business, financial condition and results of operations.

For more information about policies adopted by the PRC government with related to property financing, see “Regulation—Legal supervision relating to property sector in the PRC—Property Financing”.

Resettlement negotiations may add costs or cause delays to our development projects

Under PRC laws and regulations, where we are responsible for the demolition of existing properties on a site for development and removal of existing residents, we will be required to pay resettlement costs to those residents. Even if we are not responsible for the demolition and removal, if the party responsible for the demolition and removal and the party subject to the demolition and removal fail to reach an agreement for compensation and resettlement, either of them may apply for a ruling from the relevant governmental authorities. If a party is not satisfied with the ruling, it may initiate proceedings in a PRC court within three months from the date of service of such ruling, which may cause delays to the development of projects. Such proceedings and delays, if they occur, could adversely affect our reputation. In addition, any such delays to our development projects will lead to an increase in the cost and a delay in the expected cash inflow resulting from pre-sales of the relevant project and the recognition of sales as revenue upon completion, which may in turn adversely affect our business, financial position and results of operations.

We may not receive full compensation for assistance we provide to local governments to clear land for government land sales

In certain cases where we are interested in acquiring land, we assist local governments in clearing the land and relocating the original residents so that the land is ready for tender, auction and listing-for-sale. In such cases, we enter into land clearance agreements with the relevant land authorities, pursuant to which the relevant authorities are responsible for land planning, resident relocation and constructing municipal supporting facilities and we are responsible for providing funding for the land clearance and relocation and offering management services. After the land clearance is complete and the land is otherwise suitable for public land sale, the relevant land authority will organize a sale through a public tender, auction or listing-for-sale process. Under the land clearance agreements, we are reimbursed for expenses we incur for land clearance and relocation and we are entitled to a portion of the profit realized by the local government on the land sale. According to the land clearance agreements, we have exclusive rights to clear the land, but do not have the exclusive right to acquire the land. We do not control the timing of the sale of the land use rights in the land that we have cleared, nor do we set the price for which such land use rights are sold. Sales of the land use rights are conducted by the relevant local government land authorities, through a bidding, auction or listing-for-sale process and we are required to participate in such process if we want to acquire the land. We cannot assure you that we will win the bid in a timely manner or at all; nor can we assure you that the relevant land authority will achieve an optimal price for the sale of such land use rights. We cannot assure you that we will be reimbursed for the expenses that we incur in connection with such land clearance, nor can we assure you that we will receive any profit from such land use rights sales. In addition, we cannot assure you that the PRC government will not issue new laws or regulations which may revoke the reimbursement, profit allocation and other arrangements in the land clearance agreements that we have entered into with the local governments and as a result, we may not be able to receive compensation for expenses we incurred in connection with the land clearance and allocation work. Further, the PRC State Council on January 3, 2008 issued the

Notice to Enhance the Economical and Intensive Use of Land (關於促進節約集約用地的通知), which requires the use of a public bidding process in selecting companies to assist the local governments with land clearance work. This new requirement may limit our ability to participate in such land clearance work in the future.

We guarantee the mortgages provided to our purchasers and, consequently, we are liable to the mortgagee banks if our purchasers default on their mortgage payments

We arrange for various banks to provide mortgage services to the purchasers of our properties. In accordance with market practice, domestic banks require us to provide guarantees in respect of these mortgages. The majority of these guarantees are short-term guarantees which are released upon the earlier of the issuance of the individual property ownership certificate (房產所有權證) to the owner of the property or the certificate of other rights of property (房地產他項權利證) to the mortgage bank by the relevant housing administration department, which generally takes place within three months after we deliver the relevant property to the purchasers, or the full settlement of the mortgaged loans by the purchasers. Prior to 2003, we also provided long-term guarantees for the mortgage loans of some of our customers which are discharged two years from the day the mortgaged loans become due. In line with industry practice, we do not conduct independent credit checks on our customers but rely instead on the credit checks conducted by the mortgage banks. For further information on our outstanding guarantees for the mortgage loans of our customers, see note 31 to our consolidated financial statements for the year ended December 31, 2007, note 33 to our consolidated financial statements for the year ended December 31, 2008 and note 20 to our unaudited interim financial information for the six months ended June 30, 2009.

Although we have historically experienced a low rate of default on mortgage loans guaranteed by us, there is no assurance that the purchaser default rate will not increase in the future. If such an increase occurs and our guarantees are called upon, our business, financial condition and results of operations could be adversely affected.

Disputes with joint venture partners may adversely affect our business

We have, and expect to have in the future, interests in PRC joint venture entities in connection with our property development plans. In certain circumstances, our existing joint venture entities have relied on financial support from us, and we expect they will continue to do so. In addition, in accordance with PRC law, certain matters relating to a joint venture require the consent of all parties to the joint venture. PRC joint ventures may involve risks associated with the possibility that our joint venture partners may:

- have economic or business interests or goals that are inconsistent with ours;
- take actions contrary to our instructions or requests or contrary to our policies or objectives;
- be unable or unwilling to fulfill their obligations under the relevant joint venture agreements;
- have financial difficulties; or
- have disputes with us as to the scope of their responsibilities and obligations.

We cannot assure you that we will not encounter problems with respect to our joint venture partners which may have an adverse effect on our business operations, profitability and prospects.

Any unauthorized use of our brand may adversely affect our business, and our trademark licensees may conduct their business in a way that is detrimental to our brand image

Our brand receives high recognition in China. Any unauthorized use of our brand may have a negative impact on our brand image and adversely affect our business. In addition, we have granted a non-exclusive license to certain related parties to use our brand. We do not have control over the conduct of these licensees or other companies which may use our brand without our authorization. As a result, our business and reputation could be adversely affected due to any unauthorized use of our brand.

We do not have insurance to cover potential losses and claims in our operations

We do not maintain insurance for the destruction of, or other damage to, our properties under construction. We carry property management liability insurance in connection with our property management business and accident insurance (i.e. employer's liability insurance) for our construction workers; however, we do not maintain insurance against other personal injuries or property damage that may occur during the construction of our properties. We also do not take out insurance coverage for the non-performance of contracts during construction and other risks associated with construction and installation work during the construction period.

Moreover, there are certain contingent liabilities for which insurance is not available on commercially practicable terms, such as losses caused by earthquake, typhoon, flooding, war and civil disorder.

We may not have sufficient funds to offset any such losses, damages or liabilities or to replace any property development that has been destroyed in the course of our operations and property development. In addition, any payments we make to cover any losses, damages or liabilities could have a material adverse effect on our business, financial condition and results of operations.

We may be involved in legal and other disputes arising out of our operations from time to time and may face significant liabilities as a result

We may be involved in disputes with various parties involved in the development and the sale of our properties, including contractors, suppliers, construction workers, partners and purchasers. We may also be involved in disputes with various parties relating to our property management business including personal injury claims. These disputes may lead to legal or other proceedings and may result in substantial costs and diversion of resources and management's attention. We have in the past been involved in disputes with our customers with respect to quality of our properties and time of delivery. In addition, most of our projects consist of multiple phases, purchasers of our properties in earlier phases may file legal actions against us if our subsequent planning and development of the projects are perceived to be inconsistent with our representations and warranties made to such earlier purchasers. Further, we may have disagreements with regulatory bodies in the course of our operations, which may subject us to administrative proceedings and unfavorable decrees that result in pecuniary liabilities and cause delays to our property developments. Although we have not been involved in legal or other

disputes that have had a material adverse effect on our business, financial condition or results of operations, we cannot assure you that any disputes with parties involved in the development and sale of our properties in the future would not have a material adverse effect on our business, financial condition and results of operations or have a negative impact on our reputation or the "Country Garden" brand.

We are exposed to construction disputes and litigation

Apart from providing construction services to us, our construction company, Giant Leap Construction Co., is also responsible for the implementation of construction projects for other companies. It may be subject to legal claims and proceedings instituted by our customers, subcontractors, workers and other parties involved in the projects undertaken by us from time to time. Such claims and proceedings include claims for compensation for late delivery of construction works and delivery of substandard works and claims in respect of personal injuries and labor compensation in relation to construction works.

We are not engaged in any litigation or arbitration of material importance and we are not aware of any material litigation or claim that was pending or threatened by or against us. However, we cannot assure that we will not be engaged in any litigation or arbitration of material importance in the future. Although we have purchased insurance policies to cover potential litigation or arbitration claims, such claims may fall outside the scope or limit of our insurance coverage and our financial condition and results of operations may be adversely affected.

We may be liable to our customers for damages if we do not apply for individual property ownership certificates on behalf of our customers in a timely manner

Property developers in the PRC are typically required to deliver to purchasers the relevant individual property ownership certificates within 90 days after delivery of the properties unless otherwise specified in the relevant sale and purchase agreement. Property developers, including us, generally elect to specify the deadline for the application of the individual property ownership certificates upon the provision of the necessary documents by the customers to allow sufficient time for the relevant application processes.

Under current regulations, we are required to submit the requisite governmental approvals in connection with our property developments, including land use rights documents and planning and construction permits, to the local bureau of land resources and housing administration within three months after the receipt of the completion and acceptance certificate for the relevant properties and apply for the general property ownership certificate in respect of these properties. We are then required to submit, within a stipulated period after delivery of the properties, the relevant property sale and purchase agreements, identification documents of the purchasers and proof of payment of deed tax, together with the general property ownership certificate, for the bureau's review and the issuance of the individual property ownership certificates.

No material claim has been brought against us by any purchasers for late application of the individual property ownership certificates on behalf of our customers in the years ended December 31, 2006, 2007 and 2008 and the six months ended June 30, 2009. However, we cannot assure you that we will not become liable to purchasers in the future for the late application of the individual property ownership certificates on behalf of our customers due to our own fault or for any other reasons beyond our control.

Our branding and marketing strategy as well as our financial condition could be adversely affected if owners of the projects that we have developed elect to stop using us to provide property management services

Through our wholly-owned property management subsidiary, Guangdong Management Co., we provide property management services to the owners and users of each project that we have developed. These services include rental agency, security management, maintenance, clubhouse operations, gardening and landscaping and other customer services. We believe that property management is an integral part of our business and is very important to the successful marketing and promotion of our property developments. Under PRC law, owners may engage or dismiss a property management company with the consent of more than half of the owners who in the aggregate hold more than 50% of the total non-communal area of the building. If owners of the projects that we have developed elect to stop using us to provide property management services, our branding and marketing strategy as well as our revenue from the property management business would be adversely affected.

Our hotel operations involve uncertainties

Certain residential projects that we have developed or intend to develop include high-end hotel operations.

Our approach to our hotel business is not focused on the profit contribution derived directly from our hotel operations. Rather, we view our hotel business as a value enhancer to our brand name recognition in the property market and as an integral component of our overall marketing strategy for our residential projects.

Our hotels are owned and operated by our own hotel companies. Although the managing staff at various levels have the relevant management experience, we could face considerable reputational and financial risks if the hotels are mismanaged. If we are unable to successfully manage our hotel business, it may have a material adverse effect on the results in that segment as well as our overall marketing strategy, financial condition and results of operations.

There is no assurance that certain current ancillary facilities will continue to provide services to the owners or users of our property developments

The ancillary facilities within our residential communities enhance the value of our properties by improving the overall quality and value of the surrounding areas, thus offering a better living environment to the owners and users of our properties. However, we do not operate or manage some of the ancillary facilities, such as schools and hospitals. We cannot assure you that these facilities will continue to operate and provide services in our residential communities. In the event that these facilities cease to operate in our residential communities, our properties may become less attractive and competitive and this may adversely affect the value of our properties.

Any portion of our uncompleted and future property developments that are not in compliance with relevant laws and regulations will be subject to governmental approval and additional payments

The local government authorities inspect property developments after their completion and issue Construction of Properties and Municipal Infrastructure Completed Construction Works Certified

Reports (房屋建築工程和市政基礎設施工程竣工驗收備案表) if the developments are in compliance with the relevant laws and regulations. If the total constructed GFA of a property development exceeds the GFA originally authorized in the relevant land grant contracts or construction permit, or if the completed property contains built-up areas that do not conform with the plan authorized by the construction permit, the property developer may be required to pay additional amounts or take corrective actions with respect to such non-compliant GFA before a Construction of Properties and Municipal Infrastructure Completed Construction Works Certified Report can be issued to the property development.

We cannot assure you that local government authorities will not find that the total constructed GFA of our existing projects under development or any future property developments exceeds the relevant authorized GFA upon completion.

The relevant PRC tax authorities may challenge the basis on which we calculate our LAT obligations

Under PRC tax laws and regulations, our PRC subsidiaries are subject to LAT, which is collected by local tax authorities. All income from the sale or transfer of land use rights relating to state-owned land, buildings and their attached facilities in the PRC is subject to LAT at progressive rates ranging from 30% to 60% of the appreciation in value as defined by the relevant tax laws. Certain exemptions are available for the sale of ordinary standard residential houses (普通標準住宅) if the appreciation value does not exceed 20% of the total deductible items as defined in the relevant tax laws. Sales of commercial properties are not eligible for such exemption. We estimate and make provision for the full amount of applicable LAT in accordance with the relevant PRC tax laws and regulations, but we only pay a portion of such provision each year as required by the local tax authorities. For each of the three years ended December 31, 2006, 2007 and 2008 and the six months ended June 30, 2009, our LAT expense was RMB373.9 million, RMB1,155.4 million, RMB875.9 million and RMB154.4 million, respectively. As of June 30, 2009, our LAT provision balance was RMB1,564.4 million. Although we believe we made sufficient LAT provisions, we cannot assure you that the tax authorities will agree with the basis on which we calculate our LAT obligations. In the event that they believe a higher LAT should be paid, our net profits after tax will be adversely affected.

Further, on December 28, 2006, the State Administration of Taxation issued the Notice on the Administration of the Settlement of Land Appreciation Tax of Property Development Enterprises (關於房地產開發企業土地增值稅清算管理有關問題的通知), which requires that:

- final settlement of LAT will be conducted on a project-by-project basis. For multi-phase projects, each phase will be required to undergo LAT clearance and settlement process;
- the appreciated value of ordinary residential properties and non-ordinary residential properties contained within a project shall be calculated separately; and
- property developers must conduct final settlement if one of the following conditions is satisfied:
 - the project is completed and has been sold entirely;
 - the project is transferred as a whole before the completion of the construction; or
 - only land-use rights are transferred.

This notice also stipulates that the PRC tax authorities may require the property developer to conduct final LAT settlement if one of the following conditions is met:

- for completed projects, the area sold exceeds 85% of the total saleable area or, though less than 85%, the rest of the saleable area has already been rented or is being self-used;
- the project has held a sale/pre-sale license for at least three years but has not been sold entirely;
- the taxpayer has applied for tax de-registration but the LAT settlement has not been conducted; or
- other situations set forth by the provincial PRC tax authorities.

Local provincial tax authorities can formulate their own implementation rules according to the notice and local situations and there are uncertainties how they will enforce this notice. In the event that the implementation rules promulgated in the cities in which our projects are located require us to settle all the unpaid LAT, our cash flow may be adversely affected.

Potential liability for environmental problems could result in substantial costs

We are subject to a variety of laws and regulations concerning environmental protection. The particular environmental laws and regulations that apply to any given development site vary greatly according to the site's location and environmental condition, the present and former uses of the site and the nature of the adjoining properties. Requirements under environmental laws and conditions may result in delays in development schedules, may cause us to incur substantial compliance and other costs and may prohibit or severely restrict project development activity in environmentally-sensitive regions or areas.

The PRC environmental regulations provide that each project developed by a property developer is required to undergo an environmental assessment, and an environmental impact assessment report is required to be submitted to the relevant government authorities for approval before commencement of construction. If we fail to comply with such requirements, the local environmental authority may order to suspend construction of the project until the environmental impact assessment report is submitted to and approved by such authority. The local environmental authority may also impose on us a fine of RMB50,000 to RMB100,000 in respect of such project. We currently have two residential property projects under construction for which we have not completed the environmental assessment procedures. Although we are currently working on completing such procedures, we cannot assure you that the relevant environmental authorities will not order us to suspend construction of these projects or will not impose a fine on us. In the event that there is a suspension of construction or imposition of a fine, this may adversely affect our business and financial condition.

In addition, PRC law requires environmental facilities to be included in a property development to pass the inspection by the environmental authorities in order to obtain completion approval before commencing operations. Some of our residential and hotel property projects have environmental facilities that are subject to this requirement. If we fail to comply with such requirement, the local environmental authorities may order to suspend construction or use of such facilities which may disrupt our operations and adversely affect our business. Such authorities may also impose on us a fine of RMB50,000 to RMB100,000 in respect of such project. We are currently applying for the completion approval of environmental facilities, principally

related to the treatment of water, for five of our residential property projects and one of our hotel projects. We cannot assure you that we can obtain such approvals in a timely manner. In the event that such completion approvals cannot be obtained or if a fine is imposed on us, our business and our financial condition may be adversely affected.

Although the environmental investigations conducted by local environmental authorities to date have not revealed any environmental liability that we believe would have a material adverse effect on our business, financial condition or results of operations, it is possible that these investigations did not reveal all environmental liabilities and that there are material environmental liabilities of which we are unaware. We cannot assure you that a future environmental investigation will not reveal any material environmental liability. Also, we cannot assure you that the PRC government will not change the existing laws and regulations or impose additional or stricter laws or regulations, the compliance with which may cause us to incur significant capital expenditure. In addition, there is no assurance that we would be able to comply with any such laws and regulations. See “Business—Environmental matters” for further details of environmental matters.

Our success depends significantly on the continued services of our senior management team and other key personnel

Our future success depends significantly upon the continuing services of the members of our senior management team, in particular our chairman and executive director, Yeung Kwok Keung, and our executive director, Yang Erzhu, who have extensive experience in the property industry in the PRC. Yeung Kwok Keung is responsible for formulating development strategies, making decisions on investment projects and setting the direction of our operations and overall business management. Yang Erzhu specializes in the overall project planning, property management, and business management. Our president and executive director, Cui Jianbo, has extensive executive management experience. If one or more of our senior executives or other personnel are unable or unwilling to continue in their present positions, we may be unable to replace them easily or at all, and our business may be disrupted and our financial condition and results of operations may be materially adversely affected.

In addition, we depend on the continued service of our executive officers and other skilled managerial and technical personnel, including notably our designers and architects. Competition for senior management and key personnel is intense, and the pool of qualified candidates is very limited. Our business could be adversely affected if we lose the services of our senior executives or key personnel without suitable replacements or if any member of our senior management team or any of our other key personnel joins a competitor or forms a competing business.

Further, as we expect our business to continue to grow, we will need to recruit and train additional qualified personnel. If we fail to attract and retain qualified personnel, our business and prospects may be adversely affected.

The enforcement of the Labor Contract Law and other labor-related regulations in the PRC may adversely affect our business and our results of operations

On June 29, 2007, the National People’s Congress of China enacted the Labor Contract Law (勞動合同法), which became effective on January 1, 2008. Compared to the Labor Law (勞動法), the Labor Contract Law establishes more restrictions and increases the cost to employers to terminate

employees, including specific provisions related to fixed-term employment contracts, temporary employment, probation, consultation with the labor union and employee general assembly, employment without a contract, dismissal of employees, compensation upon termination and overtime work, and collective bargaining. According to the Labor Contract Law, an employer is obligated to sign an “unlimited term labor contract” (無固定期限勞動合同) with an employee if the employer continues to employ the employee after two consecutive fixed-term labor contracts. The employer also has to pay compensation to employees if the employer terminates an “unlimited term labor contract”. Unless an employee refuses to extend an expired labor contract, such compensation is also required when the labor contract expires. Further, under the Regulations on Paid Annual Leave for Employees (職工帶薪年休假條例), which became effective on January 1, 2008, employees who have served more than one year for an employer are entitled to a paid vacation ranging from five to 15 days, depending on their length of service. Employees who waive such vacation time at the request of employers shall be compensated at three times their normal salaries for each waived vacation day. As a result of these new protective labor measures, our labor costs may increase.

The interests of our controlling shareholder may not always align with our interests

Our controlling shareholder, Yang Huiyan, beneficially owned approximately 59.33% of our company as of August 31, 2009. The interests of our controlling shareholder may differ from our interests or the interests of our creditors. Our controlling shareholder could have significant influence in determining the outcome of any corporate transactions or other matters submitted to the shareholders for approval, including mergers, consolidations and the sale of all or substantially all of our assets, the election of directors and other significant corporate actions. Our controlling shareholder also has the power to prevent or cause a change in control. Without the consent of our controlling shareholder, we may be prevented from entering into transactions that could be beneficial to us. In addition, our controlling shareholder also holds interest in companies other than us. We cannot assure you that our controlling shareholder will act entirely in our interest or that any potential conflicts of interest will be resolved in our favor.

Land use rights certificates and building ownership certificates of certain of the properties owned or used by us have not been obtained

We have not obtained the building ownership certificates of certain of our properties, including: a bowling alley in Shunde Country Garden, a health center in Shunde Country Garden Hospital and staff quarters in Lirendong. Our PRC legal advisor has advised us that because of the lack of building ownership certificates for these properties, we may be ordered by the relevant PRC government department to (i) remedy the defect and pay a fine which represents more than 2% but less than 4% of the consideration payable under the relevant construction agreement of these properties, (ii) compensate for losses suffered by the users of these properties or (iii) vacate these properties. In the event that any of these penalties are imposed on us, our business may be affected.

In addition, we lease certain land and buildings from third parties who have not obtained the relevant land use rights certificates or the building ownership certificates, as applicable. We use these properties mainly to create additional green space for our property developments or as housing for some of our employees. In the event that the leases with these third parties are invalidated due to the defects in the leased properties’ title, we will have to return or restore the properties, which may affect the overall appeal of the relevant property developments. We will also have to find substitute housing for the employees living in such premises.

We may be treated as a PRC resident enterprise for PRC tax purposes

Under PRC tax laws effective prior to January 1, 2008, dividends, interest and other amounts paid to foreign investors by foreign-invested enterprises, such as amounts paid to us by our operating subsidiaries in China, were exempt from PRC withholding tax. Under the Enterprise Income Tax Law (企業所得稅法) (“EIT Law”) and the implementation rules which both took effect on January 1, 2008, enterprises established outside the PRC whose “de facto management bodies” are located in China are considered “resident enterprises” for PRC tax purposes. The implementation rules define the term “de facto management body” as a management body that exercises full and substantial control and management over the business, personnel, accounts and properties of an enterprise. In April 2009, the State Administration of Taxation specified certain criteria for the determination of the “de facto management bodies” for foreign enterprises that are controlled by PRC enterprises. However, there have been no official implementation rules regarding the determination of the “de facto management bodies” for foreign enterprises that are not controlled by PRC enterprises (including companies like ourselves).

We hold our shareholders’ meetings and board meetings outside China and keep our shareholders’ list outside China. However, most of our directors and senior management are currently based inside China and we keep our books of account inside China. The above elements may be relevant for the tax authorities to determine whether we are PRC resident enterprises for tax purposes. However, there is no clear standard published by the tax authorities for making such determination.

Although it is unclear under PRC tax law whether we have a “de facto management body” located in China for PRC tax purposes, we take the position that we are not a PRC resident enterprise for tax purposes. We cannot assure you that the tax authorities will agree with our position. If we are deemed to be a PRC resident enterprise for EIT purposes, we would be subject to the PRC enterprise income tax at the rate of 25% on our worldwide income.

PRC regulations relating to the investment in offshore special purpose companies by PRC residents may subject our shareholders that are PRC residents to personal liability, limit our ability to contribute capital into or provide loans to our PRC subsidiary, limit our subsidiaries’ ability to increase their registered capital, pay dividends or otherwise distribute profits to us, or otherwise adversely affect us

The SAFE has promulgated several regulations, including the Notice on Relevant Issues Concerning Foreign Exchange Administration for PRC Residents to Engage in Financing and Inbound Investment via Overseas Special Purpose Vehicles (國家外匯管理局關於境內居民通過境外特殊目的公司融資及返程投資外匯管理有關問題的通知), or Circular No. 75, issued on October 21, 2005, and its implementation rules, or Circular No. 106, issued in May 2007, which require PRC residents and PRC corporate entities to register with local branches of the SAFE in connection with their direct or indirect offshore investment activities.

Under these SAFE regulations, PRC residents who make, or have previously made, direct or indirect investments in offshore companies are required to register those investments with the local branch of the SAFE. In addition, any PRC resident who is a direct or indirect shareholder of an offshore company is required to update the previously filed registration with the local branch of the SAFE, to reflect any material change involving that offshore company’s round-trip investment, capital variation, such as an increase or decrease in capital, transfer or swap of

shares, merger, division, long-term equity or debt investment or creation of any security interest, and the PRC subsidiaries of the relevant offshore company are required to urge the PRC resident shareholders to do so. If any PRC shareholder fails to make the required initial SAFE registration or update the previously filed registration, the PRC subsidiaries of that offshore parent company may be prohibited from distributing their profits and the proceeds from any reduction in capital, share transfer or liquidation to their offshore parent company, and the offshore parent company may also be prohibited from injecting additional capital into its PRC subsidiaries.

Due to uncertainty concerning the reconciliation of these SAFE rules with other approval or registration requirements, it remains unclear how these rules, and any future legislation concerning offshore or cross-border transactions, will be interpreted, amended and implemented by the relevant government authorities. We attempt to comply, and attempt to ensure that our shareholders who are subject to these rules comply, with the relevant requirements. However, we cannot assure you that all of our shareholders who are PRC residents, will comply with our request to make or update any applicable registrations or comply with other requirements required by these rules or other related rules. The failure or inability of our PRC resident shareholders to make any required registrations or comply with other requirements may subject such shareholders to fines and legal sanctions and may also limit our ability to contribute additional capital into or provide loans to PRC subsidiaries, limit our PRC subsidiaries' ability to increase their registered capital, pay dividends or otherwise distribute profits to us, or otherwise adversely affect us.

Our investments in the PRC are subject to the PRC government's control over foreign investment in the property sector

The PRC government has in the past imposed restrictions on foreign investment in the property sector to curtail the overheating of the property sector by, among other things, increasing the capital and other requirements for establishing foreign-invested real estate enterprises, tightening foreign exchange control and imposing restrictions on purchases of properties in China by foreign persons. On May 23, 2007, the Ministry of Commerce ("MOFCOM") and the SAFE jointly issued the Notice on Further Strengthening and Regulating the Approval and Supervision on Foreign Investment in Real Estate Sector in the PRC (關於進一步加強規範外商直接投資房地產業審批和監管的通知), which, among other things, provides that:

- foreign investment in the property sector in the PRC relating to high-end properties should be strictly controlled;
- prior to obtaining approval for the establishment of foreign-invested real estate enterprises, either (i) both the land use right certificates and housing title certificates should be obtained, or (ii) contracts for obtaining land use rights or housing titles should be entered into;
- foreign-invested real estate enterprises approved by local authorities shall immediately register with the MOFCOM through a filing made by the local authorities; and
- foreign exchange administration authorities and banks authorized to conduct foreign exchange business should not effect foreign exchange settlements of capital account items for those foreign-invested real estate enterprises which have not completed their filings with the MOFCOM or fail to pass the annual inspection.

Restrictions imposed by the PRC government on foreign investment in the property sector may affect our ability to make further investments in our PRC subsidiaries and as a result may limit our business growth and have an adverse effect on our business, financial condition and results of operations.

For more information about policies adopted by the PRC government with respect to the PRC property sector, see “Regulation—Legal supervision relating to property sector in the PRC—Foreign-invested real estate development enterprises”.

PRC regulations relating to acquisitions of PRC companies by foreign entities may limit our ability to acquire PRC companies and adversely affect the implementation of our strategy as well as our business and prospects.

The Provisions on the Acquisition of Domestic Enterprises by Foreign Investors (關於外國投資者併購境內企業的規定) (the “M&A Provisions”) issued by six PRC ministries including the MOFCOM, effective from September 8, 2006, provide the rules with which foreign investors must comply should they seek to purchase by agreement the equities of the shareholders of a domestic non-foreign-invested enterprise or subscribe to the increased capital of a domestic non-foreign funded enterprise, and thus convert the domestic non-foreign-invested enterprise into a foreign invested enterprise to conduct asset merger and acquisition. It stipulates that the business scope upon acquisition of domestic enterprises must conform to the Foreign Investment Industrial Guidance Catalog (外商投資產業指導目錄, 2007年修訂) issued by the NDRC and the MOFCOM, which restricts the scope of permitted foreign investment. It also provides the takeover procedures for equity interests in domestic companies.

Our PRC legal advisors have advised us that there are uncertainties as to how the M&A Provisions will be interpreted or implemented. If we decide to acquire a PRC company, we cannot assure you that we or the owners of such PRC company can successfully complete all necessary approval requirements under the M&A Provisions. This may restrict our ability to implement any acquisition strategy and adversely affect our business and prospects.

The PRC government has implemented restrictions on the ability of PRC property developers to obtain offshore financing which could affect our ability to deploy the funds raised in our business in the PRC

On July 10, 2007, the SAFE issued the “Notice Regarding the Publication of the List of the First Batch of Property Development Projects with Foreign Investment That Have Properly Registered with the MOFCOM” (國家外匯管理局綜合司關於下發第一批通過商務部備案的外商投資房地產專案名單的通知). The notice stipulates, among other things, (i) that the SAFE will no longer process foreign debt registrations or foreign debt applications for the settlement of foreign exchange submitted by real estate enterprises with foreign investment that obtained authorization certificates from and registered with the MOFCOM on or after June 1, 2007 and (ii) that SAFE will no longer process foreign exchange registrations (or any change in such registrations) or applications for settlement and sale of foreign exchange submitted by real estate enterprises with foreign investment that obtained approval certificates from local government commerce departments on or after June 1, 2007 but that did not register with the MOFCOM. This new regulation effectively prohibits us from injecting funds into our PRC project companies by way of shareholder loans.

In addition, equity contributions by us and our non-PRC subsidiaries to our PRC subsidiaries will require approvals from the commerce department of the local government and registration with the MOFCOM, which may take considerable time and delay the actual contribution to the PRC subsidiaries. This may adversely affect the financial condition of the PRC subsidiaries and may cause delays to the development undertaken by such PRC subsidiaries. We cannot assure you that we have obtained or will obtain in a timely manner all relevant necessary approval certificates or registration for all our operating subsidiaries in the PRC to comply with this regulation.

Further, we cannot assure you that the PRC government will not introduce new policies that further restrict our ability to deploy in the PRC, or that prevent us from deploying in the PRC, the funds raised outside China. Therefore, we may not be able to use all or any of the capital that we may raise outside China to finance our projects in a timely manner or at all.

Risks relating to the property sector in the PRC

The property industry in the PRC is still at an early stage, and the property market and related infrastructure and mechanisms have not been fully developed

Private ownership of property in the PRC is still in a relatively early stage of development. Although demand for private residential property in the PRC, including Guangdong Province, has been growing rapidly in recent years, such growth is often coupled with volatility in market conditions and fluctuation in property prices. It is extremely difficult to predict by how much and when demand will develop, as many social, political, economic, legal and other factors, most of which are beyond our control, may affect the development of the market. The level of uncertainty is increased by the limited availability of accurate financial and market information as well as the overall low level of transparency in the PRC.

The lack of a liquid secondary market for residential property may discourage investors from acquiring new properties. The limited amount of property mortgage financing available to PRC individuals, compounded by the lack of security of legal title and enforceability of property rights, may further inhibit demand for residential developments.

In addition, risk of property over-supply is increasing in parts of China, where property investment, trading and speculation have become overly active. In the event of actual or perceived over-supply, property prices may fall significantly and our revenue and profitability will be adversely affected.

The property industry in the PRC is subject to government regulations and policies, which could have the effect of slowing down the industry's growth

Our business is subject to extensive governmental regulation. As with other PRC property developers, we must comply with various requirements mandated by the PRC laws and regulations, including the policies and procedures established by local authorities designed to implement such laws and regulations. In particular, the PRC government exerts considerable direct and indirect influence on the development of the PRC property sector by imposing industry policies and other economic measures, such as control over the supply of land for property development, foreign exchange, property financing, taxation and foreign investment.

Between 2004 and the first half of 2008, in response to concerns over the scale of the increase in property investment and the overheating of the property sector in the PRC, the PRC government introduced policies to restrict development in the property sector, including:

- suspending or restricting land grants and development approvals for villas and larger-sized units;
- tightening lending of bank loans to property developers and purchasers of developed properties and increasing the reserve requirements for commercial banks;
- imposing or increasing taxes on short-term gains from second-hand property sales; and
- restricting foreign investment in the property sector by, among other things, increasing registered capital and other requirements for establishing foreign-invested real estate enterprises, tightening foreign exchange control and imposing restrictions on purchases of properties in China by foreign persons.

Beginning in the second half of 2008, in order to combat the impact of the global economic slowdown, the PRC government has adopted measures to encourage domestic consumption in the residential property market and support property development. These policies may not necessarily have a positive effect on our operations and our future business development; and the PRC government may revise or terminate such favorable policies according to changes in market conditions. We cannot assure you that the PRC government will not adopt more stringent industry policies, regulations and measures in the future. If we fail to adapt our operations to new policies, regulations and measures that may come into effect from time to time with respect to the real property industry, or such policy changes disrupt our business or cause us to incur additional costs, our business, financial condition, results of operations and prospects may be materially and adversely affected.

For more information about policies adopted by the PRC government with respect to the PRC property sector, see "Regulation".

Risks relating to the PRC

PRC economic, political and social conditions, as well as government policies, could affect our business

Substantially all of our assets are located in the PRC, and all of our revenue is derived from within the PRC. Accordingly, our results of operations, financial position and prospects are significantly subject to the economic, political and legal developments of the PRC.

The economy of the PRC differs from the economies of most developed countries in many respects, including but not limited to:

- political structure;
- level of government involvement;
- level of development;
- growth rate;
- control of foreign exchange; and
- allocation of resources.

The PRC economy has been transitioning from a planned economy to a market-oriented economy. For the past three decades, the PRC government has implemented economic reform measures emphasizing utilization of market forces in the development of the PRC economy. However, since early 2004, the PRC government has implemented certain measures in order to prevent the PRC economy from overheating. These measures may cause a decrease in the level of economic activity, including demand for residential and commercial properties and may have an adverse impact on economic growth in the PRC. If China's economic growth slows down or if the Chinese economy experiences a recession, the growth or demand for our products may also slow down and our business, financial condition and results of operations will be adversely affected. See "—Risks relating to our business—Current global economic slowdown and financial crisis have negatively impacted, and may continue to negatively impact, our business".

In addition, demand for our products and our business, financial condition and results of operations may be adversely affected by:

- political instability or changes in social conditions in the PRC;
- changes in laws and regulations or the interpretation of laws and regulations;
- measures which may be introduced to control inflation or deflation;
- changes in the rate or method of taxation; and
- imposition of additional restrictions on currency conversion and remittances abroad.

Governmental control of currency conversion may affect the value of your investment

The PRC government imposes controls on the convertibility of Renminbi into foreign currencies and, in certain cases, the remittance of currency to jurisdictions outside China. We receive substantially all of our revenue in Renminbi. Under our current structure, our income is primarily derived from dividend payments from our PRC subsidiaries. Shortages in the availability of foreign currency may restrict the ability of our PRC subsidiaries to remit sufficient foreign currency to pay dividends or other payments to us or otherwise satisfy their foreign currency denominated or settled obligations, such as the Convertible Bonds. Under existing PRC foreign exchange regulations, payments of certain current account items can be made in foreign currencies without prior approval from the local branch of the SAFE, by complying with certain procedural requirements. However, approval from the appropriate government authorities is required where Renminbi is to be converted into foreign currency and remitted to a jurisdiction outside China to pay capital expenses such as the repayment of bank loans denominated in foreign currencies. The PRC government may also, at its discretion, restrict access to foreign currencies for current account transactions in the future. If the PRC foreign exchange control system prevents us from obtaining sufficient foreign currency to satisfy our currency demands, our PRC subsidiaries may not be able to pay dividends in foreign currencies to us and we may not be able to service our debt obligations denominated or settled in foreign currencies.

The PRC legal system has inherent uncertainties that would affect our business and results of operations

As all of our business is conducted, and substantially all of our assets are located, in the PRC, our operations are generally affected by and subject to the PRC legal system and PRC laws and regulations.

Since 1979, the PRC government has promulgated laws and regulations in relation to general economic matters, such as foreign investment, corporate organization and governance, commerce, taxation, foreign exchange and trade, with a view to developing a comprehensive system of commercial law. In particular, legislation over the past 25 years has significantly enhanced the protections afforded to various forms of foreign investment in China. The legal system in China is continuing to evolve. Even where adequate laws exist in China, the enforcement of existing laws or contracts based on existing laws may be uncertain and sporadic, and it may be difficult to obtain swift and equitable enforcement or to obtain enforcement of a judgment by a court of another jurisdiction. In addition, the PRC legal system is based on written statutes and their interpretation, and prior court decisions may be cited as reference but have limited weight as precedents.

Our primary operating subsidiaries were incorporated in China as “wholly foreign-owned enterprises”. Although we or our wholly-owned subsidiaries are the sole shareholder of, and therefore have full control over, these PRC entities, the exercise of our shareholder rights are subject to their respective articles of association and PRC laws applicable to foreign-invested enterprises in China, which may be different from the laws of other developed jurisdictions.

China has not developed a fully integrated legal system and recently-enacted laws and regulations may not sufficiently cover all aspects of economic activities in China. The relative inexperience of China’s judiciary in many cases also creates additional uncertainty as to the outcome of any litigation. In addition, interpretation of statutes and regulations may be subject to government policies reflecting domestic political changes. Furthermore, because these laws and regulations are relatively new, and because of the limited volume of published decisions and their non-binding nature, the interpretation, implementation and enforcement of these laws and regulations involve uncertainties due to the lack of established practice available for reference. We cannot predict the effect of future legal development in China, including the promulgation of new laws, changes to existing laws or the interpretation or enforcement thereof, or the inconsistencies between local rules and regulations and national law. In addition, the PRC legal system is based in part on government policies and internal rules (some of which are not published on a timely basis or at all) that may have retroactive effect. As a result, we may not be aware of our violation of these policies and rules until some time after the violation has occurred. This may also limit the remedies available to you as an investor and to us in the event of any claims or disputes with third parties.

Any litigation in China may be protracted and result in substantial costs and diversion of resources and management attention.

It may be difficult to enforce any judgments obtained from non-PRC courts against us in the PRC

Substantially all of our assets are located within the PRC. The PRC does not have treaties providing for the reciprocal recognition and enforcement of judgments of courts with the United States, the United Kingdom, Japan or most other western countries. Therefore, it may be difficult for you to enforce against us in the PRC any judgments obtained from non-PRC courts.

The national and regional economies in China and our prospects may be adversely affected by natural disasters, acts of God, and occurrence of epidemics

Our business is subject to general economic and social conditions in China. Natural disasters, epidemics and other acts of God which are beyond our control may adversely affect the

economy, infrastructure and livelihood of the people in China. Some regions in China, including certain cities where we operate, are under the threat of flood, earthquake, sandstorm, snowstorm, fire, drought, or epidemics such as Severe Acute Respiratory Syndrome, or SARS, H5N1 avian flu or the human swine flu, also known as Influenza A (H1N1). For instance, a serious earthquake and its successive aftershocks hit Sichuan province in May 2008 and subsequently, resulting in tremendous loss of lives and injury and destruction of assets in the region. In addition, past occurrences of epidemics, depending on their scale, have caused different degrees of damage to the national and local economies in China. A recurrence of SARS or an outbreak of any other epidemics in China, such as the H5N1 avian flu or the human swine flu, especially in the cities where we have operations, may result in material disruptions to our property development and our sales, which in turn may adversely affect our business, financial condition and results of operations.

Capitalization

The following table sets forth on an actual basis our unaudited consolidated cash and cash equivalents, short-term borrowings and capitalization as of June 30, 2009. Except as otherwise disclosed herein, there has been no material change in our capitalization since June 30, 2009.

| (in millions) | As of June 30, 2009 | |
|---|---------------------|---------------------|
| | Actual | |
| | RMB (unaudited) | US\$ (unaudited) |
| Cash and cash equivalents⁽¹⁾ | 4,855.2 | 710.8 |
| Short-term borrowings⁽²⁾ | | |
| Bank borrowings-secured | 4,781.1 | 700.0 |
| Bank borrowings-unsecured | - | - |
| Total short-term borrowings | 4,781.1 | 700.0 |
| Long-term borrowings⁽³⁾⁽⁴⁾⁽⁵⁾ | | |
| Bank borrowings-secured | 3,601.7 | 527.3 |
| Bank borrowings-unsecured | 2,445.4 | 358.0 |
| Convertible bonds | 4,146.6 | 607.1 |
| Total long-term borrowings | 10,193.7 | 1,492.4 |
| Capital and reserves attributable to the equity owners | | |
| Issued capital (HK\$0.1 par value per share, 16,301,289,000 shares issued and fully paid) | 1,312.8 | 192.2 |
| Share premium | 13,371.9 | 1,957.8 |
| Reserves | 859.7 | 125.9 |
| Retained earnings | 4,880.0 | 714.5 |
| Total capital and reserves attributable to the equity owners | 20,424.4 | 2,990.4 |
| Total capitalization⁽⁶⁾ | 35,399.2 | 5,182.8 |

Notes:

(1) Cash and cash equivalents exclude restricted cash of RMB4,576.9 million (US\$670.1 million).

(2) Short-term borrowings include the current portion of long-term borrowings.

(3) As of June 30, 2009, our consolidated capital commitments were RMB6,209.8 million (US\$909.2 million) and our contingent liabilities, all of which were in the form of guarantees that we have provided to our customers in relation to their purchase of our properties, amounted to approximately RMB11,262.6 million (US\$1,648.9 million). See "Management's discussion and analysis of financial conditions and results of operations—Liquidity and capital resources—Contingent liabilities" and "—Capital commitments".

(4) Long-term borrowings exclude the current portion of long-term borrowings.

(5) We signed a facility letter with The Bank of East Asia, Limited on July 9, 2009. This loan facility is a Hong Kong dollar denominated term loan facility with an aggregate principal amount of up to HK\$200 million. As of August 31, 2009, we had drawn down the entire principal amount available under this facility. In addition, we entered into a facility agreement with Chinese Mercantile Bank, Guangzhou branch, on August 14, 2009. This loan facility is a Hong Kong dollar denominated term loan facility with an aggregate principal amount of up to HK\$200 million. As of August 31, 2009, we had drawn down the entire principal amount available under this facility. See "Description of other material indebtedness".

(6) Total capitalization equals total short-term borrowings and total long-term borrowings plus total capital and reserves attributable to the equity owners.

Selected consolidated financial and other data

The following tables present our selected financial and other data. The selected financial data as of and for each of the fiscal years ended December 31, 2007 and 2008 (except for EBITDA data) is derived from our audited consolidated financial statements for those years and as of the dates indicated. The summary financial data as of and for the fiscal year ended December 31, 2006 is unaudited and prepared based on our audited consolidated financial statements for the year ended December 31, 2006 and restated for the reclassification of LAT, details of which are described in note 37 to our audited consolidated financial statements for the year ended December 31, 2007. The selected financial data as of June 30, 2009 and for the six-month periods ended June 30, 2008 and 2009 (except for EBITDA data) is derived from our unaudited but reviewed interim financial information. The unaudited but reviewed interim financial information as of and for the six-month periods ended June 30, 2008 and 2009 contains all adjustments that our management believes are necessary for the fair presentation of such information. Results for interim periods are not indicative of results for the full year.

The financial information has been prepared and presented in accordance with HKFRS, which differ in certain material respects from U.S. GAAP. For a discussion of these differences, see "Summary of certain differences between HKFRS and U.S. GAAP". The summary financial data below should be read in conjunction with "Management's discussion and analysis of financial condition and results of operations" and the consolidated financial information and the related notes thereto.

| EBITDA Margin ⁽³⁾ | 42.1% | 28.8% | 28.8% |

Notes:

(1) Prior to 2007, LAT was included in our cost of sales. Since 2007, we started to record LAT as income tax expense and the outstanding provision as income tax payable after a reassessment of the nature of LAT and a study of the market practice. For comparison purposes, we reclassified LAT expenses of RMB373.9 million previously included in cost of sales in 2006 as income tax expenses in the consolidated income statement, and provision for LAT of RMB733.8 million previously included in other payable as of December 31, 2006 as income tax payable in the consolidated balance sheet. Respective items in the 2006 consolidated cash flow statements have been revised accordingly.

(2) EBITDA for any period consists of operating profit plus finance income, depreciation expenses and amortization of land use rights and intangible assets, net of exchange gains or losses. EBITDA is not a standard measure under either U.S. GAAP or HKFRS. EBITDA is a widely used financial indicator of a company's ability to service and incur debt. EBITDA should not be considered in isolation or construed as an alternative to cash flows, net income or any other measure of performance or as an indicator of our operating performance, liquidity, profitability or cash flows generated by operating, investing or financing activities. EBITDA does not account for taxes, interest expense or other non-operating cash expenses. In evaluating EBITDA, we believe that investors should consider, among other things, the components of EBITDA such as sales and operating expenses and the amount by which EBITDA exceeds capital expenditures and other charges. We have included EBITDA because we believe it is a useful supplement to cash flow data as a measure of our performance and our ability to generate cash flow from operations to service debt and pay taxes. EBITDA presented herein may not be comparable to similarly titled measures presented by other companies. Investors should not compare our EBITDA to EBITDA presented by other companies because not all companies use the same definition. See "Management's discussion and analysis of financial condition and results of operations—Non-GAAP financial measures" for a reconciliation of our profit for the year/period under HKFRS to our definition of EBITDA.

(3) EBITDA margin is calculated by dividing EBITDA by revenue.

Management's discussion and analysis of financial condition and results of operations

The following discussion should be read in conjunction with our consolidated financial information together with the accompanying notes. Our consolidated financial statements were prepared in accordance with HKFRS, which differ in certain material respects from U.S. GAAP. See "Summary of certain differences between HKFRS and U.S. GAAP".

This section includes forward-looking statements that involve risks and uncertainties. All statements, other than statements of historical facts, included in this section that address activities, events or developments which we expect or anticipate will or may occur in the future are forward-looking statements. These statements are based on assumptions and analyses we made in light of experience and our perception of historical trends, current conditions and expected future developments, as well as other factors we believe are appropriate under the circumstances.

Unless the context otherwise requires, references to "2006", "2007" and "2008" are to our financial years ended December 31, 2006, 2007 and 2008, respectively. References to "associate" or "associates" in this section are to associates as defined in HKFRS.

Overview

We are one of the leading integrated property developers in the PRC with substantially all of our assets and operations based in the PRC. Since the commencement of our property development activities in 1997, we have benefited from, and expect to continue to benefit from, the growth in the property sector associated with the economic development in the PRC, in particular, in Guangdong Province. Our primary business has been the development of large-scale residential community projects and the sale of various types of properties, including townhouses, apartment buildings, car parks and retail shops. The majority of our products are targeted towards owner-occupier customers. As an integrated property developer, our lines of business also include construction, installation, fitting and decoration as well as property management.

Our residential home projects are generally located in the suburban areas of first-tier cities and in the newly urbanized town centers of second- and third-tier cities. While the local residents in China constitute our core customer base, we have also generated demand from residents in Hong Kong and Macau.

As of June 30, 2009, we had 58 projects at various stages of development. Thirty of these projects were located in Guangdong Province: eight in Guangzhou City, five in Foshan City, six in Jiangmen City and the remaining in other cities including Yangjiang City, Shaoguan City, Zhaoqing City, Huizhou City, Shanwei City, Maoming City and Qingyuan City. Another 28 projects were located outside Guangdong Province, spanning six provinces, one autonomous region and two provincial level municipalities.

As of June 30, 2009, our projects had an aggregate completed GFA of approximately 13,756,052 sq.m. We had an aggregate GFA under development of approximately 13,399,110 sq.m. and an aggregate GFA of approximately 29,618,992 sq.m. relating to properties held for future development as of the same day. In addition, as of June 30, 2009, we had entered into land grant contracts in respect of land located in 18 cities with an aggregate site area of

approximately 8,068,910 sq.m. and an aggregate expected GFA of approximately 10,553,831 sq.m. for future development.

We also develop hotels to compliment our residential properties. Most of these hotels are located in our large-scale residential community projects, which we believe have added value to our residential projects and enhanced our brand recognition. We have developed and are operating four five-star hotels and one four-star hotel, as well as five hotels which have been developed in accordance with the five-star rating standard set forth in the “Star-Rating Standard for Tourist Hotels” (旅遊飯店星級的劃分與評定) issued by the PRC National Tourism Administration. In addition, we have 10 hotels under construction in accordance with the five-star standard set forth in the “Star-Rating Standard for Tourist Hotels”.

Certain income statement items

Revenue

Our revenue comprises primarily proceeds from the sale of properties or provision of services after the elimination of intra-group transactions. Our revenue is primarily generated from our four business segments, consisting of property development, construction and decoration, property management and hotel operation.

Revenue from property development represents proceeds from the sale of our properties. As we derive a substantial amount of our total revenue from the property development segment, our results of operations for a given period are dependent upon the type and GFA of properties we have completed during that period, the market demand for those properties and the price we are able to obtain for such properties. Conditions in the property markets in which we operate change from period to period and are significantly affected by the general economic, political and regulatory developments in the PRC. See “— Key factors affecting our performance”.

We recognize revenue from the sale of properties when the construction has been completed and the properties have been delivered to the purchasers with the collectibility of related receivables reasonably assured. For the years ended December 31, 2006, 2007 and 2008 and the six months ended June 30, 2009, we recognized revenue of RMB6,961.4 million, RMB16,666.9 million, RMB14,736.5 million and RMB8,648.3 million in connection with the delivery of aggregate GFA of 1,318,397 sq.m., 2,611,315 sq.m. 2,147,592 sq.m. and 1,738,758 sq.m. of property, respectively.

Consistent with customary practice in the property development industry in the PRC, after satisfying the conditions for pre-sales according to PRC laws and regulations, we typically enter into purchase contracts with customers while the properties are still under development. See “Business—Property development—Pre-sales”. Generally there is a time difference typically ranging from several months to one year between the time we commence pre-selling of properties under development and the delivery of properties to the purchasers. We do not recognize any revenue from the pre-sales of our properties until the development of such properties is completed and the properties are delivered to the purchasers, even though a portion of the purchase price for a property is typically paid at various stages prior to the delivery of properties. Before the delivery of a pre-sold property upon the completion of development, deposits and purchase price or portions thereof received from our customers are recorded as “advanced proceeds received from customers”, a current liability on our balance sheet.

Revenue from construction services is recognized in the accounting period in which the services are rendered by reference to completion of the specific transaction assessed on the basis of the actual service provided as a percentage of the total services to be provided. Revenue from decoration, property management and hotel operation is recognized in the accounting period in which the services are rendered. The revenue generated by certain of our subsidiaries comprising the construction and decoration, property management and hotel operation segments from services provided to our projects is eliminated in our consolidated financial statements. For each of the three years ended December 31, 2006, 2007 and 2008 and the six months ended June 30, 2009, our construction and decoration segment generated revenue of RMB556.1 million, RMB631.1 million, RMB408.5 million and RMB258.2 million, respectively; our property management segment generated revenue of RMB170.4 million, RMB221.7 million, RMB293.3 million and RMB162.0 million, respectively; and our hotel operation segment generated revenue of RMB194.0 million, RMB215.3 million, RMB274.5 million and RMB134.3 million, respectively.

Cost of sales

Cost of sales comprises the costs incurred from our four business segments. The table below sets forth the cost of sales by segments and their percentage of the total cost of sales:

| | For the year ended December 31, | | | | | | For the six months ended June 30, | | | |
|---------------------------------------|---------------------------------|---|---------------------------------|---|---------------------------------|---|-----------------------------------|---|--|---|
| | 2006 | | 2007 | | 2008 | | 2008 | | 2009 | |
| | Amount (RMB in thousands) | Percentage of total cost of sales % | Amount (RMB in thousands) | Percentage of total cost of sales % | Amount (RMB in thousands) | Percentage of total cost of sales % | Amount (RMB in thousands) | Percentage of total cost of sales % | Amount (RMB in thousands) (unaudited) | Percentage of total cost of sales % |
| Property development . . . | 4,127,312 | 83.9 | 8,704,899 | 91.0 | 7,810,404 | 89.9 | 3,082,239 | 87.3 | 5,824,086 | 92.8 |
| Construction and decoration | 427,824 | 8.6 | 450,371 | 4.7 | 326,772 | 3.8 | 186,520 | 5.3 | 206,586 | 3.3 |
| Property management . . . | 163,280 | 3.3 | 208,039 | 2.2 | 272,764 | 3.1 | 131,740 | 3.7 | 107,665 | 1.7 |
| Hotel operation | 147,750 | 3.0 | 197,581 | 2.1 | 277,266 | 3.2 | 130,415 | 3.7 | 137,687 | 2.2 |
| Others | 56,415 | 1.2 | - | - | - | - | - | - | - | - |
| Total | 4,922,581 | 100.0 | 9,560,890 | 100.0 | 8,687,206 | 100.0 | 3,530,914 | 100.0 | 6,276,024 | 100.0 |

Cost of sales represents primarily the costs we incur directly for our property development activities which include construction, decoration and design costs, land use rights cost and business taxes.

Prior to 2007, LAT was included in our cost of sales. Since 2007, we started to record LAT as income tax expense in the current year and the outstanding provision as income tax payable after a reassessment of the nature of LAT and a study of the market practice. For comparison purposes, we reclassified LAT expenses of RMB373.9 million previously included in cost of sales in 2006 as income tax expenses in the consolidated income statement, and provision for LAT of RMB733.8 million previously included in other payable as of December 31, 2006 as income tax payable in the consolidated balance sheet. Respective items in the 2006 consolidated cash flow statements have been revised accordingly.

The table below sets forth for the periods indicated, the components of our cost of properties sold, and the percentage of the cost of properties sold represented by each component (as adjusted to reflect the reclassification of LAT).

| | For the year ended December 31, | | | | | | For the six months ended June 30, | | | |
|---|---------------------------------|-----------------------------------|------------------|-----------------------------------|------------------|-----------------------------------|-----------------------------------|-----------------------------------|------------------|-----------------------------------|
| | 2006 | | 2007 | | 2008 | | 2008 | | 2009 | |
| | Amount | Percentage of total cost of sales | Amount | Percentage of total cost of sales | Amount | Percentage of total cost of sales | Amount | Percentage of total cost of sales | Amount | Percentage of total cost of sales |
| (RMB in thousands) | % | (RMB in thousands) | % | (RMB in thousands) | % | (RMB in thousands) | % | (RMB in thousands) (unaudited) | % | |
| Construction, decoration and design costs | 3,151,915 | 76.4 | 6,837,739 | 78.6 | 6,342,880 | 81.2 | 2,400,238 | 77.9 | 4,757,729 | 81.7 |
| Land use rights cost | 506,543 | 12.3 | 1,006,477 | 11.6 | 703,794 | 9.0 | 325,257 | 10.6 | 619,113 | 10.6 |
| Business taxes and levies | 468,854 | 11.3 | 860,683 | 9.8 | 763,730 | 9.8 | 356,744 | 11.5 | 447,244 | 7.7 |
| Total | 4,127,312 | 100.0 | 8,704,899 | 100.0 | 7,810,404 | 100.0 | 3,082,239 | 100.0 | 5,824,086 | 100.0 |

Properties under development are stated at the lower of cost and net realizable value. Net realizable value takes into account the price ultimately expected to be realized and the anticipated costs to complete the properties. Completed properties remaining unsold at the end of each financial period are stated at the lower of cost and net realizable value.

Construction, Decoration and Design Costs. Construction, decoration and design costs comprise of self-construction costs, outsourcing costs, fitting and decoration costs and design costs. The price of raw materials, the level of complexity of the construction and design and the luxury level in the decoration are the principal factors affecting the average construction costs. Therefore, construction costs of a property project may fluctuate if the conditions of the site require more complex designs and procedures or more expensive materials in order to provide the desired foundation support.

Land Use Rights Cost. During each of the three years ended December 31, 2006, 2007 and 2008 and the six months ended June 30, 2009, substantially all of the land used in our projects or property developments, whether completed, under development or held for future development, was acquired after the promulgation of the PRC Rules Regarding the Grant of State-Owned Land Use Rights by Way of Tender, Auction and Listing for-Sale by the PRC Ministry of Land and Resources (the “New Land Acquisition Rules”).

In July 2002, the PRC government established new rules to determine the purchase price of all granted land through a competitive process. See “—Key factors affecting our performance—Ability to acquire suitable land” below.

Under the New Land Acquisition Rules, after July 1, 2002, land use rights for the purposes of commercial use, tourism, entertainment and commodity building development in the PRC may only be granted by the government through a bidding process including a public tender, an auction or a listing-for-sale. In addition, under current regulations, grantees of land use rights are generally allowed to transfer the land use rights in secondary markets, except that if a transferor is a state-owned enterprise or a collectively-owned enterprise or the land use rights are obtained by way of allocation, such land use rights must be transferred through a public

bidding process. See “Business—Property Development—Land acquisition” for a description of the land acquisition procedures. Consequently, if we acquire land through a bidding process in the future, our cost of land use rights will consist primarily of a lump-sum purchase price payable to the government or the other transferors as determined by the bidding process. Under the New Land Acquisition Rules, the relevant government authority shall be responsible for establishing a floor price for the bidding process on the basis of land value appraisals and government industrial policies. If we acquire land use rights from other grantees in secondary markets in the future, our cost of land use rights will be the negotiated purchase prices payable to such grantees.

Business Taxes. Our PRC subsidiaries are subject to local business taxes. The effective tax rate for each of our property development, construction and decoration, property management and hotel operation businesses as of June 30, 2009 was 5%, 3%, 5% and 5%, respectively.

Selling and marketing costs

Selling and marketing costs include advertising and promotion expenses relating to sales of properties, selling and marketing staff costs and other selling expenses.

Administrative expenses

Administrative expenses include primarily staff costs, amortization of land use rights relating to those lands that are not yet developed and those on which the properties have been completed but are not yet sold, materials consumption cost, depreciation and property tax.

Finance costs

Finance costs consist primarily of interest costs as a result of bank borrowings and borrowings from related parties and the issue of Convertible Bonds. Our finance costs are charged to our consolidated income statements in the accounting period in which they are incurred. Prior to January 1, 2009, our borrowing costs were charged to the consolidated income statement in the accounting period in which they were incurred in accordance with Hong Kong Accounting Standard (“HKAS”) 23. From January 1, 2009, pursuant to the revised HKAS 23, we started to capitalize our borrowing costs directly attributable to the acquisition, construction, or production of our assets as part of costs of assets. As a result, we recorded an increase in properties under development of RMB69.2 million and a decrease in finance costs of the same amount in our financial statements as of and for the six months ended June 30, 2009. Finance costs fluctuate from period to period due primarily to fluctuations in our level of outstanding indebtedness and the interest rates on our borrowings.

Derivative financial instruments

We record fair value gain or loss arising from our equity swap transaction in our income statement. We entered into a cash settled equity swap transaction (the “Equity Swap”) with Merrill Lynch International on February 15, 2008 for our shares up to a value of US\$250.0 million, effective concurrently with the offering of the Convertible Bonds on February 22, 2008. Under the Equity Swap, we will receive, upon termination of the Equity Swap, a payment from Merrill Lynch International if the final price is higher than the initial price (as determined by a formula set forth in the equity swap contract). If the final price is lower than the initial price, we will make a payment to Merrill Lynch International. The termination date of the Equity Swap will be

in 2013 or on the Optional Early Termination Date as defined therein (triggered when a holder of Convertible Bonds exercises its conversion right, put option right or the Convertible Bonds become repayable prior to their maturity date other than by reason of the put option right or exercise of a conversion right). The final price will be determined with reference to the arithmetic mean of the relevant prices of our shares on specified averaging dates upon termination of the Equity Swap. As at the termination date of the Equity Swap, the maximum loss caused by the Equity Swap due to a decrease in our share price will not exceed US\$250.0 million. We are required by HKFRS to make fair value assessment on the Equity Swap at each balance sheet date. In general, a fair value gain or loss, respectively, will be recognized if our share price on the current balance sheet date is higher or lower than the initial price (for recognition in the year ended December 31, 2008) or the share price on the last balance sheet date (for recognition in subsequent periods). For the six months ended June 30, 2008, we recorded a fair value loss on the Equity Swap of RMB442.8 million due to a decrease in our share price during the period. We had a fair value gain on the Equity Swap of RMB431.8 million for the six months ended June 30, 2009 as a result of an increase in our share price during the period.

Income tax expense

Enterprise Income Tax. Income tax expense represents PRC enterprise income tax accrued by our operating subsidiaries and starting from fiscal year 2007, provision for LAT. We are an exempted company in the Cayman Islands, and are not subject to Cayman Islands income tax. Our BVI companies holding our PRC subsidiaries are also not subject to BVI income tax. Our PRC subsidiaries were subject to enterprise income tax at a rate of 33% prior to January 1, 2008 (consisting of 30% income tax for foreign-invested enterprises and 3% local income tax). In August 2006, upon the conversion of Giant Leap Construction Co., one of our PRC subsidiaries, to a foreign investment enterprise, the local tax authority granted it a tax holiday (which exempts corporate income tax for two years followed by a tax reduction of 50% for the subsequent three years), commencing from 2006, the first cumulative profit-making year, net of losses carried forward. Although on March 16, 2007, the National People's Congress enacted the EIT Law under which a uniform income tax rate of 25% is imposed on the taxable income of both domestic enterprises and foreign-invested enterprises, and the original tax privilege available to foreign-invested enterprises is cancelled, Giant Leap Construction Co. is able to continue to enjoy its tax holiday until the earlier of the expiration of the tax holiday as originally provided or the end of the five-year transitional period provided by the EIT Law, commencing from January 1, 2008.

Pursuant to the EIT Law, which became effective on January 1, 2008, dividends distributed by our PRC subsidiaries to us or our non-PRC subsidiaries are subject to a withholding tax of 5% for enterprises incorporated in Hong Kong and 10% for enterprises incorporated outside of Hong Kong if we or our non-PRC subsidiaries, as the case may be, are deemed as a "non-resident enterprise".

LAT. The LAT expense recorded in our income statement for any given period represents the provision and payment for LAT with respect to the recognized revenue in that period. We recorded LAT expense under "cost of sales" for accounting periods prior to fiscal year 2007 and have started to record LAT expense under "income tax expenses" in our income statement for the year ended December 31, 2007. Our income tax expenses will therefore be affected by our LAT expense starting from such period. The lower effective tax rate recorded in 2006 was primarily due to a one-time deferred tax credit written back upon the grant of tax holiday to Giant Leap Construction Co. in 2006. After Giant Leap Construction Co.'s tax holiday expires, our effective income tax rate may increase, although this may be partially offset by the effect of lower enterprise income tax rate of 25% under the EIT law.

Under PRC laws and regulations, our PRC subsidiaries engaging in property development are subject to LAT, which is collected by the local tax authorities. All income from the sale or transfer of state-owned land use rights, buildings and their attached facilities in the PRC is subject to LAT at progressive rates ranging from 30% to 60% of the appreciation value as defined in the relevant tax laws, with certain exemptions available for the sale of ordinary standard residential houses if the appreciation value does not exceed 20% of the total deductible items as defined in the relevant tax laws. See “Regulation—Legal supervision relating to property sector in the PRC—Major taxes applicable to property developers—(c) Land appreciation tax”. Sales of commercial properties are not eligible for this exemption. Whether a property qualifies for the ordinary standard residential houses exemption is determined by the local government taking into consideration the property’s plot ratio, aggregate GFA and sales price. Sales of properties with higher appreciation values are generally subject to higher LAT rates. On December 28, 2006, the State Administration of Taxation issued the Notice on the Administration of the Settlement of Land Appreciation Tax of Property Development Enterprises (關於房地產開發企業土地增值稅清算管理有關問題的通知) which came into effect on February 1, 2007. Such notice provides further clarifications as to the settlement of LAT. Local provincial tax authorities can formulate their own implementation rules according to the notice and local situations. We estimate and make provisions for the full amount of applicable LAT in accordance with the requirements set forth in the relevant PRC tax laws and regulations, but only pay a portion of such provisions each year as required by the local tax authorities under prevailing practice. We recorded LAT provision under “cost of sale” for accounting periods prior to fiscal year 2007 and have started to record LAT provision under “income tax expenses” in our income statement for the year ended December 31, 2007.

Our LAT expense for 2006, 2007 and 2008 and the six months ended June 30, 2008 and 2009 was RMB373.9 million, RMB1,155.4 million, RMB875.9 million, RMB665.2 million and RMB154.4 million, respectively. Our LAT provision balance as of June 30, 2009 was RMB1,564.4 million. The significant increase in LAT expense in 2007 compared to 2006 was primarily due to increases in revenue and the recognized average selling price of our properties. Our LAT expense decreased significantly in the second half of 2008 and the first half of 2009 as we adjusted our product offerings according to market changes. We offered and sold more small apartment units with lower profit margin than townhouses and luxury apartments with higher profit margin since 2008 to cater to market demand.

Our effective income tax rate was 7.9% (excluding LAT expense) or 23.7% (including LAT expense) in 2006, 38.3% in 2007, 56.6% in 2008 and 25.8% for the six months ended June 30, 2009. The lower effective tax rate for 2006 was primarily due to a one-time deferred tax credit written back upon the grant of tax holiday to Giant Leap Construction Co. in 2006. Increases in LAT expense in 2007 and 2008 contributed to the increases in effective income tax rate for these periods. The increase in effective income tax rate in 2008 was also partially due to expenses incurred outside the PRC, such as the interest and other expenses incurred on the Convertible Bonds, which were not deductible for purposes of PRC income tax.

Minority interests

Minority interests represent our profits or losses after taxation that are attributable to minority shareholders of our non-wholly-owned subsidiaries during the three years ended December 31, 2006, 2007 and 2008 and the six months ended June 30, 2009.

Key factors affecting our performance

Our business, financial condition and results of operations are affected by a number of factors, many of which are beyond our control, including those set out below.

Economic growth, speed of urbanization and demand for residential properties in China

Economic growth, urbanization and rising standards of living in China have been the main driving forces behind the increasing market demand for residential properties. Since the second half of 2008, the global economic slowdown and turmoil in financial markets have resulted in adverse impact on the overall economy of China, including the PRC property market, from which we derive our entire revenue. The economic conditions and volatility of the property prices may continue to impact our business and results of operations. At the current stage of the PRC's economic development, while the property industry is regarded by the PRC government as one of China's pillar industries, the property industry is significantly dependent on the overall economic growth and the resulting consumer demand for residential properties. Developments in the private sector, urbanization and the resulting demand for residential properties in China have in the past increased the sales of our properties. These factors will continue to have a significant impact on our results of operations.

Regulatory measures in the property industry in China

PRC government policies and measures on property development and related industries have a direct impact on our business and results of operations. From time to time, the PRC government adjusts its macroeconomic control policies to encourage or restrict development in the private property sector through measures relating to, among other things, land grants, pre-sales of properties, bank financing and taxation. Prior to the second half of 2008, the PRC government took various measures to control money supply, credit availability and fixed assets investment with a view to preventing China's economy from overheating and to achieve more balanced and sustainable economic growth. Since the second half of 2008, in view of the economic downturn, the PRC government has adopted measures to encourage consumption in the residential property market and support to property developers. PRC regulatory measures in the property industry will continue to impact our business and results of operations. See "Risk Factors—Risk relating to the property sector in the PRC—The property industry in the PRC is subject to government regulations and policies, which could have the effect of slowing down the industry's growth", "Industry Overview—The Property Industry in the PRC—Property Reforms" and "Regulation" for more details.

We are also highly susceptible to any regulations or measures adopted by the PBOC that may restrict bank lending to enterprises, particularly to property developers. Moreover, a substantial portion of our purchasers depend on mortgage financing to purchase our properties. Regulations or measures adopted by the PRC government that are intended to restrict the ability of purchasers to obtain mortgages or that increase the costs of mortgage financing may decrease market demand for our properties and adversely affect our sales revenue.

Ability to acquire suitable land

Our continuing growth will depend in large part on our ability to acquire quality land at prices that can yield reasonable returns. Based on our current development plans, we believe we have

sufficient land reserves for property developments for the next two to four years. As the PRC economy continues to grow at a relatively high speed and demand for residential properties remains relatively strong, we expect that competition among developers for land reserves that are suitable for property development will intensify. In addition, the public tender, auction and listing-for-sale practice in respect of the grant of state-owned land use rights is also likely to increase competition for land development and to increase land acquisition costs.

Pre-sales

Pre-sales constitute the most important source of our operating cash inflow during our project development process. PRC law allows us to pre-sell properties before their completion upon satisfaction of certain requirements and requires us to use the pre-sales proceeds to develop the projects pre-sold. The amount and timing of cash inflows from pre-sales are affected by a number of factors, including timing and other restrictions on pre-sales imposed by the PRC government, market demand for our properties subject to pre-sales and the number of properties we have available for pre-sale. Reduced cash flow from pre-sales of our properties will increase our reliance on external financing and will impact our ability to finance our continuing property developments.

Access to and cost of financing

Bank borrowing is another important source of funding for our property developments. As of December 31, 2006, 2007 and 2008 and June 30, 2009, our outstanding bank borrowings amounted to RMB4,081.3 million, RMB6,991.8 million, RMB7,826.3 million, RMB10,828.1 million, respectively. As commercial banks in China link the interest rates on their bank loans to benchmark lending rates published by PBOC, any increase in such benchmark lending rates will increase the interest costs related to our developments. Our access to capital and cost of financing are also affected by restrictions imposed from time to time by the PRC government on bank lending for property development.

We have also sought financing in the international capital markets through our offering of Convertible Bonds in February 2008, which give us a longer maturity term but bear higher interest rates than bank borrowings.

Timing of property development

The number of property developments that a developer can undertake during any particular period is limited due to the substantial amount of capital required for land acquisitions and construction costs as well as limited land supply. Property developments may take many months, or possibly years, before any pre-sale occurs. While pre-sales generate positive cash flow for us, no sales revenue is recognized in respect of such presold properties until development and the property is delivered to the purchaser. As market demand is not stable, sales revenue in a particular period depends on our ability to gauge the expected demand in the market at the launch time for completion of a particular project. As a result, our results of operations have fluctuated in the past and are likely to continue to fluctuate in the future.

Price volatility of construction materials

Our results of operations are affected by price volatility of construction materials such as steel and cement. The cost of construction materials constitutes the most important item in our

construction costs. While we use a centralized procurement to lower our purchase costs, any increase the cost in construction materials will increase our construction costs. If we cannot pass the increased costs on to our customers, our profitability will suffer.

Changes in product mix

The prices and gross profit margins of our products vary by the types of properties we develop and sell. Our gross profit margin is affected by the proportion of sales revenue attributable to our higher gross margin products compared to sales revenue attributable to lower gross margin products. Typically, our low-density units and larger apartments have commanded higher selling prices and gross profit margins than smaller apartment units. Historically, a substantial portion of the projects we have developed have had low plot ratios, permitting us to increase our sales of low density units and larger apartments. More recently, we have begun acquiring land with higher plot ratios, which will require us to increase the proportion of smaller apartments that we develop and sell. We believe that we have a diversified product portfolio, and we are currently developing strategies to address changes in product mix that may result from such higher plot ratios. If we are unable to successfully develop such strategies, our profit margins may decline as the proportion of our sales comprising smaller apartments increases.

LAT

Our property developments are subject to LAT with respect to the appreciated value of the related land and improvements on such land. LAT applies to both domestic and foreign investors of property in China, irrespective of whether they are corporate entities or individual investors. Our LAT expense for each of the three years ended December 31, 2006, 2007 and 2008 and the six months ended June 30, 2009 was RMB373.9 million, RMB1,155.4 million, RMB875.9 million and RMB154.4 million, respectively. As of June 30, 2009, our LAT provision balance was RMB1,564.4 million. We prepay LAT with reference to our pre-sales proceeds and the tax rates set out by local tax authorities. See "Risk Factors—Risks relating to our business—The relevant PRC tax authorities may challenge the basis on which we calculate our LAT obligations", "—Certain income statement items—Cost of Sales" and "—Certain income statement items—Income Tax Expense".

Interim fluctuation of results of operations

Our results of operations tend to fluctuate from period to period. The number of properties that we can develop or complete during any particular period is limited due to the substantial amount of capital required for land acquisition, demolition, resettlement and construction, limited land supplies and lengthy development periods before positive cash flows may be generated. In addition, in recent years, we began to develop larger-scale property developments and, as a result, we develop properties in multiple phases over the course of several years. Typically, the selling prices of properties in such larger-scale property developments tend to increase as the overall development comes closer to completion, thus offering a more established residential community to the purchasers. Seasonal variations, as we disclosed in "Risk Factors—Risks Relating to Our Business—We face risks relating to fluctuations of results of operations from period to period", have in addition caused fluctuations in our interim revenue and profits, including quarterly and semi-annual results. As a result, our results of operations fluctuate and our interim results do not proportionally reflect our annual results.

Critical accounting policies

Revenue Recognition. Revenue comprises primarily the proceeds from property development, construction, decoration, property management and hotel operation after the elimination of intra-group transactions. Revenue from property sales is recognized when the construction has been completed and the properties have been delivered to the purchasers with the collectibility of related receivables reasonably assured. Deposits and installments received on properties sold prior to the date of revenue recognition are included in our consolidated balance sheets as advanced proceeds received from customers under current liabilities. Revenue arising from construction services is recognized in the accounting period in which the services are rendered by reference to completion of the specific transaction assessed on the basis of the actual service provided as a proportion of the total services to be provided. Revenues arising from decoration service, hotel operation and property management are recognized in the accounting period in which the services are rendered.

Land Use Rights Cost. Land use rights cost typically comprises payments to government authorities for obtaining the right to occupy, use and develop land, certain fees for altering the intended use of land and resettlement costs. We recognize amortization charges for land use rights on a straight-line basis over the unexpired period of such rights and the remaining carrying amount is recognized as cost of sales when the relevant properties are sold. Land use rights for which we have obtained the land use rights certificates are recorded as "land use rights" on our consolidated balance sheet, and those for which we have obtained the construction permits are recorded under "current assets" and the remainder are recorded under non-current assets. If we have not obtained the land use rights certificates for a piece of land in which we have contractual interest, the cost incurred in relation to such land is recorded as "prepayment" under "trade and other receivables".

Properties under Development and Completed Properties Held for Sale. Properties under development which have either been pre-sold or which are intended for sale and are expected to be completed within a normal operating cycle are classified as current assets. Properties under development are stated at the lower of cost and net realizable value. Net realizable value for our properties under development is determined by reference to management estimates of the selling price based on prevailing market conditions, less applicable variable selling expenses and the anticipated costs to completion.

Completed properties remaining unsold at the end of each financial period are stated at the lower of cost and net realizable value. Net realizable value for our completed properties held for sale is determined by reference to management estimates of the selling price based on prevailing market conditions, less applicable variable selling expenses.

We are required to revise these estimates if there is a change in market condition or demand. If actual market conditions are less favorable than those projected by our management, additional adjustments to the value of properties under development may be required.

In preparing our consolidated financial statements, we made certain estimates and assumptions about future events based on our experience. The resulting accounting estimates will, by definition, seldom equal the actual results. The estimates and assumptions that may have a significant effect on the carrying amounts of assets and liabilities mainly include those related to property development activities.

Results of operations

The following table sets forth, for the periods indicated, certain items derived from our consolidated income statements.

Summary consolidated income statement information

| (in millions, except percentages) | For the year ended December 31, | | | | For the six months ended June 30, | | |
|--|---------------------------------|----------------------------|----------------------------|----------------|-----------------------------------|------------------------------|----------------|

Six months ended June 30, 2009 compared to six months ended June 30, 2008

Revenue. Our revenue increased by 23.7% to RMB9,202.8 million in the first half of 2009 from RMB7,438.1 million for the corresponding period in 2008, primarily attributable to the increase in revenue from property development.

- **Property Development.** Revenue generated from property development increased by 24.8% to RMB8,648.3 million for the six months ended June 30, 2009 from RMB6,932.4 million for the corresponding period in 2008, primarily attributable to a 100.9% increase in total GFA sold to approximately 1,738,758 sq.m. in the first half of 2009 from approximately 865,360 sq.m. for the corresponding period in 2008, partially offset by a decrease in the recognized average selling price of property from approximately RMB8,012 per sq.m. in the first half of 2008 to approximately RMB4,973 per sq.m. in the first half of 2009. During the six months ended June 30, 2009, we adjusted our product offerings and sold more small apartment units with lower profit margin than townhouses and luxury apartments, resulting in the significant decrease in the recognized average selling price of property.

The following table sets forth the revenue generated from each project and the percentage of the total revenue it represented in the six months ended June 30, 2009 and 2008, respectively.

| Property Development | For the six months ended June 30, | | | |
|---|-----------------------------------|-------------------------------|--------------------|-------------------------------|
| | 2009 | | 2008 | |
| | Revenue RMB'000 | Percentage of Revenue % | Revenue RMB'000 | Percentage of Revenue % |
| Huanan Country Garden—Phase One to Five and Phase Seven | 21,206 | 0.2 | 146,868 | 2.1 |
| Huanan Country Garden—Phase Six | - | - | 376,750 | 5.4 |
| Country Garden Phoenix City | 2,531,138 | 29.2 | 1,766,946 | 25.4 |

| Country Garden-Lakeside City | 262,205 | 3.0 | - | - |
| Taizhou Country Garden | 181,557 | 2.1 | - | - |
| Wuhan Country Garden | 140,595 | 1.6 | - | - |
| Country Garden-Sun Palace | 140,941 | 1.6 | - | - |
| Changshou Country Garden | 151,848 | 1.8 | - | - |
| Zhaoqing Country Garden | 291,827 | 3.4 | 242,130 | 3.5 |
| Taishan Country Garden | 149,967 | 1.7 | 191,545 | 2.8 |
| Shaoguan Country Garden | 165,649 | 1.9 | 125,581 | 1.8 |
| Xianning Country Garden | 121,374 | 1.4 | - | - |
| Others | 226,193 | 2.7 | 3,779 | 0.1 |
| Total | 8,648,349 | 100 | 6,932,444 | 100.0 |

- **Construction and Decoration.** Revenue generated from construction and decoration increased by 7.6% to RMB258.2 million for the six months ended June 30, 2009 from RMB239.9 million for the corresponding period in 2008, primarily attributable to an increase in the volume of construction and decoration services rendered to Qingyuan Country Garden Property Development Co., Ltd., a related party of us. See “Related party transactions—Construction and decoration services” for more details.

- **Property Management.** Revenue generated from property management increased by 15.1% to RMB162.0 million for the six months ended June 30, 2009 from RMB140.8 million for the corresponding period in 2008, primarily attributable to an increase in the cumulative GFA under management resulting from construction, completion and delivery of properties such as Country Garden Phoenix City, Wuyi Country Garden, Shaoguan Country Garden and Heshan Country Garden in the second half of 2008 and first half of 2009.
- **Hotel Operation.** Revenue generated from hotel operation increased by 7.4% to RMB134.3 million for the six months ended June 30, 2009 from RMB125.0 million for the corresponding period in 2008, primarily attributable to the opening of two five-star standard hotels including Xinhui Country Garden Phoenix Hotel and Zhaoqing Country Garden Phoenix Hotel during the period.

Cost of Sales. Cost of sales increased by 77.7% to RMB6,276.0 million for the six months ended June 30, 2009 from RMB3,530.9 million for the corresponding period in 2008, mainly due to increase in construction, decoration and design costs, which was in line with the increase in the total GFA sold.

Gross Profit. Gross profit decreased by 25.1% to RMB2,926.8 million for the six months ended June 30, 2009 from RMB3,907.2 million for the corresponding period in 2008. Our gross profit margin for the six months ended June 30, 2009 decreased to 31.8% from 52.5% for the corresponding period in 2008. Our gross profit and gross profit margin decreased as we adjusted our product offerings and sold more small apartment units with lower profit margin in response to changing market demand.

Other Gains-net. Other gains-net decreased by 67.9% to RMB12.5 million of gain for the six months ended June 30, 2009 from RMB39.0 million of gain for the corresponding period in 2008, primarily due to a 68.1% decrease in return from the equity swap we entered into in connection with the Convertible Bonds from RMB27.0 million to RMB8.6 million during the period.

Selling and Marketing Costs. Selling and marketing costs decreased by 51.2% to RMB106.7 million for the six months ended June 30, 2009 from RMB218.6 million for the corresponding period in 2008, primarily attributable to a 76.3% decrease in advertisement expense from RMB100.2 million in the first half of 2008 to RMB23.7 million for the corresponding period in 2009. In 2008, we launched 23 new projects, 20 of which were located in new markets outside Guangdong Province. Although most of these new projects were launched in the second half of 2008, we incurred large amount of advertisement expense in the first half of 2008 to build up our brand name and establish our presence in the new markets and to promote the projects that we planned to launch. We did not have to spend as much on advertisement in the first half of 2009 as we capitalized on the brand name we established in 2008 and launched only one new project due to market conditions.

Administrative Expenses. Administrative expenses decreased by 29.3% to RMB393.7 million for the six months ended June 30, 2009 from RMB556.6 million for the corresponding period in 2008, primarily attributable to (i) a decrease in salary expense by 26.7% from RMB153.3 million for the first half of 2008 to RMB112.3 million for the corresponding period in 2009 and (ii) a decrease in donation expense by 96.7% from RMB70.0 million for the six months ended June 30, 2008 to RMB2.3 million for the corresponding period in 2009. Our salary expense decreased as we reduced our headcount as part of our overall cost reduction measures from approximately 30,600

as of June 30, 2008 to approximately 25,200 as of June 30, 2009. In the second half of 2009, we adopted a flexible work schedule for our employees, which also contributed to the decrease in salary expense.

Finance Costs—net. Finance costs-net decreased by 29.6% to RMB390.0 million for the six months ended June 30, 2009 from RMB554.1 million for the corresponding period in 2008, primarily attributable to (i) a decrease in interest expense and exchange loss from RMB593.3 million for the six months ended June 30, 2008 to RMB409.9 million for the corresponding period in 2009 as a result of the decrease in bank loan interest rates since the second half of 2008 and (ii) capitalization of borrowing costs of RMB69.2 million directly attributable to the acquisition, construction or production of our assets since January 1, 2009 pursuant to the revised HKAS 23. We recorded such capitalized borrowing costs as properties under development in our balance sheet as of June 30, 2009.

Fair Value Changes on Derivative Financial Instruments. On February 15, 2008, we entered into a cash settled equity swap transaction with Merrill Lynch International for our shares up to a value of US\$250.0 million (equivalent to approximately HK\$1,950.0 million). See “—Liquidity and capital resources—Restricted Cash” for more details. Based on the market price on June 30, 2009, the fair value gain on the equity swap increased our profit for the period by RMB431.8 million. The fair value loss for the corresponding period in 2008 was RMB442.8 million.

Profit for the period. Profit for the period increased by 72.8% to RMB1,841.6 million for the six months ended June 30, 2009 from RMB1,066.0 million for the corresponding period in 2008. Our net profit margin increased to 20% for the six months period ended June 30, 2009 from 14.3% for the corresponding period in 2008, as a result of the cumulative effects of the foregoing factors.

Minority Interests. Profits attributable to minority shareholders of our subsidiaries decreased to RMB25.3 million for the six months period ended June 30, 2009 from RMB50.2 million for the corresponding period in 2008, as a result of decreased profits from projects in which minority shareholders held an interest.

2008 compared to 2007

Revenue. Our revenue decreased by 11.4% to RMB15,712.8 million in 2008 from RMB17,735.0 million in 2007, primarily attributable to the decrease in revenue from property development by 11.6% and revenue from construction and decoration by 35.3% compared to 2007.

- **Property Development.** Revenue generated from property development decreased by 11.6% to RMB14,736.5 million in 2008 from RMB16,666.9 million in 2007, primarily attributable to an 17.8% decrease in total GFA sold to 2,147,592 sq.m. in 2008 from 2,611,315 sq.m. in 2007, partially offset by an increase in the recognized average selling price of property from RMB6,359 per sq.m. in 2007 to RMB6,861 per sq.m. in 2008. In the second half of 2007, we focused on the development of high margin products including townhouses and luxury apartments and pre-sold properties at relatively high selling prices due to the strong market demand then. We recognized revenue from sales of such pre-sold properties in 2008, resulting in a relatively high average selling price of property in 2008.

The following table sets forth the revenue generated from each project and the percentage of the total revenue it represented in 2008 and 2007, respectively.

| Property Development | Year ended December 31, | | | |
|---|-------------------------|-----------------------|-------------------|-----------------------|
| | 2008 | | 2007 | |
| | Revenue | Percentage of Revenue | Revenue | Percentage of Revenue |

| Holiday Islands—Huadu | 50,481 | 0.3 | 674,535 | 4.0 |
| Peninsula Country Garden | - | 0.0 | 637,398 | 3.8 |
| Others | 99,760 | 0.7 | 5,290 | 0.0 |
| Total | 14,736,509 | 100.0 | 16,666,941 | 100.0 |

- **Construction and Decoration.** Revenue generated from construction and decoration decreased by 35.3% to RMB408.5 million in 2008 from RMB631.1 million in 2007, primarily attributable to a decrease in the volume of construction and decoration services rendered to Qingyuan Country Garden Property Development Co., Ltd., a related party of us. See “Related party transactions—Construction and decoration services” for more details.

- **Property Management.** Revenue generated from property management increased by 32.3% to RMB293.3 million in 2008 from RMB221.7 million in 2007, primarily attributable to an increase in the cumulative GFA under management resulting from the construction completion and delivery of properties such as Changsha Country Garden, Country Garden Phoenix City and Shunde Country Garden.

- **Hotel Operation.** Revenue generated from hotel operation increased by 27.5% to RMB274.5 million in 2008 from RMB215.3 million in 2007, primarily attributable to the

steady increase in revenues of Yangjiang Country Garden Phoenix Hotel, Changsha Venice Hotel and Taishan Country Garden Phoenix Hotel opening respectively in May, October and December 2007.

Cost of Sales. Cost of sales decreased by 9.1% to RMB8,687.2 million in 2008 from RMB9,560.9 million in 2007, in line with the decrease in the total GFA sold.

Gross Profit. Gross profit decreased by 14.1% to RMB7,025.6 million in 2008 from RMB8,174.1 million in 2007, in line with the decrease in our revenue and primarily attributable to the decrease in the total GFA sold. Our gross profit margin for 2008 decreased to 44.7% from 46.1% in 2007, primarily attributable to the decrease in the gross profit margins of construction and decoration and hotel operation by 9.0%. Our gross profit margin of construction and decoration decreased primarily due to the increase in costs of raw materials in 2008. We opened Changsha Venice Palace Hotel and Taishan Country Garden Phoenix Hotel in October 2007 and November 2007, respectively. At the initial stage, these two hotels generated less profit, resulting in the reduction of our gross profit margin of hotel operation in 2008.

Other Gains-net. Other gains-net increased by 48.0% to RMB51.2 million of gain in 2008 from RMB34.6 million of gain in 2007, primarily due to the return on the equity swap transactions that we entered into in 2008 in connection with the Convertible Bonds.

Selling and Marketing Costs. Selling and marketing costs increased by 70.2% to RMB528.9 million in 2008 from RMB310.8 million in 2007, primarily attributable to heavy publicity of 23 new properties for sale in 2008, as a result of which, our advertisement expenses increased by 51.6% to RMB234.9 million in 2008 from RMB154.9 million in 2007. In addition, pre-sale of new property (including Country Garden Phoenix City (Shenyang), Country Garden-Galaxy Palace and Shenyang Country Garden) in 2008 also gave rise to the higher selling and marketing costs for the year.

Administrative Expenses. Administrative expenses increased by 12.1% to RMB1,046.0 million in 2008 from RMB933.2 million in 2007, primarily attributable to the recruitment of a large number of staff, which had been employed to facilitate our rapid development, in particular, our expansion outside Guangdong Province during the year. Consequently, our salary expense increased substantially by 28.5% to RMB340.2 million in 2008 from RMB264.8 million in 2007. As a result of our expansion, office expense and depreciation expense also increased by 100.8% and 25.1% to RMB28.3 million and RMB40.1 million, respectively. In addition, the land use rights amortization expense increased by 89.1% to RMB160.4 million in 2008 compared to RMB84.8 million 2007 due to the large amount of land bank we held. Our donation to charities for Sichuan Earthquake Relief and others amounted to RMB81.3 million in 2008.

Finance Costs—net. Finance costs-net increased by 549.6% to RMB999.1 million in 2008 from RMB153.8 million in 2007, primarily attributable to the decrease in our interest income from RMB425.4 million in 2007 to RMB74.8 million in 2008. We had interest income of RMB270.0 million in 2007 from the application monies of subscription of our IPO shares in 2007, which was not recurrent in 2008.

In addition, finance costs increased to RMB1,073.8 million in 2008 from RMB579.2 million due to the increase in the total interest expenses resulting from the increased bank loan interest rates during the period between January 1, 2007 and September 15, 2008. Although the bank loan interest rate has decreased gradually since September 16, 2008, our weighted average bank loan interest rate remained high. Moreover, we issued the Convertible Bonds with a principal amount

of US\$600.0 million (equivalent to approximately RMB4,314.0 million) in the first half of 2008, for which interest expense was calculated using effective interest rate method. The effective annual interest rate of the liability component was 9.24% and the interest expenses for 2008 was RMB291.1 million.

Fair Value Changes on Derivative Financial Instruments. On February 15, 2008, we entered into a cash settled equity swap transaction with Merrill Lynch International for our shares up to a value of US\$250.0 million (equivalent to approximately HK\$1,950.0 million). See “—Liquidity and capital resources—Restricted cash” for more details. Based on the market price on December 31, 2008, the fair value change on the Equity Swap reduced our profit for the period by RMB1,241.5 million.

Profit for the Year. Profit for the year decreased by 66.3% to RMB1,415.0 million in 2008 from RMB4,203.7 million in 2007. Our net profit margin decreased to 9.0% in 2008 from 23.7% in 2007, as a result of the cumulative effects of the foregoing factors.

Minority Interests. Profits attributable to minority shareholders of our subsidiaries decreased to RMB36.8 million in 2008 from RMB67.8 million in 2007, as a result of decreased profits from projects in which minority shareholders held an interest.

2007 compared to 2006

Revenue. Our revenue increased by 123.3% to RMB17,735.0 million in 2007 from RMB7,940.9 million in 2006, primarily attributable to the increase in revenue from property development by 139.4% compared to 2006.

- **Property Development.** Revenue generated from property development increased by 139.4% to RMB16,666.9 million in 2007 from RMB6,961.4 million in 2006, primarily attributable to an approximately 98.1% increase in total GFA of residential properties sold to approximately 2,611,315 sq.m. in 2007 from approximately 1,318,397 sq.m. in 2006. The recognized average selling price increased by 20.4% to RMB6,359 per sq.m. in 2007 from RMB5,280 per sq.m. in 2006.

Our total GFA sold increased in 2007 as compared to 2006 as we developed, sold and delivered more projects in 2007. Our recognized average selling price increased in 2007 compared to 2006 as we capitalized on our brand name recognition and sold more products with high profit margins.

The following table sets forth the revenue generated from each project and the percentage of the total revenue it represented in 2007 and 2006, respectively.

| Project | 2007 | | 2006 | |
|--|----------------------------------|-------------------------------|----------------------------------|-------------------------------|
| | Revenue (RMB in thousands) | Percentage of revenue % | Revenue (RMB in thousands) | Percentage of revenue % |
| Huanan Country Garden—Phase One to Five and Phase Seven | 1,031,987 | 6.2 | 3,912 | 0.1 |
| Huanan Country Garden—Phase Six | 604,081 | 3.6 | 1,404,084 | 20.2 |

| Peninsula Country Garden | 637,398 | 3.8 | 609,725 | 8.7 |
| Jun'an Country Garden | 193,679 | 1.2 | 4,006 | 0.1 |
| Gaoming Country Garden | 58,484 | 0.4 | 420,057 | 6.0 |
| Wuyi Country Garden | 856,653 | 5.1 | 428,933 | 6.2 |
| Heshan Country Garden | 1,098,721 | 6.6 | 332,672 | 4.8 |
| Yangdong Country Garden | 679,566 | 4.1 | 144,513 | 2.1 |
| Chencun Country Garden ⁽¹⁾ | - | - | 3,369 | - |
| Shanghai Moon River ⁽¹⁾ | - | - | 125,777 | 1.8 |
| Nanhai Country Garden | 2,128,687 | 12.8 | - | - |
| Taishan Country Garden | 412,667 | 2.5 | - | - |
| Xinhui Country Garden | 555,888 | 3.3 | - | - |
| Changsha Country Garden | 1,151,384 | 6.9 | - | - |
| Zhaoqing Country Garden | 167,072 | 1.0 | - | - |
| Total | 16,666,941 | 100.0 | 6,961,365 | 100.0 |

Note:

(1) Chencun Country Garden and Shanghai Moon River have been transferred to independent third parties in May 2006 and June 2006, respectively.

- **Construction and Decoration.** Revenue generated from our construction and decoration increased by 13.5% to RMB631.1 million in 2007 from RMB556.1 million in 2006, primarily attributable to an increase in the volume of construction and decoration services rendered to Qingyuan Country Garden, a related company. See “Related party transaction—Construction and decoration services” for more details.
- **Property Management.** Revenue generated from our property management increased by 30.1% to RMB221.7 million in 2007 from RMB170.4 million in 2006, primarily attributable to an increase in the cumulative GFA under our management resulting from the construction completion and delivery of properties such as Nanhai Country Garden, Shunde Country Garden and Country Garden Phoenix City.

- **Hotel Operation.** Revenue generated from our hotel operation increased by 11.0% to RMB215.3 million in 2007 from RMB194.0 million in 2006, primarily attributable to the steady increase in revenues of Heshan Country Garden Phoenix City Hotel and Jiangmen Wuyi Country Garden Phoenix City Hotel, the formal award of Qingyuan Country Garden Holiday Islands Hotel with a five-star rating on May 14, 2007 and the formal opening of Yangjiang Country Garden Phoenix Hotel, Taishan Country Garden Phoenix Hotel and Changsha Venice Palace Hotel (which were constructed in accordance with five-star rating standards) in May 2007, November 2007 and November 2007, respectively.

Cost of Sales. Cost of sales increased by 94.2% to RMB9,560.9 million in 2007 from RMB4,922.5 million in 2006, in line with the increase in aggregate GFA of the residential properties sold.

Gross Profit. Gross profit increased by 170.8% to RMB8,174.1 million in 2007 from RMB3,018.4 million in 2006, primarily attributable to the significant increase of the total GFA of the properties we sold. Our gross profit margin (after LAT) increased to 39.6% from 33.3%, primarily attributable to the greater increase in recognized average selling price of the properties sold relative to the increase in cost of sales.

Other Gains-net. Other gains-net decreased by 10.8% to RMB34.6 million of gain in 2007 from RMB38.8 million of gain in 2006.

Selling and Marketing Costs. Our selling and marketing costs increased by 44.9% to RMB310.8 million in 2007 from RMB214.5 million in 2006, primarily attributable to an increase in advertising expenses of 85.1% to RMB154.9 million in 2007 from RMB83.7 million in 2006 mainly as a result of our increased brand building efforts in anticipation of and following our IPO in April 2007. In addition, pre-sale of new properties such as Zengcheng Country Garden, Huanan Country Garden, Shaoguan Country Garden and Heshan Country Garden also contributed to the higher selling and marketing costs in 2007.

Administrative Expenses. Administrative expenses increased by 129.1% to RMB933.2 million in 2007 from RMB407.4 million in 2006, primarily attributable to the recruitment of a large number of staff in 2007 to satisfy the staffing requirement following our IPO and to support our rapid business growth, as a result of which, salary paid to our employees increased substantially by 72.1% to RMB264.8 million in 2007 from RMB153.9 million in 2006. In addition, the number of our projects increased from 23 at the end of 2006 to 45 at the end of 2007, which also contributed to the increase in administrative expenses in 2007.

Finance Costs—net. Finance costs-net decreased by 37.1% to RMB153.8 million in 2007 from RMB244.6 million in 2006, primarily attributable to an increase in interest income of RMB425.4 million mainly arising from the application monies of RMB270.0 million for share subscriptions received in connection with our IPO in April 2007. The decrease of finance costs-net was partially offset by (i) net foreign exchange loss of RMB295.6 million, mainly representing exchange losses on the H.K. dollar-denominated proceeds received from our IPO in April 2007 pending conversion into Renminbi as a result of the appreciation of Renminbi against foreign currencies in 2007, and (ii) an increase of 7.1% in interest expenses mainly resulting from increases in benchmark interest rates by the PBOC in 2007.

Income Tax Expense. Income tax expenses increased by 403.1% to RMB2,607.2 million in 2007 from RMB518.2 million in 2006. Our effective income tax rate increased to 38.2% in 2007 from 23.6% in 2006. The increases in income tax expense and effective income tax rate was primarily due to an increase of 209.0% in LAT expense in part due to an increase in recognized average

selling price of our properties, which resulted in a higher appreciation amount for purposes of calculating LAT. The relative low income tax expense and effective income tax rate in 2006 was in part due to a one-time deferred tax credit written back upon the grant of tax holiday to Giant Leap Construction Co., in the amount of RMB396.1 million, in 2006.

Profit for the year. Profit for the year increased by 151.3% to RMB4,203.7 million in 2007 from RMB1,672.5 million in 2006. Our net profit margin increased to 23.7% in 2007 from 21.1% in 2006, as a result of the cumulative effect of the foregoing factors.

Minority Interests. Profits attributable to minority shareholders of our subsidiaries decreased to RMB67.8 million in 2007 from RMB153.0 million in 2006, primarily due to a decrease of sales of properties in Huanan Country Garden (Phase Six) as most of the properties in the project were completed and delivered in 2006.

Liquidity and capital resources

Cash flows

We operate in a capital intensive industry and have historically financed the development of our projects and other capital expenditures through a combination of internal funds, cash generated from our sales and pre-sale proceeds, borrowings from commercial banks in the PRC and Hong Kong, and proceeds from issuance of debt and equity securities, such as our IPO in April 2007 and Convertible Bonds in February 2008. Our short-term liquidity relates to servicing our debt and funding working capital requirements. Sources of short-term liquidity includes cash balances and receipts from our operations. Our long-term liquidity requirement includes partial funding of our investments in new property projects and repayment of long-term debt under the Convertible Bonds and other long-term credit facilities. Sources of funding for our long-term liquidity requirements include new loans or debt issuance. We hold our cash and cash equivalents primarily in Renminbi, with the remaining in Hong Kong dollars and U.S. dollars.

The following table presents selected cash flow data from our consolidated cash flow statement for each of the three years ended December 31, 2006, 2007 and 2008 and condensed consolidated cash flow statement for the six months ended June 30, 2009.

| (RMB in thousands) | Year ended December 31, | | | Six months |
|---|-------------------------|-------------|-------------|---------------------------------------|
| | 2006 | 2007 | 2008 | ended June 30, 2009 (unaudited) |
| Net cash generated from/(used in) | | | | |
| operating activities | 3,454,941 | (8,421,910) | (6,379,171) | 592,924 |
| Net cash generated from/(used in) investing | | | | |
| activities | 499,486 | (959,224) | (2,038,663) | (174,148) |
| Net cash (used in)/generated from financing | | | | |
| activities | (3,249,445) | 16,630,495 | 3,182,408 | 1,429,967 |
| Cash and cash equivalents at the end of the | | | | |
| year/period | 1,529,689 | 8,483,420 | 3,006,492 | 4,855,235 |

Cash flows from operating activities

Six months ended June 30, 2009. We had net cash inflow from operating activities of approximately RMB592.9 million for the six months ended June 30, 2009, primarily attributable to a decrease in properties under development and completed properties held for sale of RMB868.6 million, partially offset by (i) an increase in trade and other receivables of RMB75.9 million, (ii) an adjustment for non-cash expense line item of fair value gain on derivative financial instruments of RMB431.8 million.

2008. Our net cash outflow from operating activities of RMB6,379.2 million in 2008 was primarily attributable to (i) an increase in properties under development and completed properties held for sale of RMB11,162.0 million, (ii) an increase in land use rights of RMB3,142.3 million, and (iii) an increase in restricted cash of RMB1,714.6 million mainly due to the collateral for Equity Swap of RMB1,708.6 million, partially offset by (i) a decrease in trade and other payables of RMB2,855.7 million, (ii) an increase in advanced proceeds received from customers of RMB1,944.9 million as we pre-sold our projects, (iii) a decrease in trade and other receivables of RMB1,651.4 million, and (iv) an adjustment for income tax expense of RMB1,846.3 million and fair value changes on derivative financial instruments of RMB1,241.5 million, two non-cash expense line items.

2007. Our net cash outflow from operating activities of RMB8,421.9 million in 2007 was primarily attributable to (i) an increase in properties under development and completed properties held for sale of RMB5,130.1 million, (ii) an increase in land use rights of RMB5,555.8 million, and (iii) an increase in trade and other receivables of RMB4,074.9 million, partially offset by (i) an adjustment for income tax expense of RMB2,607.2 million, a non-cash expense line item and (ii) a decrease in trade and other payables of RMB1,504.7 million.

2006. Our net cash inflow from operating activities of RMB3,454.9 million in 2006 was primarily attributable to (i) a decrease in properties under development and completed properties held for sale of RMB1,035.5 million, (ii) an increase in advanced proceeds received from customers as we pre-sold our projects, and (iii) a decrease in trade and other receivables of RMB535.4 million.

Cash flows from investing activities

Six months ended June 30, 2009. We had net cash outflow from investing activities of approximately RMB174.1 million for the six months ended June 30, 2009, primarily attributable to purchases of property, plant and equipment of RMB192.5 million and purchase of intangible assets of RMB2.1 million.

2008. Our net cash outflow from investing activities of RMB2,038.7 million in 2008 was primarily attributable to purchases of property, plant and equipment of RMB1,386.1 million and purchases of land use rights of RMB547.1 million.

2007. Our net cash outflow from investing activities of RMB959.2 million in 2007 was primarily attributable to purchases of property, plant and equipment of RMB806.1 million and acquisition of subsidiaries of RMB550.0 million, partially offset by repayments of cash advances from related parties of RMB363.5 million.

2006. Our net cash inflow from investing activities of RMB499.5 million in 2006 was primarily attributable to repayments of cash advances from related parties, partially offset by purchases of

property, plant and equipment of RMB332.3 million and cash advances made to related parties of RMB247.6 million.

Cash flows from financing activities

Six months ended June 30, 2009. We had net cash inflow from financing activities of approximately RMB1,430.0 million for the six months ended June 30, 2009, primarily attributable to proceeds from new borrowings of RMB3,367.3 million, partially offset by the purchase of treasury shares of RMB1.8 million and repayments of existing loans of RMB1,935.5 million.

2008. Our net cash outflow from financing activities of RMB3,182.4 million in 2008 was primarily attributable to repayment of borrowings of RMB3,988.6 million, dividends paid to our shareholders of RMB1,557.4 million, and purchase of treasury shares of RMB303.0 million, partially offset by proceeds from the issuance of Convertible Bonds of RMB4,206.2 million and proceeds from borrowings of RMB4,823.1 million.

2007. Our net cash inflow from financing activities of RMB16,630.5 million in 2007 was primarily attributable to proceeds from issuance of our shares in the IPO of RMB14,671.2 million and proceeds from borrowings of RMB6,440.0 million, partially offset by repayments of borrowings of RMB3,529.5 million, dividends paid to the then equity holders of RMB512.6 million and share issue cost of RMB446.1 million.

2006. Our net cash outflow from financing activities of RMB3,249.4 million in 2006 was primarily attributable to repayments of borrowings of RMB3,690.1 million, dividends paid to the equity owners of RMB2,513.7 million and repayments of cash advances to related parties of RMB503.3 million, partially offset by proceeds from borrowings of RMB3,436.6 million.

Capital resources

Property developments require substantial capital investment for land acquisition and construction and may take many months or years before positive cashflows can be generated. To date we have funded our growth principally from internal funds, borrowings from banks, proceeds from sales and pre-sales of our developed properties and proceeds from issuance of both debt and equity securities, such as our IPO in April 2007 and the Convertible Bonds in February 2008. Our financing methods vary from project to project and are subject to limitations imposed by PRC regulations and monetary policies.

Since June 2003 commercial banks have been prohibited under PBOC guidelines from advancing loans to fund the payment of land premium. In addition, the Bureau of Land Resources and Housing Management of Guangzhou Municipality indicated in 2001 that it intended to abolish the installment payment method in connection with the transfer of state-owned land use rights after December 31, 2003. As a result, property developers may only use their own funds to pay for land premium and property developers in Guangzhou may be required to make a lump sum payment for the land premium within the period stipulated in the land grant contracts.

In addition to restrictions on land premium financing, the PRC government also encourages property developers to use internal funds to develop their property projects. Under guidelines jointly issued by the Ministry of Construction and other PRC government authorities in May 2006, commercial banks in China are not permitted to lend funds to property developers with an internal capital ratio, calculated by dividing the internal funds available by the total capital

required for the project, of less than 35%, an increase of five percentage points from 30% as previously required. Such increase in internal capital ratio will increase the internally sourced capital requirement for property developers, including ourselves. In May 2009, as part of its measure to combat the impact of the current global economic downturn, the PRC government lowered this ratio to 20% for protected housing projects and ordinary commodity housing projects and to 30% for other property projects to stimulate property developments in China. We typically use internal funds and project loans from PRC banks to finance the initial construction costs for our property developments. Additional cash is generated from pre-sales of properties when they meet the requirements of pre-sale under the national and local regulations. Such proceeds from pre-sales, together with the project loans, are the major sources of fund for the construction of our projects.

We intend to continue to fund our future development and debt servicing from existing financial resources and cash generated from operations. We may also raise additional funds through debt or equity offerings or sales or other dispositions of assets in the future to finance all or a portion of our future development, for debt servicing or for other purposes. Our ability to obtain adequate financing to satisfy our debt service requirements may be limited by our financial condition and results of operations and the liquidity of international and domestic financial markets. Any failure by us to achieve timely rollover, extension or refinancing of our short-term debt may result in our inability to meet our obligations in connection with debt service, accounts payable or other liabilities when they become due and payable. See “Risk Factors—Risks relating to our business—We may not have adequate resources to fund land acquisitions or property developments, or to service our financing obligations”.

Borrowings

The following table sets forth our borrowings (excluding the Convertible Bonds) as of December 31, 2006, 2007 and 2008 and June 30, 2009:

| (RMB in thousands) | As of December 31, | | | As of June 30, |
|--|--------------------|-------------|-------------|---------------------|
| | 2006 | 2007 | 2008 | 2009 (unaudited) |
| Borrowings included in non-current liabilities: | | | | |
| Bank borrowings | | | | |
| —secured | 3,876,700 | 2,926,200 | 4,784,100 | 6,612,697 |
| —unsecured | - | 2,661,000 | 3,038,584 | 2,445,434 |
| Less: current portion of non-current borrowings | (1,018,500) | (1,359,800) | (2,819,434) | (3,011,059) |
| Non-current borrowings | 2,858,200 | 4,227,400 | 5,003,250 | 6,047,072 |
| Borrowings included in current liabilities: | | | | |
| Bank borrowings | | | | |
| —secured | 140,000 | - | 3,630 | 1,770,000 |
| —unsecured | - | 1,404,570 | - | - |
| Borrowings from related parties | 64,592 | - | - | - |
| Current portion of non-current borrowings | 1,018,500 | 1,359,800 | 2,819,434 | 3,011,059 |
| Current borrowings | 1,223,092 | 2,764,370 | 2,823,064 | 4,781,059 |
| Total | 4,081,292 | 6,991,770 | 7,826,314 | 10,828,131 |

Our borrowings (excluding the Convertible Bonds) as of December 31, 2006, 2007 and 2008 and June 30, 2009 bore a weighted average effective interest of 6.2%, 6.8% and 7.4% and 5.0%, respectively. As of June 30, 2009, a substantial part of our borrowings were secured by land use rights and properties that we owned and were guaranteed by our subsidiaries.

We issued RMB denominated U.S. dollar settled 2.5% Convertible Bonds due 2013 with an aggregate principal amount of RMB3,595 million on February 22, 2008. The principal amount of the Convertible Bonds was increased to RMB4,314 million as a result of over-subscription. As of June 30, 2009, the fair value of the liability component of the Convertible Bonds amounted to RMB4,146.6 million.

On June 10, 2008, we entered into a facility agreement as borrower in connection with a dual currency term loan facility with CITIC Ka Wah Bank Limited, as lender, with an aggregate principal amount up to US\$35 million for general corporate funding requirements. We had drawn down the entire principal amount available under this facility as of June 30, 2009.

On July 9, 2009, we signed a facility letter with The Bank of East Asia, Limited. This loan facility is a Hong Kong dollar denominated term loan facility with an aggregate principal amount of up to HK\$200 million. As of August 31, 2009, we had drawn down the entire principal amount available under this facility. In addition, we entered into a facility agreement with Chinese Mercantile Bank, Guangzhou branch, on August 14, 2009. This loan facility is a Hong Kong dollar denominated term loan facility with an aggregate principal amount of up to HK\$200 million. As of August 31, 2009, we had drawn down the entire principal amount available under this facility. See "Description of other material indebtedness".

The maturity of our borrowings (excluding the Convertible Bonds) included in non-current liabilities as of December 31, 2006, 2007 and 2008 and June 30, 2009 is as follows:

| (RMB in thousands) | As of December 31, | | | As of June 30, |
|-----------------------------|--------------------|------------------|------------------|------------------|
| | 2006 | 2007 | 2008 | 2009 |
| | | | | (unaudited) |
| Between 1 and 2 years | 2,044,400 | 2,527,400 | 3,354,474 | 3,026,058 |
| Between 2 and 5 years | 813,800 | 1,700,000 | 1,648,776 | 2,571,014 |
| Beyond 5 years | - | - | - | 450,000 |
| | <u>2,858,200</u> | <u>4,227,400</u> | <u>5,003,250</u> | <u>6,047,072</u> |

Restricted cash

Pursuant to relevant regulations, certain of our project companies are required to deposit a portion of proceeds from the pre-sales of properties into specific bank accounts. Before the completion of the pre-sold properties, the proceeds deposited in the escrow accounts may only be used for the restricted purposes of purchasing construction materials, equipment, making interim construction payments and paying taxes, with the prior approval of the relevant local authorities. Under the Equity Swap, we provided US\$250.0 million as collateral to Merrill Lynch International. In addition, some of our secured borrowings and bills payable were secured by our bank deposits. As of December 31, 2006, 2007 and 2008 and June 30, 2009, our restricted cash amounted to RMB454.7 million (all guarantee deposits for construction of pre-sold properties), RMB1,013.5 million (all guarantee deposits for construction of pre-sold properties), RMB2,728.1 million (comprised of guarantee deposits for construction of pre-sold properties of RMB1,019.5 million and collateral for Equity Swap of RMB1,708.6 million), and RMB4,576.9 million (comprised of guarantee deposits for construction of pre-sold properties of RMB1,249.6 million, collateral for Equity Swap of RMB1,708.0 million, collateral for borrowings of RMB1,570.0 million and collateral for bills payable of RMB49.3 million), respectively.

Contingent liabilities

As of June 30, 2009, we provided guarantees of approximately RMB11,262.6 million to PRC banks in respect of the mortgaged loans provided by the banks to purchasers of our developed properties. The majority of the guarantees are short-term guarantees which are discharged upon the earlier of the issuance of the individual property ownership certificate to the owner of the property or the certificate of other rights of property to the mortgage bank which will generally be available within three months after we deliver the relevant property to the purchasers, or upon the full settlement of the mortgaged loans by the purchaser. Pursuant to the terms of the guarantees, upon default in mortgage payments by these purchasers, we are responsible to repay the outstanding mortgage principals together with accrued interest and penalty owed by the defaulted purchasers to the banks and we are entitled to take over the legal title and possession of the relevant properties. Of the amounts as of June 30, 2009, approximately RMB372.8 million was to be discharged two years from the day the mortgage loans become due; and approximately RMB10,889.8 million was to be discharged upon earlier of (i) issuance of the property ownership certificates which will generally be available within three months after the purchasers take possession of the relevant properties and (ii) the full repayment of the mortgage loans by the purchasers.

Capital commitments

As of June 30, 2009, our capital commitments in connection with our property development activities amounted to RMB6,209.8 million, primarily arising from contracted construction fees or other capital commitments for future property developments. We expect to fund such capital commitments principally from the pre-sale proceeds of our properties and partly from bank borrowings. The following table shows a breakdown of our capital commitments with respect to our property developments as of June 30, 2009:

| | Amount (RMB in thousands) | Percentage % |
|--|---------------------------------|-----------------|
| Contracted but not provided for | | |
| Property, plant and equipment | 30,030 | 0.5 |
| Property development expenditure | 6,179,793 | 99.5 |
| | <u>6,209,823</u> | <u>100.0</u> |

For more details about our capital commitments, see Note 21 to our unaudited interim financial information as of and for the six months ended June 30, 2009.

Market risk

Interest rate risk

We are subject to market risks due to fluctuations in interest rates. Our net profit is affected by changes in interest rates due to the impact such changes may have on interest income and interest expense from short-term deposits and other interest-bearing financial assets and liabilities. In addition, an increase in interest rates would adversely affect our prospective purchaser's willingness and ability to purchase our properties, our ability to service loans that we have guaranteed and our ability to raise and service long-term debt and to finance our developments, all of which would adversely affect our results of operations.

Our borrowings primarily consist of loans from commercial banks and the Convertible Bonds. As of December 31, 2006, 2007 and 2008 and June 30, 2009, our borrowings were RMB4,081.3 million, RMB6,991.8 million and RMB11,844.8 million and RMB14,974.8 million, respectively. We currently do not have any derivative instruments to hedge our interest rate risk.

Borrowings issued at variable rates expose us to cash flow interest rate risk while borrowings issued at fixed rates expose us to fair value interest rate risk. In addition, any increase of benchmark lending rates published by the PBOC may result in an increase in our interest costs, as most of our bank borrowings bear floating interest rates linked to the PBOC-published rates. The PBOC-published benchmark one-year lending rates, which directly affect the property mortgage rates offered by commercial banks in China, as of December 31, 2006, 2007 and 2008 and June 30, 2009 was 6.12%, 7.74%, 5.31% and 5.31%, respectively.

Foreign exchange risk

We conduct our business almost exclusively in Renminbi except that certain receipts of sales proceeds are in foreign currencies. The value of the U.S. dollar and other foreign currencies may

fluctuate and is affected by factors such as changes in China's political and economic conditions. The conversion of the Renminbi into foreign currencies, including U.S. dollars, has been based on rates set by the PBOC. On July 21, 2005, the PRC government changed its decade-old policy of pegging the value of the Renminbi to the U.S. dollar. Under the new policy, the Renminbi is permitted to fluctuate within a narrow and managed band against a basket of certain foreign currencies. Further on May 18, 2007, the PBOC enlarged, the floating band for the trading prices in the inter-bank foreign exchange market of the Renminbi against the U.S. dollar from 0.3% to 0.5% around the central parity rate, effective on May 21, 2007. This allows the Renminbi to fluctuate against the U.S. dollar by up to 0.5% above or below the central parity rate published by the PBOC. These changes in currency policy resulted in the Renminbi appreciating against the U.S. dollar and by approximately 21.1% from July 21, 2005 to August 27, 2009. While the international reaction to the Renminbi revaluation has generally been positive, there remains significant international pressure on the PRC government to adopt an even more flexible currency policy, which could result in a further and more significant appreciation of the Renminbi against the U.S. dollar. Fluctuation in the value of the Renminbi to the U.S. dollar may adversely affect our cash flows, revenue, earnings and financial position.

Inflation

In recent years, the PRC has not experienced significant inflation, and thus inflation has not had a significant effect on our business during the past three years. According to the China Statistical Bureau, China's overall national inflation rate, as represented by the general consumer price index, was approximately 1.5%, 4.8 and 5.9% in 2006, 2007 and 2008, respectively. Deflation could negatively affect our business as it would be a disincentive for prospective property buyers to make a purchase. Historically, we have not been materially affected by any inflation or deflation.

Non-GAAP financial measures

We use EBITDA and EBITDA margin to provide additional information about our operating performance. EBITDA refers to our operating profit plus finance income, depreciation, amortization of land use rights and intangible assets, net of exchange gains or losses. EBITDA margin is calculated by dividing EBITDA by revenue.

EBITDA is not a standard measure under either HKFRS or U.S. GAAP. As the property development business is capital intensive, capital expenditure requirements and levels of debt and interest expenses may have a significant impact on the profit for the year/period of companies with similar operating results. Therefore, we believe the investor community commonly uses this type of financial measure to assess the operating performance of companies in our market sector.

As a measure of our operating performance, we believe that the most directly comparable HKFRS and U.S. GAAP measure to EBITDA is operating profit. We operate in a capital intensive industry. We use EBITDA in addition to operating profit because operating profit includes many accounting items associated with capital expenditures, such as depreciation, as well as non-operating items, such as amortization of land use rights. These accounting items may vary between companies depending on the method of accounting adopted by a company. By minimizing differences in capital expenditures and the associated depreciation expenses as well

as land use rights amortization, EBITDA provides further information about our operating performance and an additional measure for comparing our operating performance with other companies' results. Funds depicted by this measure may not be available for debt service due to covenant restrictions, capital expenditure requirements and other commitments.

The following table reconciles our operating profit under HKFRS to our definition of EBITDA for the periods indicated:

| (RMB in millions) | For the year ended December 31, | | | For the six months ended June 30, | |
|-----------------------------------|------------------------------------|----------------|----------------|---|----------------|
| | 2006 | 2007 | 2008 | 2008 | 2009 |
| Operating profit | 2,435.3 | 6,964.7 | 5,501.9 | 3,171.0 | 2,438.9 |
| Adjustments: | | | | | |
| Interest income | 20.2 | 425.4 | 74.8 | 39.2 | 19.9 |
| Depreciation | 137.2 | 127.3 | 167.8 | 88.4 | 107.3 |
| Amortization of land use rights | 39.6 | 84.8 | 160.4 | 74.3 | 86.3 |
| Amortization of intangible assets | 0.0 | 0.7 | 3.4 | 1.0 | 1.8 |
| Exchange gains/(losses) | 0.0 | (295.6) | (241.5) | (243.4) | (0.7) |
| EBITDA | 2,632.3 | 7,307.3 | 5,666.8 | 3,130.5 | 2,653.5 |

You should not consider our definition of EBITDA in isolation or construe it as an alternative to operating profit or as an indicator of operating performance or any other standard measure under HKFRS or U.S. GAAP. Our definition of EBITDA does not account for taxes and other non-operating cash expenses. Our EBITDA measures may not be comparable to similarly titled measures used by other companies.

Industry overview

The information in the section below has been derived, in part, from various government publications unless otherwise indicated. We have endeavored to obtain the most recent sources available. This information has not been independently verified by us or any of our and its respective affiliates or advisors. The information may not be consistent with other information compiled within or outside the PRC.

The economy of the PRC

The PRC economy has grown significantly since the PRC government introduced economic reforms in the late 1970s. China's accession to the World Trade Organization in 2001 has further accelerated the reform of the PRC economy. In the past ten years, China's GDP has increased from approximately RMB8,967.7 billion in 1999 to approximately RMB30,067.0 billion in 2008 at a compound annual growth rate, or CAGR, of approximately 14.4%.

The table below sets out selected economic statistics for China for the years indicated.

| | 1999 | 2000 | 2001 | 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 |
|------------------------------------|---------|---------|----------|----------|----------|----------|----------|----------|----------|----------|
| Nominal GDP | | | | | | | | | | |
| (RMB in billion) | 8,967.7 | 9,921.5 | 10,965.5 | 12,033.3 | 13,582.3 | 15,987.8 | 18,321.7 | 21,192.4 | 24,953.0 | 30,067.0 |
| Real GDP growth rate (%) | 7.6 | 8.4 | 8.3 | 9.1 | 10.0 | 10.1 | 10.4 | 11.6 | 13.0 | 9.0 |
| Per capita GDP (RMB) | 7,159.0 | 7,858.0 | 8,622.0 | 9,398.0 | 10,542.0 | 12,336.0 | 14,053.0 | 16,165.0 | 18,934.0 | N/A |
| Foreign Direct Investment | | | | | | | | | | |
| (US\$ in billion) | 40.3 | 40.7 | 46.9 | 52.7 | 53.5 | 60.6 | 60.3 | 63.0 | 74.7 | 92.4 |

| (RMB in billion) | 2,985.5 | 3,291.8 | 3,721.4 | 4,350.0 | 5,556.7 | 7,047.7 | 8,877.3 | 10,999.8 | 13,723.9 | 17,229.1 |

Source: China Statistical Yearbook and National Bureau of Statistics of China

Since 2004, with a view to preventing China's economy from overheating and to achieving more balanced and sustainable economic growth, the PRC government has taken various measures to control money supply, credit availability and fixed assets investment. In particular, the PRC government has taken measures to discourage speculation in the residential property market and has increased the supply of affordable housing. See the section headed "Regulation".

The property industry in the PRC

Property reforms

Property reforms in the PRC did not commence until the 1990s, prior to which the PRC property development industry was part of the nation's planned economy. In the 1990s, China's property and housing sector began its transition to a market-based system. A brief timeline of key housing reforms is set out below:

- 1988 The PRC government amended the national constitution to permit the transfer of state-owned land use rights
- 1992 Public housing sales in major cities commenced
- 1994 The PRC government further implemented property reform and established an employer/employee-funded housing fund

- 1995 The PRC government issued regulations regarding the sales and pre-sales of property, establishing a regulatory framework for property sales
- 1998 The PRC government abolished state-allocated housing policy
- The Guangdong government issued regulations on the administration of pre-sales of commodity properties in Guangdong Province
- 1999 The PRC government extended maximum mortgage term to 30 years
- The PRC government increased maximum mortgage financing from 70% to 80%
- The PRC government formalized procedures for the sale of property in the secondary market
- 2000 The PRC government issued regulations to standardize the quality of construction projects, establishing a framework for administering construction quality
- 2001 The PRC government issued regulations relating to the sales of commodity properties
- 2002 The PRC government promulgated the Rules Regarding the Grant of State-Owned Land Use Rights by Way of Tender, Auction and Listing-For-Sale
- The PRC government eliminated the dual system for domestic and overseas home buyers in China
- 2003 The PRC government promulgated rules for more stringent administration of property loans with a view to reducing the credit and systemic risks associated with such loans
- The State Council issued a notice for sustainable and healthy development of the property market
- 2004 The State Council issued a notice requiring that, with respect to property development projects (excluding ordinary standard residential houses), the proportion of capital funds should be increased from 20% to 35%. The Ministry of Construction amended Administrative Measures on the Pre-sale of Commercial Housing in Cities. CBRC issued the Guideline for Commercial Banks on Risks of Real Estate Loans to further strengthen the risk management of commercial banks on property loans
- 2005 The PRC government instituted additional measures to discourage speculation in certain regional markets including increasing the minimum required down payment to 30% of the total purchase price, eliminating the preferential mortgage interest rate for residential housing, imposing a business tax of 5% for sales within two years of purchase, and prohibiting reselling unfinished properties before they are completed
- 2006 to mid-2008 . . . The PRC government implemented additional land supply, bank financing, foreign investment and other measures to curtail fast increases in property prices, to encourage the development of middle- to low-end housing and to promote healthy development of the PRC property industry

The PRC government issued regulations to urge the full and effective use of existing construction land and the preservation of farming land and rules to control financial institutions' property financings to further curtail speculation, over development and fast increases in property prices.

Mid-2008 to present . . . The PRC government implemented a number of measures to combat the global economic slowdown. These measures include the lowering of the PBOC benchmark bank lending rates, the internal capital ratio for property projects and the down payment requirements for purchasing residential properties.

Additional information on housing reforms and recent regulatory developments is set out in the section entitled "Regulation".

The property reforms, together with the economic growth of China, an increase in disposable income, the emergence of the mortgage lending market and an increase in the urbanization rate, are key factors in sustaining the growth of China's property market. Government housing reforms continue to encourage private ownership and it is expected that the proportion of urban residents who own their private properties will continue to increase.

The table below sets out selected data relating to China's urbanization and disposable income of urban households in China for the periods indicated.

| | 2004 | 2005 | 2006 | 2007 | 2008 |
|--|---------|----------|----------|----------|----------|
| Urban population (in millions) | 542.8 | 562.1 | 577.1 | 593.8 | 606.7 |
| Total population (in millions) | 1,299.9 | 1,307.6 | 1,314.5 | 1,321.3 | 1,328.0 |
| Urbanization rate (%) | 41.8 | 43.0 | 43.9 | 44.9 | 45.7 |
| Per capita disposable income of urban households (RMB) | 9,421.6 | 10,493.0 | 11,759.5 | 13,785.8 | 15,781.0 |

The property market in China

Prices for property in China increased from 1998 to 2008, with the average price of residential properties in China increasing from approximately RMB2,548.6 per sq.m. in 2004 to approximately RMB3,655.1 per sq.m. in 2008, while the average price for commodity properties in the same period increased from approximately RMB2,713.9 per sq.m. in 2004 to approximately RMB3,876.8 per sq.m. in 2008.

In addition, investment in property development increased from approximately RMB1,315.8 billion in 2004 to approximately RMB3,058.0 billion in 2008.

The table below sets out selected data relating to the property market in China for the periods indicated.

| | 2004 | 2005 | 2006 | 2007 | 2008 |
|--|---------|---------|---------|---------|---------|
| Investment in property development | | | | | |
| (RMB in billions) | 1,315.8 | 1,590.9 | 1,942.3 | 2,528.9 | 3,058.0 |
| Total GFA sold (sq.m. in millions) | 382.3 | 554.9 | 618.6 | 773.5 | 620.9 |
| GFA of residential properties sold | | | | | |
| (sq.m. in millions) | 338.2 | 495.9 | 554.2 | 701.4 | 558.9 |
| Average price of commodity properties | | | | | |
| (RMB per sq.m.) | 2,713.9 | 3,167.7 | 3,366.8 | 3,863.9 | 3,876.8 |
| Average price of residential properties | | | | | |
| (RMB per sq.m.) | 2,548.6 | 2,937.0 | 3,119.3 | 3,645.2 | 3,655.1 |

Housing mortgages

According to CEIC Data Company Limited, a database vendor based in Hong Kong, the aggregate balance of outstanding mortgage loans for residential properties in the PRC grew from approximately RMB560.0 billion in 2001 to approximately RMB2,980.0 billion in 2008.

Real estate sales revenue

The upward trend in the China property industry is evidenced by the growth of revenue from the sale of properties in China. According to the China Statistical Yearbook 2008, the total revenue from property development in the PRC increased from approximately RMB707.8 billion in 2002 to approximately RMB2,407.1 billion in 2008. During the same period, total GFA sold increased from approximately 268,082,900 sq.m. in 2002 to approximately 620,900,000 sq.m. in 2008.

The property market in Guangdong Province

Guangdong Province is located in the southern region of China. It has an area of approximately 178,000 sq.km. In 2008, Guangdong Province had a population of approximately 95.4 million. The real GDP growth rate of Guangdong Province exceeded the average national growth rate in each of the past ten years and the per capita GDP of Guangdong Province was significantly higher than the national average. The table below sets out selected economic statistics of Guangdong Province for the periods indicated.

| | 1999 | 2000 | 2001 | 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 |

Source: Guangdong Statistical Yearbook and National Bureau of Statistics of China

According to the Guangdong Bureau of Statistics, properties with a total GFA of 43,592,000 sq.m. were completed in Guangdong Province in 2008, representing an increase of 8.2% over 2007. A total of 48,244,100 sq.m. of commodity property was sold, of which 43,783,700 sq.m. was residential property. The total sales revenue amounted to approximately RMB365.1 billion, of which approximately RMB318.3 billion was from the sales of residential properties. The average price per sq.m. of commodity and residential properties in Guangdong Province in 2007 was approximately RMB5,911.8 and RMB5,677.2, respectively, representing an increase of 21.8% and 23.7% over 2005. The table below sets out selected data relating to the property market in Guangdong Province for the periods indicated.

| | 2004 | 2005 | 2006 | 2007 | 2008 |
|---|---------|---------|---------|---------|------|
| Total GFA completed (sq.m. in millions) | 34.1 | 43.9 | 43.1 | 42.7 | 43.6 |
| GFA of residential properties completed (sq.m. in millions) | 27.8 | 34.8 | 34.2 | 35.1 | 34.8 |

Guangzhou City

Guangzhou is the largest city in southern China and the capital of Guangdong Province, located in the central southern region of the province. In 2008, Guangzhou had a population of approximately 10.2 million. The city experienced a high GDP growth rate for the five years from 2004 to 2008. Guangzhou's GDP reached approximately RMB821.6 billion in 2008, representing a per capita GDP of approximately RMB81,233.0. The table below sets out selected economic statistics of Guangzhou for the periods indicated.

| | 2004 | 2005 | 2006 | 2007 | 2008 |
|---|----------|----------|----------|----------|----------|
| Nominal GDP (RMB in billions) | 445.1 | 515.4 | 607.4 | 710.9 | 821.6 |
| Real GDP growth rate (%) | 15.0 | 12.9 | 14.8 | 14.9 | 12.3 |
| Per capita GDP (RMB) | 45,906.0 | 53,809.0 | 63,100.0 | 70,186.0 | 81,233.0 |

Source: Guangdong Statistical Yearbook and Guangdong Bureau of Statistics

According to the Guangdong Bureau of Statistics, properties with a total GFA of 8,816,800 sq.m. were completed in Guangzhou in 2007, representing a decrease of 10.8% over 2006. A total of 13,513,300 sq.m. of commodity property was sold, of which 11,586,300 sq.m. was residential property. The total sales revenue amounted to approximately RMB117.2 billion, of which approximately RMB97.8 billion was from the sale of residential properties. The average price per sq.m. of commodity and residential properties in Guangzhou in 2007 was approximately RMB8,673.1 and RMB8,439.1, respectively, representing an increase of 32.5% and 37.2% over 2006.

Foshan City

Foshan is located in the central southern region of Guangdong Province, situated to the east of Guangzhou. In 2008, Foshan had a population of approximately 6.0 million. The city experienced

a high GDP growth rate for the five years from 2004 to 2008. Foshan's GDP reached approximately RMB433.3 billion in 2008, representing a per capita GDP of approximately RMB72,975.0. The table below sets out selected economic statistics of Foshan for the periods indicated.

| | 2004 | 2005 | 2006 | 2007 | 2008 |

The average price per sq.m. of commodity and residential properties in Chongqing in 2007 was approximately RMB5,811.1 and RMB5,575.7, respectively.

The property market in Chongqing

Chongqing is located on the edge of the Yungui Plateau, intersected by the Jialing River and the upper reaches of the Yangtze River. In 2008, Chongqing had a population of approximately 28.4 million. Chongqing's GDP reached approximately RMB509.7 billion in 2008, representing a per capita GDP of approximately RMB18,025.0. The table below sets out selected economic statistics of Chongqing for the periods indicated.

| | 2004 | 2005 | 2006 | 2007 | 2008 |
|---|---------|----------|----------|----------|----------|
| Nominal GDP (RMB in billions) | 269.3 | 307.0 | 349.2 | 411.2 | 509.7 |
| Real GDP growth rate (%) | 12.2 | 11.5 | 12.2 | 15.6 | 14.3 |
| Per capita GDP (RMB) | 9,624.0 | 10,982.0 | 12,457.0 | 14,622.0 | 18,025.0 |

Source: *Chongqing Statistical Yearbook and Chongqing Bureau of Statistics*

According to the Chongqing Bureau of Statistics, properties with a total GFA of 22,531,000 sq.m. were completed in Chongqing in 2007. A total of 35,529,200 sq.m. of commodity property was sold, of which 33,101,300 sq.m. was residential property. The total sales revenue amounted to approximately RMB96.7 billion, of which RMB85.7 billion was from the sale of residential properties. The average price per sq.m. of commodity and residential properties in Chongqing in 2007 was approximately RMB2,722.6 and RMB2,588.2, respectively.

The hotel industry in the PRC

China's tourism industry and hotel industry have benefited from the strong economic growth in China which has resulted in higher disposable incomes of urban households, reflecting a more affluent domestic customer base. In addition, the increased number of international travelers also contributed to the growth of China's tourism and hotel sectors. In 2008, there were 130.0 million inbound visitors, including visitors from Hong Kong, Macau and Taiwan, representing an increase of 1.4% over 2007. The majority of these visitors were from Hong Kong, Macau and Taiwan, which collectively accounted for 81.3% of the total number of inbound visitors in 2008. The table below sets out the number of inbound visitors arriving in China from 2004 to 2008.

| | Inbound visitors | | | | |
|-------------------------------------|------------------|-------|-------|-------|-------|
| | 2004 | 2005 | 2006 | 2007 | 2008 |
| Total (millions) | 109.0 | 120.3 | 124.9 | 131.9 | 130.0 |
| From Hong Kong and Macau (millions) | 88.4 | 95.9 | 98.3 | 101.1 | N/A |
| From Taiwan (millions) | 3.7 | 4.1 | 4.4 | 4.6 | N/A |
| Foreigners (millions) | 16.9 | 20.3 | 22.2 | 54.7 | 24.3 |
| Increase/(Decrease) (%) | 19.0 | 10.4 | 3.8 | 5.5 | (1.4) |

Source: China Statistical Yearbook

To accommodate the growing number of inbound visitors, the number of star-rated hotels in China increased from 8,880 in 2002 to 12,751 in 2006, representing a CAGR of 9.5%. The table below sets out the number of star-rated hotels and hotel rooms as well as the average occupancy rates in China from 2002 to 2006, reflecting the supply in the hotel sector.

| | 2002 | 2003 | 2004 | 2005 | 2006 |
|-----------------------------|-------|-------|---------|---------|---------|
| Star-rated hotels | 8,880 | 9,751 | 10,888 | 11,828 | 12,751 |
| Hotel rooms (thousands) | 897.2 | 992.8 | 1,237.9 | 1,332.1 | 1,459.8 |
| Average occupancy rates (%) | 60.2% | 56.1% | 60.6% | 61.0% | 61.0% |

Hotel industry in Guangdong Province

In 2008, Guangdong Province received approximately 103.2 million inbound visitors, including visitors from Hong Kong, Macau and Taiwan, representing an increase of 0.04% over 2007. The majority of these visitors were from Hong Kong, Macau and Taiwan, which collectively accounted for approximately 97.1 million of inbound visitors in 2008. The table below sets out the number of inbound visitors in Guangdong Province from 2004 to 2008.

| | Inbound visitors | | | | |
|-------------------------------------|------------------|------|-------|-------|-------|
| | 2004 | 2005 | 2006 | 2007 | 2008 |
| Total (millions) | 87.5 | 95.8 | 100.4 | 103.2 | 103.2 |
| From Hong Kong and Macau (millions) | 80.9 | 88.3 | 92.3 | 94.2 | N/A |
| From Taiwan (millions) | 2.0 | 2.2 | 2.2 | 2.3 | N/A |
| Foreigners (millions) | 4.6 | 5.4 | 5.9 | 6.7 | 6.2 |
| Increase/(Decrease) (%) | 25.0 | 9.5 | 4.8 | 2.8 | 0.0 |

Corporate structure

The following chart shows our corporate structure as of August 31, 2009.

Note:
 (1) Our ultimate shareholders (other than public shareholders) are Yang Huiyan, Yang Erzhu, Su Rubo, Zhang Yaoyuan, Ou Xueming, who hold 59.33%, 5.91%, 4.35%, 4.96%, and 4.47%, respectively, of our shares. See "Principal shareholders".

Business

Overview

We are one of the leading integrated property developers in the PRC with substantially all of our assets and operations based in the PRC. Since the commencement of our property development activities in 1997, we have benefited from, and expect to continue to benefit from, the growth in the property sector associated with the economic development in the PRC, in particular, in Guangdong Province. Our primary business has been the development of large-scale residential community projects and the sale of various types of properties, including townhouses, apartment buildings, car parks and retail shops. The majority of our products are targeted towards owner-occupier customers. As an integrated property developer, our lines of business also include construction, installation, fitting and decoration as well as property management.

Our residential home projects are generally located in the suburban areas of first-tier cities and in the newly urbanized town centers of second- and third-tier cities. While the local residents in China constitute our core customer base, we have also generated demand from residents in Hong Kong and Macau.

As of June 30, 2009, we had 58 projects at various stages of development. Thirty of these projects were located in Guangdong Province: eight in Guangzhou City, five in Foshan City, six in Jiangmen City and the remaining in other cities including Yangjiang City, Shaoguan City, Zhaoqing City, Huizhou City, Shanwei City, Maoming City and Qingyuan City. Another 28 projects were located outside Guangdong Province, spanning six provinces, one autonomous region and two provincial level municipalities.

As of June 30, 2009, our projects had an aggregate completed GFA of approximately 13,756,052 sq.m. We had an aggregate GFA under development of approximately 13,399,110 sq.m. and an aggregate GFA of approximately 29,618,992 sq.m. relating to properties held for future development as of the same day. In addition, as of June 30, 2009, we had entered into land grant contracts in respect of land located in 18 cities with an aggregate site area of approximately 8,068,910 sq.m. and an aggregate expected GFA of approximately 10,553,831 sq.m. for future development.

We also develop hotels to compliment our residential properties. Most of these hotels are located in our large-scale residential community projects, which we believe have added value to our residential projects and enhanced our brand recognition. We have developed and are operating four five-star hotels and one four-star hotel, as well as five hotels which have been developed in accordance with the five-star rating standard set forth in the "Star-Rating Standard for Tourist Hotels" (旅遊飯店星級的劃分與評定) issued by the PRC National Tourism Administration. In addition, we have 10 hotels under construction in accordance with the five-star standard set forth in the "Star-Rating Standard for Tourist Hotels".

For the year ended December 31, 2008 and the six months ended June 30, 2009, our total revenue was RMB15,712.8 million and RMB9,202.8 million (US\$1,347.4 million), respectively. For the same periods, our EBITDA was RMB5,666.8 million and RMB2,653.5 million (US\$388.5 million), respectively.

Our shares have been listed on the Hong Kong Stock Exchange since April 20, 2007 under stock code 2007. Our market capitalization as of August 31, 2009 was HK\$52,315.5 million.

Competitive strengths

We are one of the largest property developers in the PRC with one of the largest, geographically diversified, and low-cost land bank

As of June 30, 2009, we had an aggregate GFA under development and for future development of approximately 43,018,102 sq.m. for which we have obtained all the relevant land use rights certificates, spanning seven provinces, one autonomous region and two provincial level municipalities. In addition, as of June 30, 2009, we had entered into land grant contracts in respect of land with an aggregate site area of approximately 8,068,910 sq.m. for which we have applied for or are in the process of applying for land use rights certificates in 18 cities in China, with an aggregate expected GFA of approximately 10,553,831 sq.m. for future development. We expect that these new acquisitions will further increase the value and size of our land bank when we obtain the land use rights certificates.

We adopt a disciplined approach to land acquisition and development. We undertake market research and analysis as well as budget and financing planning prior to a land acquisition, which we believe enables us to exercise effective cost control. In addition, we continue to seek opportunities to acquire and develop land in close proximity to our existing mature projects. We believe such in-fill developments will lower potential execution risks given our experience with the local markets, service providers and target customers. For the year ended December 31, 2008 and the six months ended June 30, 2009, our average unit land cost based on GFA was lower than 10% of our average unit selling price. We believe our low-cost land bank not only supports our future profitability but also gives us greater flexibility to diversify our product portfolio, to cater to a broader customer base, and to respond more effectively to changing market conditions.

We have an established business model which we believe has been successfully replicated in the markets where we operate

We focus on developing large-scale residential communities in the suburban areas of first-tier cities as well as the newly urbanized town centers of second- and third-tier cities in the PRC. We proactively seek to enhance the value of our properties by creating a better living environment through the provision of comprehensive community facilities and premium services in our master-planned communities. Our business model leverages on China's economic growth, increasing urbanization and rising standards of living. We believe that we have aligned our business development objectives with those of local governments, as our large-scale township developments raise the living standards of the local population and help improve the business environment of the local economies.

Over the last decade, we have successfully replicated our business model in 10 cities in Guangdong Province, with a total of 30 projects having an aggregate expected GFA of 29,856,561 sq.m. as of June 30, 2009. Since 2006, we have also started to implement our business model outside Guangdong Province, with a total of 28 projects having an aggregate expected GFA of 26,917,593 sq.m. as of June 30, 2009. We believe the success of Changsha Country Garden and Shenyang Country Garden, in particular, demonstrates our ability to replicate our business model in other provinces in China.

Our standardized operations enable us to provide high-quality and competitively priced products to our customers and to achieve quick asset turnover and attractive margins

We are one of the largest PRC property developers focusing on developing large-scale, multi-phase suburban residential communities in the PRC. We standardize principal features of our operations, such as land acquisition, project planning and design, procurement of raw materials, selection of contractors, sales and marketing and property management, which we believe enable us to:

- achieve economies of scale and increase operating efficiency through pooling internal resources, thereby improving our profit margins;
- ensure consistent product quality;
- strengthen our bargaining power with suppliers and contractors to obtain good quality supplies and services at relatively low costs, which help increase our pricing flexibility;
- smoothen project execution to achieve quick asset turnover; and
- respond rapidly to changes in market environment. For example, in response to the strong local property market recovery in the first half of 2009, we plan to launch the pre-sale of a number of new projects or subsequent phases of existing projects in the second half of 2009.

We believe that a combination of our strong brand recognition, high quality product mix and competitive pricing model have enabled us to pre-sell a substantial portion of the properties in our projects.

We maintain a robust liquidity position and have a strong credit profile

We actively manage our liquidity position by taking into account our development plans, capital needs and available cash and financing options. As of December 31, 2008 and June 30, 2009, our cash and cash equivalents amounted to RMB3.0 billion and RMB4.9 billion, respectively. We believe our quick asset turnover model has enabled our projects to generate positive cash flow in a relatively short period after commencement of development to support further development.

We believe we have developed a strong credit profile over the years and have become a preferred customer of a number of major commercial banks in the PRC. We also have access to the international capital markets through debt and equity offerings. While we have a strong credit profile, we closely monitor our leverage ratio with a view to maintaining a healthy financial structure. As of December 31, 2008 and June 30, 2009, our net debt to equity ratio which is measured by dividing net debt (total borrowings and the Convertible Bonds net of cash and cash equivalents, guarantee deposits for construction of pre-sold properties and cash collateral for bank borrowings) by our total capital and reserves attributable to our equity owners, was 40.9% and 35.7%, respectively.

We have a strong brand in Guangdong Province with increasing recognition nationwide

We believe our brand name “Country Garden” (碧桂園), as well as our guiding motto, “Country Garden—Giving you a five-star home” (碧桂園—給您一個五星級的家), have strong market

recognition in Guangdong Province. We believe this market recognition is a result of our high quality products and services as we aim to provide our customers with not only pleasant and comfortable homes in a clean and safe environment, but higher living standards supported by comprehensive community facilities and services such as restaurants and catering, shopping, sports and leisure, transportation, education and domestic assistance. This market recognition has helped us to achieve our leading position in the property market in Guangdong Province and to expand our operations into other PRC provinces. Since 2006, we have gradually expanded our operations into six provinces, one autonomous region and two provincial level municipalities beyond Guangdong, and we believe we will receive increasing brand recognition in those markets. In 2006, we were one of the first two brands that were recognized by SAIC as “China’s Well-Known Trademarks” in the property sector.

We aim to strengthen the confidence and trust of our customers in our products and services, and to secure repeat customers and referrals for us, through an emphasis on quality property management and post-sales services. We believe that our strong financial performance demonstrates the trust that we have built with our customers and the recognition of our brand name and the quality of our products.

We have a highly effective management structure, experienced management team and professional workforce

We have a centralized management structure. Our headquarters in Guangdong Province vertically manage the principal functions of our operations, including land acquisitions, project design, human resources, financing planning and raw material procurement. As we expand to markets outside Guangdong, we have delegated certain functions such as project management and marketing to the project companies to facilitate smooth project execution, thereby enabling them to cater to local characteristics, shorten development cycle and quickly respond to changes in local market conditions.

Our senior management team has extensive industry knowledge, management skills and operating experience. Most of our management have been with us since our inception. In particular, Yeung Kwok Keung, Yang Erzhu, Su Rubo, Zhang Yaoyuan and Ou Xueming, our co-founders, have remained as a cohesive team and have focused on our property development business since 1997. We believe our management’s interest is aligned with our interest given their substantial shareholding in our company. As of August 31, 2009, our senior management (principally comprised of our co-founders and their family members) in the aggregate held an approximate 79.0% interest in our company. In addition, many members of our management team are trained or licensed architects or civil engineers. Ng Yi Kum, Estella, our chief financial officer, has over 15 years of experience in the property and finance industries and held a number of senior positions with publicly listed companies and the Hong Kong Stock Exchange before joining us. We have also recruited a large number of mid-level managers and professionals with property experience or relevant management skills.

Business strategies

Continue to focus on core property development business with a healthy mix of property developments within and outside Guangdong Province

We intend to continue to grow our core property development business. We will actively look for suitable opportunities to develop large-scale residential communities in suburban areas of first-

tier cities as well as the newly urbanized town centers of second- and third-tier cities. We believe this strategy is not only in line with China's urbanization trend of expanding existing urban boundaries of major cities and creating new urban clusters around second- and third-tier cities, but also consistent with our successful formula of controlling costs through our low-cost land bank, large-scale production and quick asset turnover.

Since 2006, we have gradually expanded our operations outside Guangdong Province into six other provinces, one autonomous region and two provincial level municipalities. We believe our geographical diversification efforts have provided us with a healthy mix of property developments within and outside Guangdong Province. Guangdong Province, which is one of the most affluent provinces and fastest growing economies in China, will remain our principal market. Guangdong Province recorded a GDP per capita of approximately RMB37,588 in 2008, 65.6% higher than the national average. We intend to continue to leverage our local knowledge and market reputation in Guangdong Province to further grow our business there. At the same time, we will continue to develop our existing projects in markets outside Guangdong Province and, where suitable opportunities arise, acquire more land and enter into new markets having high growth potential.

We also intend to continue to incorporate high quality hotels in our large residential communities, as we believe they enhance the value and attractiveness of our residential community projects. We believe this strategy also improves our competitiveness during the land tender process, as high quality hotels are seen by local governments of second- and third-tier cities as an important feature to attract visitors and improve the commercial appeal of the environment.

Continue to focus on developing properties having an attractive value-to-price ratio

We intend to continue to focus on our strategy of providing our customers with high-value properties at competitive prices. We will continue to leverage on our expertise and industry experience to develop large-scale integrated residential communities featuring value-added facilities and services that cater to a broad customer base. Our facilities include clubhouses, hotels, supermarkets, schools, clinics, sports and recreational facilities as well as food and beverage outlets, and our services include childcare, domestic assistance, property management, security and shuttle bus services for residents both within the projects as well as from projects to city centers. We endeavor to develop and refine our product design to accommodate changing market conditions and consumer preference. We will also encourage creativity and innovation in our product design through collaboration between our in-house experts and third-party professionals.

Maintain prudent financial management policies

We will continue to closely monitor our capital and cash positions and gauge our development scale and time our land acquisition and development schedule accordingly. We have budget and financing planning and cash management at the project level as well as the group level. We will continue to carefully manage our development cost for each project during the course of its development, with an emphasis on cost reduction and cost efficiency. We will actively manage our sales and pre-sales to ensure adequate cash flow for our ongoing capital requirements. We will also remain disciplined in our capital commitments and seek to maintain a balanced capital structure.

Further strengthen our already leading position and brand name recognition nationwide

We plan to further strengthen our leading position and our “Country Garden” brand name recognition in Guangdong Province and across China. To distinguish ourselves from our competitors, we plan to continue to promote the “five-star home” motto and apply this to the services offered to our existing and prospective customers to improve the living environment of our customers. We will continue to encourage our existing customers to refer potential purchasers to us through incentive schemes such as waiving property management fees.

Enhance effective internal management and controls

We intend to continue to adopt the best practices and standards in the industry for corporate governance and internal controls, drawing on our senior management’s expertise and experience to facilitate our operations and expansion. We intend to further enhance our internal management by clearly defining the responsibilities of each operating unit to ensure orderly and efficient operations and rapid responses to changes in market conditions.

We will continue to incentivize our management and employees and seek to attract and retain talent through a competitive remuneration package. We will continue to provide our employees with a variety of training and development programs to assist in their career development. We will also actively recruit new talent to optimize our human resources and enhance the productivity and competitiveness of our workforce.

Overview of our property development

As of June 30, 2009, we had 58 projects at various stages of development. Thirty of the projects are located in Guangdong Province including eight in Guangzhou City, five in Foshan City, six in Jiangmen City, one in Yangjiang City, three in Shaoguan City, three in Zhaoqing City, one in Huizhou City, one in Shanwei City, one in Maoming City and one in Qingyuan City . Another 28 projects are located in other provinces and regions including three in Changsha City and one in Yiyang City in Hunan Province, one in each of Wuhan City, Suizhou City, Jingmen City and two in Xianning City in Hubei Province, one in Taizhou City in Jiangsu Province, three in Chaohu City, one in each of Anqing City, Chizhou City, Huangshan City and Wuhu City in Anhui Province, four in Shenyang City and one in Anshan City in Liaoning Province, one in each of Hulunbeier City, Xing’anmeng and Tongliao City in Inner Mongolia, one in Suihua City in Heilongjiang Province, one in Chongqing Municipality and one in Tianjin Municipality.

We have obtained all the relevant long-term title certificates for land of our completed properties and properties under development. Further, we have property interests derived from land use rights transfer agreements, compensation agreements or land grant contracts to develop residential properties in various cities in Guangdong Province, Changsha City and Yiyang City in Hunan Province, Shenyang City and Anshan City in Liaoning Province, Chaohu City and Anqing City in Anhui Province, Suizhou City, Wuhan City and Jingmen City in Hubei Province and Tianjin Municipality, with an aggregate site area of approximately 8,068,910 sq.m. As of June 30, 2009, we had not yet obtained land use rights certificates to these parcels of land and these land parcels are vacant land for future development purposes.

The relevant properties in a property development project are treated as completed when the local government authorities issue a Construction of Properties and Municipal Infrastructure Completed Construction Works Certified Report (房屋建築工程和市政基礎設施工程竣工驗收備案表). The

relevant properties in a property development project are treated as having received that certification when we have provided the relevant government authorities with, among other things, the following documents and when an official seal has been affixed to the inspection-for-completion form:

- Relevant approvals and acceptance documents from the bureau of planning, public security and fire services and environmental protection;
- Completed Construction Works Certified Report (建設工程竣工驗收報告);
- Construction Permit (建設工程施工許可證);
- Project Quality Assessment Report (工程質量評做報告);
- Quality Inspection Report on Investigation and Design Documentation (勘察、設計文件質量檢查報告); and
- Inspection Report on the Quality of Construction Projects (建設工程質量監督報告).

A property is treated as “under development” immediately following the issuance of the Construction Permit but prior to the issuance of the Certification of Completion.

Unless otherwise indicated, we have obtained the relevant land use rights certificates for our properties referred to herein. As our projects typically comprise multiple- phase developments on a rolling basis, a single project may include a number of phases that are at various stages of development or held for future development.

The site area information for an entire project is based on the relevant land use rights certificates. The aggregate GFA of an entire project is calculated by multiplying its site area by:

- the plot ratio specified in other approval documents from the local governments relating to the project;
- the maximum permissible plot ratio as specified in the relevant land grant contracts; or
- such lower plot ratio as we reasonably expect to be able to develop for such project.

The aggregate GFA of a project includes both saleable and non-saleable GFA. Non-saleable GFA refers to certain communal facilities, including transformer rooms and guard houses.

A property is treated as “sold” when the purchase contract with a customer has been executed and the property has been delivered to the customer. Delivery is deemed to take place on the date stated on the property delivery document. A property is treated as “pre-sold” when the purchase contract has been executed but the property has not yet been delivered to the customer.

The project names used herein are the names that we have used, or intend to use, to market our properties.

The following table sets forth the information of our 58 projects as of June 30, 2009.

| Project | City (District) | Types of Products | Completed property developments | | | | | | | | | | Properties under development | | | | | | | | | | Properties for future development | | | |

Notes:

- (1) "Completed GFA", "Total completed saleable GFA" and "Total saleable GFA sold" for completed property developments are based on the surveying reports relevant government departments.
- (2) "GFA under development" is based in the actual measurements by our housing management department.
- (3) "Total saleable GFA under development" and "Total saleable GFA pre-sold" for properties under development are derived from the Commodity Properties Pre-sale Permit.
- (4) "GFA held for future development" for each project is the GFA expected to be built.

* These types of products are products that we expect to develop in the project, but we have not obtained Planning Permit or planning approval for developing these products.

As of June 30, 2009, our project companies had entered into land grant contracts in respect of land in various cities in Guangdong Province, Changsha City and Yiyang City in Hunan Province, Shenyang City and Anshan City in Liaoning Province, Chaohu City and Anqing City in Anhui Province, Suizhou City, Wuhan City and Jingmen City in Hubei Province and Tianjin Municipality, with an aggregate site area of approximately 8,068,910 sq.m. for which we had not yet obtained the relevant land use rights certificates, with an aggregate expected GFA of approximately 10,553,831 sq.m. for future development. We intend to obtain land use rights certificates in respect of these parcels of land after making full payment of the land premium according to the relevant land grant contracts. However, we cannot assure you that we will obtain the land use rights certificates in respect of these parcels of land in a timely manner or at all. Further, we have not commenced any construction or preparation of construction relating to these parcels of land, nor do we have any detailed plans for them.

The table below shows the location, site area and expected developable aggregate GFA, for each of these parcels of land as of June 30, 2009. The site area information for these parcels of land is based on the relevant land grant contracts or public auction confirmation.

| Location | Site Area | Expected developable aggregate GFA |

| Tianjin Municipality (Tanggu), Tianjin Municipality | 16,595 | 116,164 |
| Tianjin Municipality (Balitai), Tianjin Municipality | 455,434 | 700,458 |
| Total | 8,068,910 | 10,553,831 |

Subsequent to June 30, 2009 and as of August 31, 2009, we entered into land grant contracts or land use rights transfer agreement in relation to four additional parcels of land in Qingyuan City, Dongguan City, Foshan City and Guangzhou City in Guangdong Province. These four parcels of land have an aggregate site area of approximately 1,086,148 sq.m. and estimated total GFA of approximately 1,339,315 sq.m.. As of the same date, we had paid land premium in the aggregate amount of approximately RMB446.9 million in respect of such land, with approximately RMB926.6 million of land premium outstanding.

Description of our property projects

The following map shows the locations of our 58 projects as of June 30, 2009.

The following sets forth brief descriptions of our 58 projects. The commencement date for a project or the commencement date for a phase of a project is the date we start construction of the first building of the project or phase of development. The completion date for a project or the completion date for a phase of a project is either the date we obtain the completion documents or the Construction of Properties and Municipal Infrastructure Completed

Construction Works Certified Report (房屋建築工程和市政基礎設施工程竣工驗收備案表) from the local government authorities for the last building or phase of the project.

Guangzhou City, Guangdong Province

Country Garden East Court (碧桂園東苑)

Country Garden East Court is located at the intersection of Yushan West Road and 105 Guo Road, Panyu, Guangzhou City. It is being developed by Guangzhou Country Garden Property Development Co., Ltd., our wholly-owned project company. The project occupies an aggregate site area of approximately 220,943 sq.m., and has an expected aggregate GFA (including saleable and non-saleable GFA) of approximately 269,222 sq.m.

As of June 30, 2009, the completed properties occupied an aggregate site area of approximately 191,044 sq.m., and had an aggregate GFA (including saleable and non-saleable GFA) of approximately 240,550 sq.m. Construction of these properties commenced on June 16, 2000 and was completed on June 29, 2002. The completed properties comprised 2,761 residential flats with an aggregate saleable GFA of approximately 235,251 sq.m. as well as 56 retail shops with an aggregate saleable GFA of approximately 3,609 sq.m. As of June 30, 2009, 2,750 residential flats, with an aggregate saleable GFA of approximately 234,400 sq.m., had been sold and delivered. The remaining completed properties, which included sold but undelivered properties and unsold properties, comprised 11 residential flats, with an aggregate GFA of approximately 851 sq.m., and 56 retail shops with an aggregate GFA of approximately 3,609 sq.m.

As of June 30, 2009, there was no property under development in Country Garden East Court.

As of June 30, 2009, the properties held for future development occupied an aggregate site area of approximately 29,899 sq.m., and had an expected aggregate GFA of approximately 28,672 sq.m.

As of June 30, 2009, the total development costs of Country Garden East Court (including the costs of land acquisition and construction) incurred were RMB701.4 million.

Country Garden East Court offers low-rise apartment buildings and retail shops. This development features Country Garden Farm, a commercial pedestrian street and fountain plaza.

Shawan Country Garden (沙灣碧桂園)

Shawan Country Garden is located at Shawan, Panyu, Guangzhou City. It is being developed by Guangzhou Country Garden Property Development Co., Ltd., our wholly-owned project company. The project occupies an aggregate site area of approximately 307,266 sq.m. and has an expected aggregate GFA (including saleable and non-saleable GFA) of approximately 279,216 sq.m.

As of June 30, 2009, the completed properties occupied an aggregate site area of approximately 289,090 sq.m., and had an aggregate GFA (including saleable and non-saleable GFA) of approximately 212,244 sq.m. Construction of these properties commenced on February 14, 2001 and was completed on June 29, 2009. The completed properties comprised of 1481 residential flats with an aggregate saleable GFA of approximately 211,281 sq.m. As of June 30, 2009, 880 residential flats with an aggregate saleable GFA of approximately 151,689 sq.m. had been sold and delivered. The remaining completed properties, which included sold but undelivered

properties and unsold properties, comprised 601 residential flats, with an aggregate GFA of approximately 59,592 sq.m.

As of June 30, 2009, the properties under development occupied an aggregate site area of approximately 18,176 sq.m., and had an expected aggregate GFA (including saleable and non-saleable GFA) of approximately 66,972 sq.m. Construction of these properties commenced on July 25, 2007 and is expected to be completed in the fourth quarter of 2009. Upon completion, there will be 612 residential flats, with an aggregate saleable GFA of approximately 62,421 sq.m.

As of June 30, 2009, there was no property held for future development in Shawan Country Garden.

As of June 30, 2009, the total development costs of Shawan Country Garden (including the costs of land acquisition and construction) incurred were RMB910.8 million.

Shawan Country Garden offers villas, townhouses, high-rise apartment buildings and car parks.

Huanan Country Garden—Phases One to Five and Phase Seven (華南碧桂園——一至五期及七期)

Huanan Country Garden—Phases One to Five and Phase Seven is located on Ying Bin Road, Nan Cun Town, Panyu District, Guangzhou City. It is being developed by Guangzhou Country Garden Property Development Co., Ltd., our wholly-owned project company. The project occupies an aggregate site area of approximately 1,133,278 sq.m. and has an expected aggregate GFA (including saleable and non-saleable GFA) of approximately 1,010,231 sq.m.

As of June 30, 2009, the completed properties occupied an aggregate site area of approximately 1,004,656 sq.m., and had an aggregate GFA (including saleable and non-saleable GFA) of approximately 910,959 sq.m. Construction of these properties commenced on July 30, 1999 and was completed on February 27, 2009. The completed properties comprised 5,700 residential flats, with an aggregate saleable GFA of approximately 850,191 sq.m., and 89 retail shops with an aggregate saleable GFA of approximately 4,105 sq.m. As of June 30, 2009, 5,679 residential flats, with an aggregate saleable GFA of approximately 844,492 sq.m. as well as 72 retail shops with an aggregate saleable GFA of approximately 3,199 sq.m. had been sold and delivered. The remaining completed properties, which included sold but undelivered properties and unsold properties, comprised 21 residential units with an aggregate saleable GFA of approximately 5,699 sq.m. and 17 retail shops with an aggregate saleable GFA of approximately 906 sq.m.

As of June 30, 2009, the properties under development occupied an aggregate site area of approximately 71,464 sq.m., and had an expected aggregate GFA (including saleable and non-saleable GFA) of approximately 65,072 sq.m. Construction of these properties commenced on May 27, 2005 and is expected to be completed in the second quarter of 2010. Upon completion, there will be 186 residential flats with an aggregate saleable GFA of approximately 17,968 sq.m. and 86 retail shops with an aggregate saleable GFA of approximately 12,139 sq.m.

As of, June 30, 2009, the properties held for future development occupied an aggregate site area of approximately 57,158 sq.m., and had an expected aggregate GFA of approximately 34,200 sq.m.

As of June 30, 2009, the total development costs of Huanan Country Garden—Phases One to Five and Phase Seven (including the costs of land acquisition and construction) incurred were RMB3,020.5 million.

Huanan Country Garden—Phases One to Five and Phase Seven offers various types of products, including villas, townhouses, low-rise apartment buildings, high-rise apartment buildings and retail shops. In the nine years since the development commenced selling on May 1, 2000, more than 16,000 residents have moved in. Huanan Country Garden—Phases One to Five and Phase Seven features a clubhouse, an auditorium, a swimming pool, tennis courts, a kindergarten, a primary school, badminton courts, basketball courts, Chinese restaurants, a supermarket, table-tennis rooms, snooker rooms and reading rooms.

Huanan Country Garden—Phases One to Five and Phase Seven has been awarded the title of 2008 Guangzhou Model Living Community For Property Development (2008年廣東省物業管理示範住宅社區) by Guangdong Property Management Association (廣東省物業管理行業協會), 2005 China (Guangzhou) Harmonious Residential Community (2005年中國廣州和諧人居社區) by Nanfang Daily (南方都市報), 2004 Creditworthy Property Sale Certificate (誠信售樓認證) by Guangdong Construction News of Yangchang Evening Post (羊城晚報業集團廣東建設報) and Guangdong Property Enterprise Creditworthy Alliance (廣東省房地產企業誠信聯盟發起企業) and 2003 Top Ten Brand Developer (南方十大最佳品牌開發商) by the Real Estate Magazine (房地產導刊社).

Huanan Country Garden—Phase Six (華南碧桂園—六期)

Huanan Country Garden—Phase Six is located on Ying Bin Road, Nan Cun Town, Panyu District, Guangzhou City. It is being developed by Guangzhou Huanan Country Garden Property Development Co., Ltd., a project company owned equally by us and Guangzhou Zhencheng Property Development Co., Ltd. The project occupies an aggregate site area of approximately 300,033 sq.m., and has an expected aggregate GFA (including saleable and non-saleable GFA) of approximately 423,467 sq.m.

As of June 30, 2009, the completed properties occupied an aggregate site area of approximately 271,495 sq.m., and had an aggregate GFA (including saleable and non-saleable GFA) of approximately 408,391 sq.m. Construction of these properties commenced on July 7, 2004 and was completed on December 20, 2007. The completed properties comprised 2,500 residential flats, with an aggregate saleable GFA of approximately 407,552 sq.m. and one retail shop with an aggregate saleable GFA of approximately 60 sq.m. As of June 30, 2009, 2,500 residential flats with an aggregate saleable GFA of approximately 407,552 sq.m. had been sold and delivered. The remaining completed properties, which included sold but undelivered properties and unsold properties, comprised one retail shop with an aggregate saleable GFA of approximately 60 sq.m.

As of June 30, 2009, the properties under development occupied an aggregate site area of approximately 538 sq.m., and had an expected aggregate GFA (including saleable and non-saleable GFA) of approximately 1,076 sq.m. Construction of these properties commenced on October 15, 2004 and is expected to be completed in the fourth quarter of 2009.

As of June 30, 2009, the properties held for future development occupied an aggregate site area of approximately 28,000 sq.m. and were planned to be used for the construction of a primary school and kindergarten with an aggregate GFA of approximately 14,000 sq.m.

Construction of these properties commenced on September 20, 2007 and is expected to be completed in the second quarter of 2012. Upon completion, there will be 1,870 residential flats, with an aggregate saleable GFA of approximately 302,793 sq.m.

As of June 30, 2009, the properties held for future development occupied a aggregate site area of 732,495 sq.m., with an expected aggregate GFA (including saleable and non-saleable GFA) of approximately 635,902 sq.m.

As of June 30, 2009, the total development costs of Xing'anmeng Country Garden (including the costs of land acquisition) incurred were RMB501.6 million.

Xing'anmeng Country Garden offers townhouses and low-rise apartment buildings, and is expected to offer high-rise apartment buildings in the future. It also features a hotel developed to a five-star rating standard and a commercial street.

Suihua City, Heilongjiang Province

Suihua Country Garden (綏化碧桂園)

Suihua Country Garden is located at Zhongxingxi Avenue, Beilin District, Suihua City. It is being developed by Suihua Country Garden Property Development Co., Ltd., our wholly-owned project company. This development occupies an aggregate site area of approximately 262,400 sq.m. with an expected aggregate GFA (including saleable and non-saleable) of approximately 271,600 sq.m.

As of June 30, 2009, there was no completed property in Suihua Country Garden.

As of June 30, 2009, the properties under development occupied an aggregate site area of approximately 262,400 sq.m. and had an expected aggregate GFA (including saleable and non-saleable GFA) of approximately 271,600 sq.m. Construction of these properties commenced on September 25, 2008 and is expected to be completed in the fourth quarter of 2011. Upon completion, there will be 1,490 residential flats, with an aggregate saleable GFA of approximately 255,774 sq.m. and 172 retail shops with an aggregate saleable GFA of approximately 15,233 sq.m.

As of June 30, 2009, there was no property held for future development in Suihua Country Garden.

As of June 30, 2009, the total development costs of Suihua Country Garden (including the costs of land acquisition) incurred were RMB145.1 million.

Suihua Country Garden offers townhouses, and is expected to offer low-rise apartment buildings and retail shops in the future.

Tianjin Municipality

Tianjin Country Garden (provisional name) (天津碧桂園(暫定名))

Tianjin Country Garden is located at Balitai Town, Jinnan District, Tianjin City. It is being developed by Tianjin Country Garden Property Development Co., Ltd., our wholly-owned project company. This development occupies an aggregate site area of approximately 87,588 sq.m. and has an expected aggregate GFA (including saleable and non-saleable GFA) of approximately 145,155 sq.m.

As of June 30, 2009, there were no completed properties or properties under development in Tianjin Country Garden.

As of June 30, 2009, the properties held for future development occupied an aggregate site area of approximately 87,588 sq.m. and had an expected aggregate GFA of approximately 145,155 sq.m.

As of June 30, 2009, the total development costs of Tianjin Country Garden (including the costs of land acquisition) incurred were RMB753.4 million.

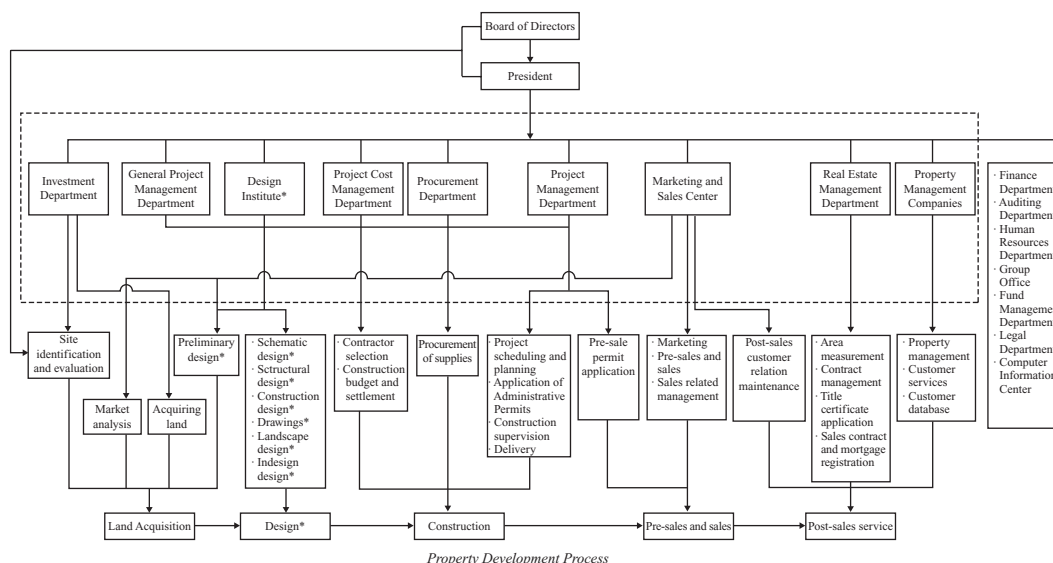

Tianjin Country Garden is expected to offer townhouses, low-rise apartment buildings, high-rise apartment buildings and retail shops in the future. It will also feature a hotel developed to a five-star rating standard.

Property development

As of June 30, 2009, we had 58 projects at various stages of development. Our properties are located in Guangzhou City, Foshan City, Jiangmen City, Yangjiang City, Shaoguan City, Zhaoqing City, Huizhou City, Shanwei City, Maoming City and Qingyuan City in Guangdong Province, Changsha City and Yiyang City in Hunan Province, Hulunbei'er City, Xing'anmeng and Tongliao City in Inner Mongolia, Taizhou City in Jiangsu Province, Shenyang City and Anshan City in Liaoning Province, Wuhan City, Jingmen City, Xianning City and Suizhou City in Hubei Province, Chaohu City, Chizhou City, Huangshan City, Wuhu City and Anqing City in Anhui Province, Suihua City in Heilongjiang Province, Tianjin Municipality and Chongqing Municipality. As of June 30, 2009, our projects had an aggregate completed GFA of approximately 13,756,052 sq.m., an aggregate GFA under development of approximately 13,399,110 sq.m., as well as an aggregate GFA of approximately 29,618,992 sq.m. relating to properties held for future development. For a profile of our property developments, please refer to the subsection headed "—Description of Our Property Projects" above.

Our property development and project management procedure

We integrate our resources to conduct land acquisition, planning, project design and construction, sales and post-sales support, and a series of development works. These areas are coordinated and supervised by our central management and carried out by our various functional departments, subsidiaries, and affiliates. The process is summarized in the following flow-chart, followed by a more detailed description of each stage of the process carried out by our various departments, subsidiaries and affiliates.

Note:

* Our project design work is mainly undertaken by Elite Architectural Co., an affiliate of our controlling shareholder. Our landscaping and greenery design was handled by Shunde Country Garden Co. before October 2006 and since then has been handled by an independent third party, Foshan Shunde Oasis Greenery Design Co., Ltd.

Site selection

Site selection is a fundamental step in our property development process. Our investment department, consisting of a team of full-time staff members, is responsible for identifying sites

for prospective property development. Our pre-acquisition site visits and investigations, in conjunction with research and analysis, enable us to understand the general trends and specific conditions of target property markets when assessing the suitability for development of a particular site. When selecting sites for our development projects, we usually apply the following criteria:

- geographical location of the development sites, for example, proximity and accessibility to city centers or business districts;
- property market conditions in the vicinity of the development site;
- local urban planning and specifications; and
- estimated cost, investment and financial return.

Our marketing and sales center and our design service providers are involved in the early stages of the site identification process. The marketing and sales center carries out research and analysis relating to potential market demand. Design services, including planning and concept design, are provided by Elite Architectural Co. which is our affiliate and principal design service provider.

Upon completion of the preliminary feasibility studies, our executive directors become more closely involved in the assessment process by conducting on-site visits before deciding whether to proceed with the acquisition of a site.

Once we have decided to acquire a site, Elite Architectural Co. begins its preliminary site-planning work.

Land acquisition

Prior to July 2002, we acquired some of our land use rights through a land grant contract or a land transfer agreement entered into with local government authorities. Since July 1, 2002, the PRC government introduced regulations requiring that the land transferred from government authorities be sold by a public tender, auction or listing-for-sale. Prior to submitting a tender, we analyze the market and estimate the budget required to develop the project. To acquire a parcel of land, we first need to be successful in the public tender, auction or the listing-for-sale process.

We have been able to acquire land at a relatively low price. Most of the land parcels acquired by us after 2004 have been relatively large in size. Although its unit price may not be high, the total may be substantial. In addition, when these parcels of lands were listed for auction, the property developer would be required to take responsibility for construction of the related infrastructure and urban development. With these additional responsibilities, the entry barrier for pursuing such property projects is relatively high. Only those property developers which have strong financial strength, integrated development capability, sound management and operational skills can develop such projects. We believe that there are only a handful of property developers in China which possess such capabilities. Among those developers, only a few have adopted development model and land acquisition strategies similar to ours.

As of June 30, 2009, we had an aggregate GFA under development and for future development of approximately 43,018,102 sq.m. for which we have obtained the relevant land use rights certificates. We estimate that our current land reserves will be sufficient for our development needs for the next three to five years.

In addition, as of June 30, 2009, our project companies had entered into land grant contracts in respect of land in various cities in Guangdong Province and five other provinces or provincial level municipalities, for which we have applied or are in the process of applying for land use rights certificates. Such land bank covers an aggregate site area of approximately 8,068,910 sq.m., with an aggregate expected GFA of approximately 10,553,831 sq.m. for future development.

In certain cases where we are interested in acquiring land, we assist local governments in clearing the land and relocate the original residents so that the land is ready for tender, auction and listing-for-sale. In such cases, we enter into land clearance agreements with the relevant land authorities, under which we are reimbursed for expenses we incur for land clearance and relocation and we are entitled to a portion of the profit realized by the local government on the land sale. We do not control the timing of the sale of the land use rights in the land that we have cleared, nor do we set the price for which such land use rights are sold. Sales of the land use rights are conducted by the relevant local government land authorities, through a bidding, auction or listing-for-sale process. If we are interested in bidding for the land, we are required to go through the tender, auction and listing-for-sale process as with other developers and there can be no assurance that we will win the bid. See "Risk Factors—Risks relating to our business—We may not receive full compensation for assistance we provide to local governments to clear land for government land sales".

Our ability to acquire land for development is subject to extensive regulations issued by the PRC central and local governments. Further to the requirement of public tender, auction and listing-for-sale, on October 10, 2007, the Ministry of Land and Resources issued a new regulation, which provides that property developers must fully pay the land premium for the entire parcel under the land grant contract before they can receive a land use rights certificate or commence development on the land, effective November 1, 2007. As a result, property developers are not allowed to bid for a large piece of land, make partial payment, and then apply for a land use rights certificate for the corresponding portion of land and commence development, which was the practice in many Chinese cities. The implementation of the regulation require property developers to maintain a higher level of working capital. We cannot assure you that our cash flow position, financial condition or business plans will not be materially and adversely affected as a result of the implementation of this regulation. We believe that larger property developers like ourselves generally are in a better position to compete for large pieces of land because they normally have stronger financial condition.

Financing property developments and land premium

Our financing methods vary from project to project. We are required by the PRC government to fund a substantial portion of our property developments with internal resources. The PRC government adjusted this internal capital ratio from time to time as one of its measures to monitor property developments in China. In April 2004, the PRC government increased this internal capital ratio from 20% to 35% to prevent overheating of the Chinese property sector. In May 2009, as part of its measures to combat the impact of the current global economic downturn, the PRC government lowered this ratio to 20% for protected housing projects and ordinary commodity housing projects and 30% for other property projects.

The balance of our project financing generally comes from a combination of bank loans and sales proceeds. We typically use internal funds to pay for the land acquisition costs and use internal

funds and project loans from PRC banks to finance the initial construction costs for our property developments. Bank financing therefore is an important source of funding for our property development projects. As of June 30, 2009, our outstanding borrowings (including Convertible Bonds) amounted to RMB14,974.8 million. Our operations generate additional cash through pre-sales after the properties meet the requirements of pre-sale under PRC regulations. Such proceeds from pre-sales, together with the project loans, are the major sources of funding for the construction of our property developments.

On June 5, 2003, the PBOC published the Notice on Further Strengthening the Management of Loans for Property Business (中國人民銀行關於進一步加強房地產信貸業管理的通知), which prohibits commercial banks from advancing loans to fund the payment of land premiums. As a result, property developers may use only their own funds to pay for land premiums. Following the publication of this notice, we have paid land premiums from the proceeds from the sale of properties and not from any of our outstanding bank borrowings. We plan to continue to use the proceeds from the sale of our properties, our other internal funds and proceeds from capital market financing to finance our future land premium payments. In addition, pursuant to the Guidance on Risk Management of Property Loans of Commercial Banks (商業銀行房地產貸款風險管理指引), issued on September 2, 2004, any property developer applying for property development loans must have, as its own working capital, at least 35% of the project capital required for the development. In May 2009, to combat the impact of the global economic slowdown and to encourage domestic consumption, the State Council issued the “Notice for Adjusting the Capital Ratio for Fixed Assets Investment Projects” (國務院關於調整固定資產投資項目資本金比例的通知). Under this notice, the internal capital ratio for protected housing projects and ordinary commodity housing projects was lowered from 35% to 20%, and the internal capital ratio for other property projects was lowered from 35% to 30%.

We obtain project loans from a number of commercial banks in the PRC, including major banks such as Agricultural Bank of China, Industrial and Commercial Bank of China, Bank of China, China Construction Bank, China Minsheng Banking Corp. Ltd. and Guangdong Development Bank. For seven consecutive years from 2002 to 2008, we have been ranked as one of the “Top 20 Creditworthy Property Developers” jointly by the South China Branch of People’s Daily and local branches of Industrial and Commercial Bank of China, Agricultural Bank of China, Bank of China, China Construction Bank and China Minsheng Banking Corp. Ltd.

We cannot assure you that we will be able to continue to obtain sufficient bank loans or facilities in the future. See “Risk Factors—Risk relating to our business—We may not have adequate funding resources to finance land acquisitions or property developments, or to service our financing obligations”.

Project design work

Our general design work is mainly undertaken by Elite Architectural Co., which is an affiliate of our controlling shareholder and is providing services to us on a priority basis. Our landscaping and greenery design was handled by Shunde Country Garden Co. until October 2006 and since has been mainly undertaken by Foshan Shunde Oasis Greenery Design Co., Ltd., an independent third party.

The design companies become involved in planning research and preliminary design work for a development project at the site selection and land acquisition stages. When determining the

design of a particular property development, the designers and engineers generally consider the recommendations of our marketing and sales center regarding product mix, project location and market conditions, as well as the regulatory requirements regarding the design. Involving the design companies at an early stage allows for the formulation of a preliminary design when we are negotiating with the government, enabling us to commence construction shortly after the requisite approval to develop a parcel of land has been granted. The overall time needed to complete the development is therefore reduced.

Construction work and procurement

Construction work

The construction phase of a development project begins once we obtain the Construction Permit for the project. The general project management department is responsible for the overall coordination and allocation of responsibilities in respect of the construction of each project area at different stages and supervises the progress of construction work. Prior to that, our project cost management department prepares the overall budget for a development at different stages. We set up a project company for each project to manage the whole property development project. The project company has a project manager, a project management department, a finance department and a sales department, all of which report to their corresponding functional departments at our headquarters.

Giant Leap Construction Co., our wholly-owned subsidiary, currently undertakes most of the construction work for our development projects in Guangdong Province. For the years ended December 31, 2006, 2007 and 2008 and the six months ended June 30, 2009, construction costs attributable to Giant Leap Construction Co. amounted to 86.8%, 54.3%, 47.3% and 31.8%, respectively, of our total construction costs. This decrease reflects a proportionate increase of our property projects outside Guangdong Province. Apart from a few related parties and other third parties, we are the principal customer of Giant Leap Construction Co..

As we develop more property projects outside Guangdong Province, we expect to outsource more construction work to third party contractors to leverage on their local expertise. In addition, when Giant Leap Construction Co. does not have adequate resources to deal with a particular development or when the projected profits from a project are not economically attractive, we outsource project construction work in whole or in part to independent third parties. In such outsourcing cases, we select construction contractors through a tender process organized by our project cost management department.

Under PRC national laws and regulations, a tender process is usually required to select the contractors for public construction projects. When a tender process is required for one of our projects, the Tender Law of the PRC (中華人民共和國招標投標法) will apply. Certain local governments in Guangdong Province may require that all construction projects go through a tender process.

Because of the growth in the number of our projects and their geographical coverage, we expect that we will increasingly engage the services of independent construction contractors. See "Risk Factors—Risks relating to our business—We will be increasingly affected by independent contractors". Without any long-term construction outsourcing contracts in place, we intend to work with a number of qualified contractor candidates in order to create a competitive environment among them.

Procurement

Currently, most of the construction work for our projects is undertaken by Giant Leap Construction Co., our wholly-owned subsidiary. Most of the supplies, including equipment and material, for our construction work undertaken by Giant Leap Construction Co. are centrally procured through our procurement department. Our procurement department typically solicits price quotes from at least two prospective suppliers, negotiates the price and other terms with them and finalizes the purchase arrangements with the winning supplier by signing price confirmations for regular supplies and executing procurement contracts for major equipment and constructions. Each transaction is initiated by a purchase order from our procurement department, and the suppliers are asked to deliver the supplies to locations specified by the relevant project companies or to our central warehouse, which has a computerized record-keeping system for inventory. Our centralized procurement system gives us more bargaining power and better cost control, enabling us to benefit from economies of scale.

When we outsource the construction work for a project to a third party contractor, the contractor generally undertakes the procurement of key construction materials such as steel, cement, sand and stone according to the specifications provided in the construction contract. The total contractor fee takes into account the costs of these materials and the construction contract typically allows adjustment to the total contractor fees if at the time of purchases, the prices of such construction materials have fluctuated beyond the range stipulated in the construction contract.

Fitting and decoration work

The finishing of most of our projects includes fitting and decoration in accordance with the standards set out in our design specifications for the project. Our wholly-owned subsidiary, Finest Decoration Co., provides most of the fitting and decoration services for our projects. Finest Decoration Co. will continue to provide fitting and decoration services exclusively for our projects in the future. We also outsource some components of the fitting and decoration work to independent third parties through a tender process.

Quality control

We have established procedures to ensure that the quality of our properties and services complies with relevant regulations and meets market standards. Quality control procedures are implemented by the relevant functional departments as well as by each project company. For each property development project, quality inspections and regulatory compliance reviews are carried out by the construction company, construction supervisory companies and our project management department.

In accordance with the PRC regulations, we engage the services of PRC-qualified third-party construction supervisory companies to supervise the construction of our property developments. These construction supervisory companies oversee, under a construction supervision contract, the progress and quality of the construction work of a property development throughout the construction phase.

We select construction supervisory companies through a tender process. In the past, we have often engaged Guangzhou Construction Supervision Co., Ltd (廣州建築工程監理有限公司), Guangzhou Jianfa Supervision Co., Ltd (廣州市建發監理有限公司), and Guangdong Jianke

Construction Supervision Co., Ltd (廣東建科建設監理有限公司), to supervise our property developments.

Pre-sales

Pre-sale of our property units commences before the completion of a project or a project phase. Under the Law of the Administration of Urban Real Estate of the PRC and the Administrative Measures governing the Pre-sale of Urban Real Estate (城市商品房預售管理辦法), as amended in 2001 and 2004, we must comply with the following conditions before pre-sales of a particular property can commence:

- the land premiums must have been fully paid and the land use rights certificates must have been obtained;
- the construction works planning permit and construction project building permit must have been obtained;
- the funds contributed to the development of the property developments where property units are to be pre-sold must reach 25% or above of the total amount to be invested in the project, the project must comply with the relevant governmental regulations and the expected completion date and delivery date of the construction work must have been ascertained; and
- pre-sale permits must have been obtained from the county-level construction bureau or property administration authority.

Local governments have also implemented regulations relating to pre-sales of properties. Some of these regulations contain stricter requirements than the central government regulations. We are subject to these local regulations in areas where we have property developments.

Under PRC law, the proceeds from the pre-sales of our properties must be deposited in escrow accounts. Before the completion of the pre-sold properties, the monies deposited in these escrow accounts may only be used to purchase construction materials and equipment, make interim construction payments and pay taxes, subject to prior approval from the relevant local authorities. See the section headed "Regulation" for further information on regulations that relate to pre-sales.

Marketing and sales

Our marketing and sales center is responsible for formulating and implementing our marketing and sales strategies. We support our marketing and sales activities through cooperation with external professional marketing and sales service providers. As of June 30, 2009, our marketing and sales team comprised 1,118 employees.

Our marketing and sales center is involved in our property development starting from the early stages and provides its input at key steps. When a potential project is identified by our investment department, our marketing and sales center conducts local property market research and studies the government's land policies. Before we decide to acquire land, our marketing and sales center provides the results of the research and analysis of the relevant land. During the land acquisition process, our marketing and sales center provides suggestions on the site plan and design. During the project design and construction processes, our marketing and sales center also

works closely with our project design companies to formulate, modify and execute a design plan according to consumer preferences and market feedback. Our sales team regularly provides customer feedback to Elite Architectural Co. and other departments for future improvements.

Customers

Local residents in Guangdong Province have historically been our core customer base. We expect to gradually broaden our customer base geographically when our projects outside Guangdong Province commence pre-sale. We also sell our properties to residents in Hong Kong, Macau and neighboring provinces. We target a broad base of customers with varied income levels and backgrounds, with middle-class customers as our primary targets.

Payment arrangements

Our customers, including those making pre-sales purchases, can pay with mortgage facilities arranged with banks. The mortgage payment terms for sales and pre-sales of properties are substantially the same. All purchasers are required to make a down payment of at least 20% of the purchase price when executing a purchase contract. A maximum 30-year mortgage loan for up to 80% of the purchase price may be available from the mortgage banks to the purchasers who are required to settle such amount within one or three months following the execution of the sales and purchase contract. Purchasers who pay within one month after execution of their sale and purchase contracts generally enjoy a slightly lower purchase price than those who pay within three months after execution of their sale and purchase contracts.

If purchasers choose not to finance their purchase with mortgage loan facilities, they are required to pay at least 30% of the purchase price at the time of the execution of the sale and purchase contract. In the case of a pre-sale, the remaining balance is payable within one or three months following the time of the execution of the sale and purchase contract. Purchasers who pay within one month after execution of the sale and purchase contracts generally enjoy a slightly lower purchase price than those who pay within three months after the execution of such the sale and purchase contracts. In the case of properties sold after completion, the remaining balance is payable within one month following the execution of the sale and purchase contract.

In accordance with market practice, we provide guarantees to banks for mortgage loans offered to our customers. Such guarantees are divided into short-term and long-term guarantees. Currently, our short-term guarantees are released upon the earlier of the issuance of the individual property ownership certificate (房產所有權證) to the owner of the property or the certificate of other rights of property (房地產他項權利證) to the mortgage bank by the relevant housing administration department, which are generally available within three months after we deliver the relevant property to our customers, or the full settlement of the mortgaged loan by our customers. Prior to 2003, we also provided long-term guarantees for the mortgage loans of some of our customers. These long-term guarantees were provided to increase confidence of the mortgage banks in providing mortgages to our customers in the then less sophisticated PRC property market. These guarantees are discharged two years from the day the mortgaged loans become due.

In line with customary practice in the industry, we do not conduct independent credit checks on our customers but rely on the credit checks conducted by the mortgage banks. As of December 31, 2006, 2007 and 2008, and June 30, 2009, our outstanding guarantees of the

mortgage loans of our customers amounted to RMB5,822.7 million, RMB9,637.3 million, RMB10,450.8 million and RMB11,262.6 million, respectively. As of June 30, 2009, RMB11,262.6 million of the total outstanding guarantees are long-term guarantees. Historically, we have not experienced material losses due to default of purchases on the mortgages loans. See “Risk Factors—Risk relating to our business—We guarantee the mortgages provided to our purchasers and, consequently, we are liable to the mortgagee banks if our purchasers default on their mortgage payments”.

Property management

Through our wholly-owned property management subsidiary, Guangdong Country Garden Property Management Co. Ltd. (“Guangdong Management Co.”), we provide post-sales property management and services to the residents of each of the projects we developed. Our property management subsidiary also provides services to certain projects that were not included among our projects in our group reorganization prior to listing. As of June 30, 2009, we had approximately 12,200 staff members working for our 52 property management branches. We aim to continue to provide to purchasers of our properties comprehensive post-sales property management and services, including public security and assistance with the management of public order, maintenance of public facilities, cleaning of public areas, domestic assistance, gardening and landscaping, intra-community shuttle bus operations and other customer services. We believe we have established a market reputation for the quality of these services. For example, Guangdong Management Co. has been certified by the Ministry of Construction as a class-one property management company, the highest level a PRC property management company can achieve.

Typically, our property management contracts set out the scope and the quality requirements of the services provided by our property management companies. We prepare maintenance and renovation plans for the properties and public facilities that we manage. We are not permitted by law to assign the management duties in their entirety to a third party. However, we can outsource some of the responsibilities, such as cleaning and security services, to independent third parties. The property management contracts also set out the management fee arrangements. We may not increase management fees without the prior consent of a majority of the owners of the properties.

Under PRC law, property owners have a right to engage or dismiss a property management company with the consent of more than half of the owners who in the aggregate hold more than 50% of the total non-communal area of the building. See “Risk Factors—Risk relating to our business—Our branding and marketing strategy as well as our financial condition could be adversely affected if owners of the projects that we have developed elect to stop using us to provide property management services”.

Hotel development and operation

Certain residential communities developed or to be developed by us include hotel and resort operations. Our hotel operations own and operate four five-star hotels, one four-star hotel and five hotels which we have developed in accordance with the five-star standard of the “Star-Rating Standard for Tourist Hotels”. In addition, we have 10 hotels that are under construction in accordance with the five-star standard of the “Star-Rating Standard for Tourist Hotels”. Under PRC laws, hotels cannot apply for star hotel certification until after one year of operations.

Generally, we apply for such star hotel certification for our hotels after their first year of operations.

While we believe that the demand for luxury hotels in China will increase as the economy of the region continues to grow and that our hotels and resorts will generate recurrent income for us in the long run, we do not focus on the revenue or profit contributions from our hotel business on a stand-alone basis. Rather, we believe that our hotel business assists in enhancing our brand name recognition in the property market and contributes to our overall marketing and sales strategies for, and the overall value of, our residential projects.

The availability of our hotel facilities to the residents of our property projects is usually seen as an attractive feature by potential purchasers of our properties.

Our commitment to building and running hotels in certain localities has received support from local governments, which seek to improve the local investment environment and attract more tourist traffic and business establishments to their jurisdictions.

The table below sets out details of our hotel developments and operations.

| Name of Hotel | Location | Opening Date | Number of Rooms | Star-rating ⁽¹⁾ |
|---|---|---------------|-----------------|---|
| Shunde Country Garden Holiday Resort (順德碧桂園度假村) | Shunde Country Garden, Foshan, Guangdong Province | February 2000 | 152 rooms | Four-star (in operation) |
| Guangzhou Country Garden Phoenix City Hotel (廣州碧桂園鳳凰城酒店) | Country Garden Phoenix City, Guangzhou, Guangdong Province | November 2003 | 573 rooms | Five-star (in operation) |
| Qingyuan Country Garden Holiday Islands Hotel (清遠市碧桂園假日半島酒店) | Qingyuan Holiday Islands Country Garden, Qingyuan, Guangdong Province | December 2004 | 201 rooms | Five-star (in operation) |
| Heshan Country Garden Phoenix Hotel (鶴山碧桂園鳳凰酒店) | Heshan Country Garden, Jiangmen, Guangdong Province | July 2005 | 280 rooms | Five-star (in operation) |
| Yangjiang Country Garden Phoenix Hotel (陽江碧桂園鳳凰酒店) | Yangjiang Country Garden, Yangjiang, Guangdong Province | May 2007 | 342 rooms | Five-star (in operation) |
| Wuyi Country Garden Phoenix Hotel (五邑碧桂園鳳凰酒店) | Wuyi Country Garden, Jiangmen, Guangdong Province | December 2005 | 95 rooms | According to five-star rating standard (in operation) |

| Name of Hotel | Location | Opening Date | Number of Rooms | Star-rating ⁽¹⁾ |
|--|---|-------------------------------|-----------------|---|
| Changsha Venice Palace Hotel (長沙威尼斯酒店) | Changsha Country Garden, Changsha, Hunan Province | October 2007 | 343 rooms | According to five-star rating standard (in operation) |
| Taishan Country Garden Phoenix Hotel (台山碧桂園鳳凰酒店) | Taishan Country Garden, Jiangmen, Guangdong Province | November 2007 | 337 rooms | According to five-star rating standard (in operation) |
| Zhaoqing Country Garden (肇慶碧桂園鳳凰酒店) | Zhaoqing Country Garden, Zhaoqing, Guangdong Province | February 2009 | 285 rooms | According to five-star rating standard (in operation) |
| Xinhui Country Garden Phoenix Hotel (新會碧桂園鳳凰酒店) | Xinhui Country Garden, Jiangmen, Guangdong Province | March 2009 | 374 rooms | According to five-star rating standard (in operation) |
| Gaoming Country Garden Phoenix Hotel (高明碧桂園鳳凰酒店) | Gaoming Country Garden, Foshan, Guangdong Province | September 2009 ⁽²⁾ | 337 rooms | According to five-star rating standard (under construction) |
| Suizhou Country Garden Phoenix Hotel (隨州碧桂園鳳凰酒店) | Suizhou Country Garden, Suizhou, Hubei Province | 2009 ⁽²⁾ | 378 rooms | According to five-star rating standard (under construction) |
| Chongqing Country Garden Phoenix Hotel (重慶碧桂園鳳凰酒店) | Changshou Country Garden, Chongqing, Chongqing Municipality | 2010 ⁽²⁾ | 336 rooms | According to five-star rating standard (under construction) |
| Wuhan Country Garden Phoenix Hotel (武漢碧桂園鳳凰酒店) | Wuhan Country Garden, Wuhan, Hubei Province | 2010 ⁽²⁾ | 334 rooms | According to five-star rating standard (under construction) |

| Name of Hotel | Location | Opening Date | Number of Rooms | Star-rating ⁽¹⁾ |

Notes:

(1) Hotels are only allowed to apply for star hotel certification after one year of operation.

(2) Expected opening date.

Competition

The property industry in the PRC is highly competitive. Competitive factors include the size of land reserves and the geographical location, the types of properties offered, brand recognition, price, and design product qualities. Our existing and potential competitors include major domestic state-owned and private property developers in the PRC, and, to a lesser extent, property developers from Hong Kong and elsewhere in Asia. A number of our competitors have greater financial, marketing, land and other resources than we have, as well as greater economies of scale, broader name recognition, a longer track record and more established relationships in certain markets. We believe our principal competitors include China Vanke Co., Ltd. (萬科企業股份有限公司) and Agile Property Holdings Limited (雅居樂地產控股有限公司) because they have a presence in the regions in which we operate. For more information on competition, please refer to the section headed "Risk Factors—Risks Relating to Our Business—Increasing

competition in the PRC, particularly in Guangdong Province, may adversely affect our business and financial condition”.

Intellectual property rights

Shunde Country Garden Co. has registered the trademarks and service marks of “碧桂園” in the form of Chinese characters, as well as in the form of logos, with the PRC Trademark Office (中華人民共和國商標局) under various categories including construction, realty leasing, realty management and realty agency.

On March 27, 2007, Shunde Country Garden Co. entered into a trademark license agreement with each of Qingyuan Country Garden Co., Jun’an Golf Club Co. and our original shareholders to grant them a non-exclusive right to use the “碧桂園” and certain other trademarks and service marks in respect of their businesses which, apart from Qingyuan Country Garden Co.’s business, are services ancillary to the housing properties constructed by us. Qingyuan Country Garden Co. has also granted Holiday Islands Hotel Co., our wholly-owned subsidiary, a non-exclusive right to use the trademarks and service marks of “假日半島 Holiday Islands” (with respect to which Qingyuan Country Garden Co. has applied to register as a trademark in the PRC) in its business operation pursuant to a trademark license agreement entered into between Qingyuan Country Garden and Holiday Islands Hotel Co. on March 27, 2007.

We also own the domain names “bgy.cn”, “bgy.com.cn”, “countrygarden.cn” and “countrygarden.com.cn”.

Insurance

We maintain public liability and assets insurance policies for our properties, the common facilities and the hotel operating areas of our properties. In addition, we carry social insurance for our employees, and our property management subsidiaries also maintain property management liability insurance coverage in connection with their business operations. We do not, however, maintain insurance coverage for non-performance of contract during construction and other risks associated with construction and installation works during the construction period. Consistent with what we believe to be customary practice in the property development industry in China, we also do not maintain insurance against personal injuries or property damage that may occur during the construction of our properties, except that we carry accidental insurance (i.e., employer’s liability insurance) against personal injuries that may occur to construction workers.

To help ensure construction quality and safety, we have a set of standards and specifications for the construction workers to follow during the construction process. We engage qualified supervision companies to oversee the construction process. Under PRC law, the owner or manager of properties under construction bears civil liability for personal injuries arising out of construction work unless the owner or manager can prove that it is not at fault. Since we have taken the above steps to prevent construction accidents and personal injuries, we believe that we will generally be able to demonstrate that we were not at fault as the property owner if a personal injury claim is brought against us.

We believe that we have sufficient insurance coverage in place and that the terms of our insurance policies are in line with industry practice in the PRC. However, our insurance coverage may not be sufficient for losses and damages that may arise in our business operations. See “Risk Factors—Risks relating to our business—We do not have insurance to cover potential losses and claims in our operations” and “Regulation”.

Employees

As of December 31, 2006, 2007, 2008 and as of June 30, 2009, we had approximately 17,968, 27,839, 29,068 and 25,234 full-time employees, respectively. The following table provides a breakdown of our employees by responsibilities as of June 30, 2009:

| | |
|---|---------------|
| Administration and Human Resources Management | 187 |
| Marketing and Sales | 1,118 |
| Finance Management | 501 |
| Property Project Management | 1,755 |
| Construction and Decoration Management | 6,442 |
| Property Management | 12,200 |
| Hotel | <u>3,031</u> |
| | <u>25,234</u> |

As of June 30, 2009, approximately 12,358 of our full-time employees had post secondary education. The remuneration package of our employees includes salary, bonus and other cash subsidies. In general, we determine employee salaries based on each employee's qualification, position and seniority. We have designed an annual review system to assess the performance of our employees, which forms the basis of our determination on salary raise, bonus and promotion. We are subject to social insurance contribution plans organized by the PRC local governments. In accordance with the relevant national and local labor and social welfare laws and regulations, we are required to pay, on behalf of our employees, a monthly social insurance premium covering pension insurance, medical insurance, unemployment insurance and housing reserve fund. We believe the salaries and benefits that our employees receive are competitive in comparison with market rates.

Our employees do not negotiate their terms of employment through any labor union or by way of collective bargaining agreements. We believe our relationship with our employees is good. We have not experienced significant labor disputes which adversely affected or are likely to have an adverse effect on the operations of our business had occurred.

Environmental matters

We are subject to a variety of laws and regulations concerning environmental protection. See "Risk Factors—Risks relating to our business—Potential liability for environmental problems could result in substantial costs". As of the date hereof we are not in breach of any applicable environmental laws and regulations which has led to penalties imposed by the environmental authorities and there are no existing material legal proceedings, arbitrations or administrative penalties against us.

Legal proceedings

From time to time, we have been involved in legal proceedings or other disputes in the ordinary course of our business which are primarily disputes with our customers, and we have not incurred significant legal costs and expenses in relation to our overall operating results. We are not aware of any other material legal proceedings, claims or disputes currently existing or pending against us that may have a material adverse impact on our business or our results of operations.

Regulation

Legal supervision relating to property sector in the PRC

A. Establishment of a property development enterprise

Pursuant to the “Law of the People’s Republic of China on Administration of Urban Real Estate” (the “Urban Real Estate Law”) enacted by the Standing Committee of the National People’s Congress on July 5, 1994, effective in January 1995 and as amended on August 30, 2007, a property developer is defined as “an enterprise which engages in the development and sale of property for the purposes of making profits”. Under the “Regulations on Administration of Development of Urban Real Estate” (the “Development Regulations”) enacted by the State Council and enforced on July 20, 1998, a property development enterprise must satisfy the following requirements: (1) have a registered capital of not less than RMB1 million and (2) have four or more full-time professional property/construction technicians and two or more full-time accounting officers with the relevant qualifications. The Development Regulations also stipulates that people’s governments of the provinces, autonomous regions or municipalities directly under the central government may impose more stringent requirements regarding the registered capital and qualifications of professional personnel of a property development enterprise according to the local circumstances.

Pursuant to the Development Regulations, applications for registration of a property development enterprise have to be submitted to the department of administration of industry and commerce. The applicant must file a record with the property development authority in the location of the registration authority within 30 days of the receipt of its business license.

The minimum internal capital ratio for property projects (excluding economically affordable housing projects) was 35% under the “Notice on Adjusting the Portion of Capital Fund for Fixed Assets Investment of Certain Industries” issued by the State Council on April 26, 2004. In May 2009, the State Council issued a “Notice on Adjusting the Percentage of Capital Fund for Investment Projects in Fixed Assets” and reduced such ratio to 20% for ordinary commodity housing projects and affordable housing projects and 30% for other property projects.

B. Foreign-invested property development enterprises

Pursuant to the “Foreign Investment Industrial Guidance Catalog” (the “Guidance Catalog”) jointly enacted by MOFCOM and NDRC on November 30, 2004 and enforced on January 1, 2005, the development and construction of ordinary residential units fall within the category of “encouraged industry”; the development of a whole land lot operated by Sino-foreign equity joint venture or Sino-foreign co-operative joint venture, and the construction and operation of high-end hotels, villas, premium office buildings, international conference centers and large theme parks fall within the category of “restricted industry”; other types of property development fall within the category of “permitted industry”. The MOFCOM and NDRC amended the Guidance Catalog in October 2007 which provides that, effective from December 1, 2007, foreign invested property development business falls within the category of permitted industry, except that foreign investment in the development of a whole land lot which shall be operated only by sino-foreign equity joint ventures or sino-foreign co-operative joint ventures, the construction and operations of high-end hotels, villas, premium office buildings and international conference centers, property transactions in the secondary market and property intermediaries fall within the category of industries in which foreign investment is subject to restrictions. Foreign-invested real estate development enterprises can be established in the form of Sino-foreign equity joint venture, Sino-foreign co-operative joint venture

or wholly-owned foreign enterprise according to the Guidance Catalog and other laws and administrative regulations relating to foreign-invested enterprises. Prior to the application for registration to the department of administration of industry and commerce, the enterprise must be approved by the authorities of commerce and obtain an approval certificate for a foreign-invested enterprise.

On July 11, 2006, the Ministry of Construction, the MOFCOM, the NDRC, the PBOC, the SAIC and the SAFE jointly enacted the "Circular on Standardizing the Admittance and Administration of Foreign Capital in the Real Estate Market" (Jianzhufang [2006] No. 171). According to this circular, foreign investment in property market must comply with the following requirements:

(a) Foreign institutions or individuals purchasing property in China is not for their own residential use shall follow the principle of commercial existence and apply for establishment of foreign-invested enterprises under the regulations of foreign investment in property. Foreign institutions and individuals can only carry on their business pursuant to the approved business scope after obtaining the approvals from relevant authorities and upon completion of the relevant registrations.

(b) If the total investment of a foreign-invested real estate development enterprise exceeds or equals US\$10 million, the registered capital must not be less than 50% of the total investment. If the total investment is less than US\$10 million, the amount of the registered capital shall follow the existing regulations.

(c) The commerce authorities and the department of administration of industry and commerce are in charge of granting approval for establishment and effecting registration of foreign-invested real estate development enterprises and issuing approval certificates for foreign-invested enterprises and business licenses which are only effective for one year. After paying for the land use right, the enterprises should apply for the land use rights certificate by presenting the above-mentioned approval certificates and business licenses. With the land use rights certificate, the enterprises will receive an official approval certificate for a foreign-invested enterprise from the commerce authorities, and shall replace the business license with one that has the same operational term as the formal approval certificate for foreign-invested enterprise in the department of administration of industry and commerce, and then apply for tax registration with the tax authorities.

(d) Transfers of projects or shares in foreign-invested real estate development enterprises, and the acquisitions of domestic real estate development enterprises by foreign investors should strictly follow the relevant laws, regulations and policies to obtain approvals. Foreign investors should submit: (a) the guarantee letters for the performance of the State-owned Land Use Rights Grant Contracts, Construction Land Planning Permit and Construction Work Planning Permit; (b) Certificate of Land Use Rights; (c) the certification on alteration of archival files issued by construction authorities; and (d) the certification on the payment of tax issued by the relevant tax authorities.

(e) When acquiring domestic real estate development enterprises by way of share transfer or otherwise, or purchasing shares from Chinese parties in Sino-foreign equity joint ventures, unsound foreign investors should make proper arrangement for the employees, settle the bank loans and pay the consideration in one single payment with its internal fund. Foreign investors with financial track records shall not be allowed to conduct any of the aforementioned activities.

On May 23, 2007 the MOFCOM and the SAFE jointly issued the “Notice on Further Strengthening and Regulating the Approval and Supervision on Foreign Investment in Real Estate Sector in the PRC”, which stipulates the following requirements for the approval and supervision of foreign investment in property sector:

- foreign investment in the PRC property sector relating to luxury properties should be strictly controlled;
- before obtaining approval for the establishment of property entities with foreign investment, (i) both the land use rights certificates and housing ownership right certificates should have been obtained or, (ii) contracts for obtaining land use rights or housing ownership rights should be entered into;
- entities which have been set up with foreign investment, need to obtain approval before they expand their business operations into the property development, and entities which have been set up for property development operations need to obtain new approval in order to expand their property business operations;
- acquisitions of property entities and foreign investment in the property sector by way of “round-trip” investment(返程投資) should be strictly regulated. Foreign investors should not avoid approval procedures by changing actual controlling persons;
- parties to property entities with foreign investment, should not in any way guarantee a fixed investment return;
- registration shall be immediately effected according to applicable laws with MOFCOM regarding the setup of property entities with foreign investment approved by local PRC governmental authorities;
- foreign exchange administration authorities and banks authorized to conduct foreign exchange business should not effectuate foreign exchange settlements regarding capital account items to those who fail to file with MOFCOM or fail to pass the annual reviews; and
- for those property entities who are wrongfully approved by local authorities for their setups, (i) MOFCOM should carry out investigation and order punishment and corrections, and (ii) foreign exchange administrative authorities should not carry out foreign exchange registrations for them.

On July 10, 2007, the General Affairs Department of the SAFE issued the “Notice Regarding the Publication of the List of the First Batch of Property Development Projects with Foreign Investment That Have Properly Registered with the MOFCOM” (關於下發第一批通過商務部備案的外商投資房地產專案名單的通知) (“Notice No. 130”). This new regulation restricts the ability of foreign-invested property companies to raise funds offshore for the purposes of injecting such funds into the companies either through a capital increase or by way of shareholder loans. Notice No. 130 stipulates, among other things, that:

- the SAFE will no longer process foreign debt registrations or applications for purchase of foreign exchange submitted by real estate enterprises with foreign investment that obtained authorization certificates from and registered with the MOFCOM on or after June 1, 2007; and
- the SAFE will no longer process foreign exchange registrations (or change of such registrations) or applications for sale and purchase of foreign exchanges submitted by

real estate enterprises with foreign investment that obtained approval certificates from local government commerce departments on or after June 1, 2007 but that have not registered with the MOFCOM.

In June 2008, to strengthen regulation of real estate enterprises with foreign investment, the MOFCOM issued the “Notice Regarding Completing the Registration of Foreign Investment in the Real Estate Sector” (關於做好外商投資房地產業備案工作的通知) (“Notice No. 23”). According to Notice No. 23, when a foreign-invested real estate enterprise is established or increases its registered capital, the provincial level MOFCOM is required to verify all records regarding such foreign-invested real estate enterprise. Notice No. 23 also requires that each foreign-invested real estate enterprise undertake only one approved property project.

On August 29, 2008, the SAFE issued the “Circular on the Relevant Operating Issues Concerning Improving the Administration of Payment and Settlement of Foreign Exchange Capital of Foreign-Invested Enterprises”, or “Circular No. 142”. Pursuant to Circular No. 142, Renminbi fund from the settlement of foreign currency capital of a foreign-invested enterprise must be used within the business scope of the enterprise as approved by the examination and approval department of the government, and cannot be used for domestic equity investment unless it is otherwise provided for in other regulations.

Under the Guidance Catalog, real estate enterprises with foreign investment are restricted from developing whole land lots and constructing and operating high-end hotels, villas, premium office buildings, international conference centers, golf courses and large theme parks in China. According to the “Interim Provisions on Approving Foreign-Invested Projects” promulgated by the NDRC in October 2004, local authorities may examine and approve (i) foreign-invested projects with total investment less than US\$100 million within the category of encouraged or permitted foreign investments and (ii) foreign-invested projects with total investment less than US\$50 million within the category of foreign investments subject to restrictions. Approval from the NDRC is required for foreign-invested projects with total investment of US\$100 million or more within the category of encouraged or permitted foreign investments and those with total investment of US\$50 million or more within the category of foreign investments subject to restrictions. Further, apart from examination by the NDRC, approval from the State Council is required for foreign-invested projects with total investment of US\$500 million or more within the category of encouraged or permitted foreign investments and those with total investment of US\$100 million or more within the category of foreign investments subject to restrictions. Additional approval from the development and reform authority at provincial level is required for projects that are subject to restrictions. In July 2008, the NDRC issued the “Notice on Further Reinforcing and Regulating the Administration of Foreign-Invested Projects”, which requires that any capital increase and reinvestment in projects by foreign-invested enterprises should obtain approval from the NDRC or its local counterpart.

C. Qualifications of a property developer

(a) Classifications and assessment of a real estate development enterprise’s qualification

Under the “Provisions on Administration of Qualifications of Real Estate Developers” (the “Provisions on Administration of Qualifications”) promulgated by the Ministry of Construction and in March 2000, a property developer shall apply for registration of its qualifications according to the Provisions on Administration of Qualifications. An enterprise may not engage in the development and sale of property without a qualification classification certificate for property development.

In accordance with the Provisions on Administration of Qualifications, property developers are classified into four classes. Developers with class 1 qualifications shall be subject to preliminary examination and approval by the construction authority under the government of the relevant province, autonomous region or municipality directly under the central government and then final approval by the construction authority under the State Council. Procedures for approval of developers with class 2 or lower qualifications shall be formulated by the construction authority under the government of the relevant province, autonomous region or municipality directly under the central government. A developer that passes the qualification examination will be issued a qualification certificate of the relevant class by the qualification examination authority. After a newly established property developer reports its establishment to the property development authority, the latter shall issue a provisional qualification certificate to the eligible developer within 30 days of receipt of the report. The provisional qualification certificate shall be effective for one year from the date of its issuance. The property development authority can extend the validity period for not more than two years after considering the actual business condition of the enterprise. The property developer shall apply for a qualification classification by the property development authority within one month before the expiry of the provisional qualification certificate.

(b) The business scope of a property developer

Under the Provisions on Administration of Qualifications, a developer of any qualification classification may only engage in the development and sale of property within its approved scope of business and may not engage in business which is limited to another classification. A class 1 property developer is not restricted as to the scale of a property project to be developed and may undertake a property development project anywhere in the country. A class 2 property developer or lower may undertake a project with a GFA of less than 250,000 sq.m. and the specific scope of business shall be as confirmed by the construction authority under the government of the relevant province, autonomous region or municipality.

(c) The annual inspection of a property developer's qualification

Pursuant to the Provisions on Administration of Qualifications, the qualification of a property developer shall be inspected annually. The construction authority under the State Council or its authorized institution is responsible for the annual inspection of a class 1 property developer's qualification. Procedures for annual inspection of developers of a class 2 or lower qualification shall be formulated by the construction authority under the people's government of the relevant province, autonomous region or municipality.

D. Development of a property project

(a) Land for property development

Under the "Interim Regulations of the People's Republic of China on Assignment and Transfer of the Right to Use State-Owned Land in Urban Areas" (the "Interim Regulations on Assignment and Transfer") promulgated and enforced by the State Council on May 19, 1990, a system of grant and transfer of the right to use state-owned land is adopted. A land user shall pay a premium to the state as consideration for the grant of the land use rights within a certain term, and the land user may transfer, lease, mortgage or otherwise commercially use the land use rights within the term of use. Under the Interim Regulations on Assignment and Transfer and the Urban Real Estate law, the land administration authority under the local government of the

relevant city or county shall enter into a land grant contract with the land user for the grant of the land use rights. The land user shall pay the land premium as provided for by the land grant contract. After payment in full of the land premium, the land user shall register with the land administration authority and obtain a land use rights certificate evidencing the acquisition of land use rights. The Development Regulations provide that land use rights for a site intended for property development shall be obtained through government grant except for land use rights which may be obtained through allocation pursuant to the PRC laws or the stipulations of the State Council.

Under the "Regulations on the Assignment of State-Owned Land Use Rights through Competitive Bidding, Auction and Listing-for-Sale" enacted by the Ministry of Land and Resources on May 9, 2002 and enforced on July 1, 2002, land for commercial use, tourism, entertainment and commodity housing development is assigned by way of competitive bidding, public auction or listing-for-sale. The procedures are as follows:

(a) The land authority under the people's government of the city and county (the "assignor") shall make an announcement at least 20 days prior to the date of the proposed competitive bidding, public auction or listing-for-sale. The announcement should include basic particulars such as land parcel, the qualification requirement of the bidder and auction applicants, methods and criteria on confirming the winning tender or winning bidder, and other conditions such as the deposit for the bid.

(b) The assignor shall conduct a qualification verification of the bidding applicants and auction applicants, inform the applicants who satisfy the requirements set out in the announcement and invite them to attend the competitive bidding, public auction or listing-for-sale.

(c) After determining the winning tender or the winning bidder by either competitive bidding, public auction or listing-for-sale, the assignor and the winning tender or winning bidder shall then enter into a confirmation. The assignor should return the bidding or tender deposits to other bidding or auction applicants.

(d) The assignor and the winning tender or winning bidder shall enter into a contract for the grant of state-owned land use rights according to the time and venue set out in the confirmation. The deposit of the bid paid by the winning tender or winning bidder will be used to set off part of the land premium for the grant of the state-owned land use rights.

(e) The winning tender or winning bidder should apply for the land registration after paying off the land grant premium in accordance with the state-owned land use rights grant contract. The people's government above the city and county level should issue the "Land Use Permit for State-Owned Land".

According to the "Notice of the Ministry of Land and Resources on Relevant Issues Concerning the Strengthening of Examination and Approval of Land Use in Urban Construction" enacted by the Ministry of Land and Resources on September 4, 2003, land use for luxurious commodity houses shall be stringently controlled and applications for land use for building villas will not be accepted. On May 30, 2006, the Ministry of Land and Resources issued the "Urgent Notice of Further Strengthening the Administration of the Land" (the "Urgent Notice") stipulating that land for property development must be assigned by way of competitive bidding, public auction or

listing-for-sale, development projects for villas should not be permitted, and all supply of land for such purposes and the handling of related land use procedure will be ceased from issuance date of the notice.

Under the Urgent Notice, the land authority should rigidly execute the “Model Text of the State-owned Land Use Rights Assignment Contract” and “Model Text of the State-owned Land Use Rights Assignment Supplementary Agreement (for Trial Implementation)” jointly enacted by the Ministry of Land Resources and SAIC. The document of the land grant should ascertain the requirement of planning, construction and land use such as the restriction of the dwelling size, plot ratio and the time limit of starting and completion. All these should be agreed in the land use rights grant contract.

Under the “Regulations on the Assignment of State-Owned Land for Construction Use Rights through Competitive Bidding, Auction and Listing-for-Sale” enacted by the Ministry of Land and Resource on September 28, 2007, and enforced on November 1, 2007, land for industrial use (including land for warehouses but not include land for mining), commercial use, tourism, entertainment and commodity housing development or more than two competing users on one piece of land shall be assigned by way of competitive bidding, public auction or listing-for-sale. The assignee should obtain the land use rights certificate after paying off the total premium. The relevant land use rights certificates will not be issued prior to full payment of the appropriate land premium, and no land use rights certificates will be issued pro rata based on partial payment received.

(b) Development of a property project

i. Commencement of a property project and the idle land

Under the Urban Real Estate Law, those who have obtained the land use rights through an assignment must develop the land in accordance with the terms of use and within the period of commencement prescribed in the land use rights assignment contract. According to the “Measures on Disposing Idle Land” enacted and enforced by the Ministry of Land and Resources on April 28, 1999, land can be defined as idle land under any of the following circumstances:

- where development and construction of the land has not commenced within the prescribed time limit right without consent from the people’s government who approved the use of the land;
- where the “Contract on Paid Use of the Right to Use State-Owned Land” or the “Approval Letter on Land Used for Construction” has not prescribed the date of commencing the development and construction, the development and construction of the land has not commenced by one year from the date when the “Contract on Paid Use of the Right to Use State-Owned Land” became effective or when the administrative department of land issued the “Approval Letter on Land Used for Construction”;
- where the development and construction of the land has commenced but the area of the development and construction that has commenced is less than one-third of the total area to be developed and constructed or the invested amount is less than 25% of the total amount of investment, and the development and construction have been continuously suspended for one year or more without an approval; or
- other circumstances prescribed by laws and regulations.

After a piece of land which has been ascertained as idle land, the relevant municipal authority will notify the concerned land user and draft a proposal on methods of disposal of the idle land including but not limited to extending the time period for development and construction (provided that the extension shall be no longer than one year), changing the use of the land, arranging for temporary use, ascertaining a new land user by competitive bidding or public auction. The administrative department of land under the people's government of city or county level shall, after the proposal on disposal has been approved by the original people's government who approved the use of the land, arrange for implementation of the proposal. For land which is obtained by assignment and is within the scope of city planning, if the work has not commenced after one year from the prescribed date of commencement, a surcharge on idle land equivalent to a maximum of 20% of the assignment price may be levied; if the work has not been commenced after two years from the prescribed date of commencement, the land can be confiscated without any compensation. However, the preceding stipulations shall not apply if the delay is caused by force majeure, acts of government or acts of other relevant departments under the government, or by the indispensable preliminary work.

On January 3, 2008, the State Council reiterated the abovementioned policies in the "Notice on Enhancing the Economical and Intensive Use of Land". This notice states, among other things, that (i) policies in relation to the forfeiture of land use rights without compensation for land which has remained idle for more than two years shall be strictly implemented; (ii) if any land remains idle for one year, an idle land fee of 20% of the relevant land premium shall be levied; (iii) the prohibition of land supply for villa projects shall continue; (iv) the Ministry of Land and Resources and other authorities are required to research and commence the drafting of implementation rules concerning the levy of LAT on idle land; (v) in relation to the supply of residential land, planning conditions such as plot ratio limits and the number and type of flats that can be constructed shall be taken into account in land grant contracts and allocation decisions to ensure that at least 70% of the total land grant for residential development will consist of low rental housing, economy housing, limited pricing housing and units of less than 90 sq.m. in size; and (vi) financial institutions are required to exercise caution when approving financing for any property developer who, after one year from the commencement date stipulated in the land grant contract, fails to complete at least one-third of the development of their project or provide at least 25% of the total investment in the project.

ii. Planning of a property project

According to the "Urban and Rural Planning Law of the People's Republic of China (replacing the previous "City Planning Law of the People's Republic of China" since January 2008), the "Measures for Control and Administration of Assignment and Transfer of Right to Use Urban State-owned Land" enacted by the Ministry of Construction on December 4, 1992 and enforced on January 1, 1993 and the "Notice of the Ministry of Construction on Strengthening the Planning Administration of Assignment and Transferring Right to Use State-owned Land" enacted and enforced by the Ministry of Construction on December 26, 2002, after signing an assignment contract, a property developer shall apply for an Opinion on Construction Project's Site Selection and a Permit for Construction Site Planning from the city and county planning authority with the assignment contract. After obtaining a Permit for Construction Site Planning, a property developer shall organize the necessary planning and the design work with regard to planning and design requirements, and apply for a Permit for Construction Work Planning from city planning authority with the relevant approval documents.

iii. Construction of a property project

After obtaining the Permit for Construction Work Planning, a property developer shall apply for a Construction Permit from the construction authority above the county level according to the "Measures for the Administration of Construction Permits for Construction Projects" enacted by the Ministry of Construction on October 15, 1999 and revised and enforced on July 4, 2001.

iv. Completion of a property project

According to the Development Regulation, the "Regulation on the Quality Management of Construction Projects" enacted and enforced by the State Council on January 30, 2000, the "Interim Measures for Reporting Details Regarding Acceptance Examination Upon Completion of Buildings and Municipal Infrastructure" enacted by the Ministry of Construction in April 2000 and the "Interim Provisions on Acceptance Examination Upon Completion of Buildings and Municipal Infrastructure" enacted and enforced by the Ministry of Construction on June 30, 2000, after completion of work for a project, a property developer shall apply for the acceptance examination to the property development authority under the people's government on or above the county level and report details of the acceptance examination, upon which the "Record of acceptance examination upon project completion" is issued. For a housing estate or other building complex project, an acceptance examination shall be conducted upon completion of the whole project and where such a project is developed in phases, separate acceptance examination may be carried out for each completed phase.

E. Property transactions

(a) Transfer of property

According to the "Urban Real Estate Law" and the "Provisions on Administration of Transfer of Urban Real Estate" enacted by the Ministry of Construction on August 7, 1995 and revised on August 15, 2001, a property owner may sell, give or otherwise legally transfer a property to another person or legal entity. When transferring a building, the ownership of the building and the land use rights attached to the site on which the building is situated are transferred simultaneously. The parties to a transfer shall enter into a property transfer contract in writing and register the transfer with the property administration authority having jurisdiction over the location of the property within 90 days of the execution of the transfer contract.

Where the land use rights were originally obtained by assignment, the real property may only be transferred on the condition that: (a) the assignment price has been paid in full for the assignment of the land use rights as provided by the assignment contract and a land use rights certificate has been obtained; and (b) if development is to be carried out according to the assignment contract and is a project in which buildings are being developed, development representing more than 25% of the total investment has been completed.

If the land use rights were originally obtained by assignment, the term of the land use rights after transfer of the property shall be the remaining portion of the original term provided by the land use rights assignment contract after deducting the time that has been used by the former land users. In the event that the transferee intends to change the use of the land provided in the original assignment contract, consent shall first be obtained from the original assignor and the planning administration authority under the local government of the relevant city or county and an agreement to amend the land use rights assignment contract or a new land use rights

assignment contract shall be signed in order to, inter alia, adjust the land use rights assignment price accordingly.

If the land use rights were originally obtained by allocation, transfer of the real property shall be subject to the approval of the government vested with the necessary approval power as required under the regulations of the State Council. If the people's government vested with the necessary approval power approves such a transfer, the transferee shall complete the formalities for transfer of the land use rights, unless the relevant statutes require no transfer formalities, and pay the transfer price according to the relevant statutes.

(b) Sale of commodity properties

Under the "Regulatory Measures on the Sale of Commodity Properties" enacted by the Ministry of Construction on April 4, 2001 and enforced on June 1, 2001, sale of commodity properties can include both pre-completion and post-completion sales.

i. Permit of Pre-Completion Sale of Commodity Properties

According to the Development Regulations and the "Measures for Administration of Pre-completion Sale of Commodity Properties" (the "Pre-completion Sale Measures") enacted by the Ministry of Construction on November 15, 1994 and revised on August 15, 2001 and July 20, 2004 respectively, the pre-completion sale of commodity properties shall be subject to a permit system, under which a property developer intending to sell a commodity building before its completion shall make the necessary pre-completion sale registration with the property development authority of the relevant city or county to obtain a permit of pre-completion sale of commodity properties. A commodity building may only be sold before completion provided that: (a) the assignment price has been paid in full for the assignment of the concerned land use rights and a land use rights certificate has been issued; (b) a Permit for Construction Work Planning and a Permit for Construction of Work have been obtained; (c) the funds invested in the development of the commodity properties put to pre-completion sale represent 25% or more of the total investment in the project and the progress of work and the completion and delivery dates have been ascertained; and (d) the pre-completion sale has been registered and a Permit for Pre-completion Sale of Commodity Properties has been obtained.

In addition, according to the "Regulations on Administration of Pre-completion Sale of Commodity Properties of Guangdong Province" enacted by the Standing Committee of Guangdong Provincial People's Congress on August 22, 1998 and revised on October 14, 2000, and the "Notice on Adjusting Conditions of Image and Progress for Commodity Building Pre-sale Project in Guangdong Province" issued by the Guangdong Provincial Construction Bureau in January 2001, the following conditions shall be fulfilled for the pre-completion sale of commodity properties in Guangdong: (a) the property developer has obtained a real property development qualification certificate and a business license; (b) the construction quality and safety monitoring procedures have been performed; (c) the structural construction and the topping-out must have been completed in respect of properties of not more than seven stories (including seven stories), and at least two-third of the structural construction must have been completed in respect of properties of more than seven stories; (d) a special property pre-completion sale account with a commercial bank in the place where the project is located has been opened; and (e) the properties, pre-completion sale project and its land use rights are free from any third party rights.

ii. Management of pre-completion sale proceeds of commodity properties

According to the Pre-completion Sale Measures, the proceeds obtained by a property developer from the advance sale of commercial houses must be used for the construction of the relevant projects. The specific measures for the supervision on proceeds from the advance sale of commodity properties shall be formulated by the property administrative departments.

iii. Conditions of the sale of post-completion commodity properties

Under the "Measures for Administration of Sale of Commodity Properties", commodity properties may be put to post-completion sale only when the following preconditions have been satisfied: (a) the real estate development enterprise offering to sell the post-completion properties shall have a enterprise legal person business license and a qualification certificate of a property developer; (b) the enterprise has obtained a land use rights certificate or other approval documents of land use; (c) the enterprise has the permit for construction project planning and the permit for construction; (d) the commodity properties have been completed and been inspected and accepted as qualified; (e) the relocation of the original residents has been well settled; (f) the supplementary essential facilities for supplying water, electricity, heating, gas, communication, etc. have been made ready for use, and other supplementary essential facilities and public facilities have been made ready for use, or the schedule for construction and delivery date thereof have been specified; and (g) the property management plan has been completed.

Before the post-completion sale of a commodity building, a property developer shall submit the Real Estate Development Project Manual and other documents showing that the preconditions for post-completion sale have been fulfilled to the property development authority for making a record.

iv. Regulations on sale of commodity properties

According to the Development Regulations and the Pre-completion Sale Measures, for the pre-completion sale of a commodity property, the developer shall sign a contract on the pre-sale of the commodity property with the purchaser. The developer shall, within 30 days upon signing the contract, apply for registration and record of the contract for pre-completion sale commodity property to the relevant administrative departments governing the property and land administration department of the city or country governments. Property administrative department shall take the initiative to apply network information technology to gradually implement the web-based registration of pre-sale contracts.

Pursuant to the "Circular of the General Office of the State Council on Forwarding the Opinion of the Ministry of Construction and Other Department on Doing a Good Job of Stabilizing House Prices" on May 9, 2005, there are several regulations concerning commodity properties sale:

- The buyer of a commodity building is prohibited from conducting any transfer of the pre-sale of the commodity building that he has bought but is still under construction. Before completion and delivery of an advance sale commodity building to the advance buyer, and before the advance buyer obtains the individual property ownership certificate, the property administration department shall not handle any transfer of the commodity building. If there is discrepancy in the name of the applicant for property ownership and the name of the advance buyer in the advance sales contract, the property

ownership registration administration shall not records the application of real estate ownership.

- A real name system for house purchase should be applied; and an immediate archival filing network system should be carried out for the pre-sale contracts of commodity properties.

On July 6, 2006, the Ministry of Construction, NDRC, and the SAIC jointly enacted a “Notice on Reorganizing and Regulating Order in the Real Estate Transactions”, the details of which are as follows:

- The developer should start to sell the commodity properties within 10 days after receiving a “Permit for Pre-completion Sale of Commodity Properties”. Without this permit, the pre-completion sale of commodity properties, as well as subscription (including reservation, registration and number-selecting) and acceptance of the any kind of pre-sale payments, is forbidden.
- The property administration authority should establish an immediate network system for pre-sale contracts of commodity properties and a system for the publication of property transaction information. The basic information of the commodity building, the schedule of the sale and the ownership status should be duly, truly and fully published in the network system and on the locale of sale. The advance buyer of a commodity building is prohibited from conducting any transfer of the advance sale of the commodity building that he has bought but is still under construction.
- Without the “Permit for Pre-completion Sale of Commodity Properties”, no advertisement of the pre-completion sale of commodity properties can be published.
- Real estate development enterprises with a record of serious irregularity or enterprises which do not satisfy the requirements of pre-completion sale of commodity properties are not allowed to take part in sale activities.
- The property administration authority should strictly carry out the regulations for the pre-completion sale contract registration and records and apply the real name system for property purchase.

(c) Mortgages of property

Under the “Urban Real Estate Law” and the “The Security Law of the People’s Republic of China” enacted by the Standing Committee of the National People’s Congress on June 30, 1995 and enforced on October 1, 1995, and the “Measures on the Administration of Mortgage of Buildings in Urban Areas” enacted by the Ministry of Construction in May 1997 and revised on August 15, 2001, mortgage refers to the act of a debtor, or a third party, who, without transferring the occupancy of the properties, charge those properties as security for the creditor’s rights. When the debtor fails to pay his debt, the creditor has a right to obtain compensation, in accordance with the stipulations of this law, by converting the properties into money or seek preferential payments from the proceeds from the auction or sale of the concerned properties. The creditor’s rights that the mortgagor mortgaged shall not exceed the value of the properties mortgaged. After being mortgaged, the balance of value of the properties that exceeded the creditor’s rights can be mortgaged for a second time, but the sum of the mortgage shall not exceed the value of the balance. When a mortgage is created on the ownership of a building on state-owned land

legally obtained, a mortgage shall be simultaneously created on the land use rights of the land on which the building is erected. When the land use rights of state-owned lands acquired through means of assignment is mortgaged, the buildings on the land shall also be mortgaged at the same time. The land use rights of town and village enterprises cannot be mortgaged individually. When the buildings of the town and village enterprises are mortgaged, the land use rights occupied by the buildings shall also be mortgaged at the same time. The mortgagor and the mortgagee shall sign a mortgage contract in writing. Within 30 days after a property mortgage contract has been signed, the parties to the mortgage shall register the mortgage with the property administration authority at the location where the property is situated. A real estate mortgage contract shall become effective on the date of registration of the mortgage. If a mortgage is created on the real estate in respect of which a property ownership certificate has been obtained legally, the registration authority shall make an entry under the "third party rights" item on the original real estate ownership certificate and then issue a Certificate of Third Party Rights to Real Estate to the mortgagee. If a mortgage is created on the commodity building put to pre-completion sale or under construction, the registration authority shall record the details on the mortgage contract. If construction of a real property is completed during the term of a mortgage, the parties involved shall re-register the mortgage of the real property after the issuance of the certificates evidencing the ownership of the property.

(d) Lease of buildings

Under the "Urban Real Estate Law" and the "Measures for Administration of Leases of Buildings in Urban Areas" enacted by the Ministry of Construction on May 9, 1995 and enforced on June 1, 1995, the parties to a lease of a building shall enter into a lease contract in writing. A system has been adopted for registering leases of buildings. When a lease contract is signed, amended or terminated, the parties shall register the details with the property administration authority under the local government of the city or county in which the building is situated.

F. Property Financing

According to the "Notice of the People's Bank of China on Regulating Home Financing Business" enacted by the PBOC on June 19, 2001, all banks must comply with the following requirements before granting residential development loans, individual home mortgage loans and individual commercial flat loans:

(a) Housing development loans from banks shall only be granted to real estate development enterprises with approved development qualifications and high credit ratings. Such loans shall be offered to residential projects with good market potential. The borrowing enterprise must have capital of at least 30% of the total investment required of the project. The project must have been issued with a land use rights certificates, construction land planning permit, construction work planning permit and permit of construction work;

(b) In respect of the grant of individual home mortgage loans, the ratio between the loan amount and actual value of the security (the "Mortgage Ratio") shall never exceed 80%. Where an individual applies for a home purchase loan to buy a pre-completion house, the said property must have achieved the stage of "topping-out of the main structure completed" for multi-story buildings or "two-thirds of the total investment completed" for high-rise buildings; and

(c) In respect of the grant of individual commercial flat loans, the Mortgage Ratio under the application for commercial flat loans shall not exceed 60% with a maximum loan period of 10 years and the subject commercial properties must have already been completed.

The PBOC issued the "Circular on Further Strengthening the Management of Loans for Property Business" on June 5, 2003 to specify the requirements for banks to provide loans for the purposes of property development and individual home mortgage as follows:

(a) The property loan by commercial banks to real estate development enterprises shall be granted only under the title of property development loan and it is strictly forbidden to extend such loans as current capital loan for property development project or other loan item. No lending of any type shall be granted to enterprises which have not obtained the land use rights certificates, construction land permit, construction planning permit and construction work permit;

(b) Commercial banks shall not grant loans to property developers to pay off land premium; and

(c) Commercial banks may only provide mortgage loans to individual buyers when the main structural buildings have been topped out. When a borrower applies for individual home loans for his first residential unit, the down payment remains at 20%. In respect of his loan application for additional purchase of residential unit(s), the percentage of the first installment shall be increased.

Pursuant to the Guidance on Risk Management of Property Loans of Commercial Banks issued by China Banking Regulatory Commission on September 2, 2004, any property developer applying for property development loans shall have at least 35% of capital funds required for the development.

According to the "Notice of the People's Bank of China on the Adjustment of Commercial Bank Housing Loan Policies and the Interest Rate of Excess Reserve Deposit", enacted by PBOC on March 16, 2005, starting from March 17, 2005, the down payment for individual homes increased from 20% to 30% in cities and areas where property prices grow too quickly. The commercial banks can independently determine scope of such property price rise according to specific situations in different cities or areas.

On May 24, 2006, the State Council passed the "Opinion of the Ministry of Construction and Other Departments on Adjusting the Housing Supply Control Structure and Stabilizing the Property Prices". The regulations provide the following:

(a) Tightening the control of advancing loan facilities. The commercial banks are not allowed to advance their loan facilities to property developers who do not have the required 35% or more of the total capital for the construction projects. The commercial banks should be prudent in granting loan facilities and revolving credit facilities in any form to the property developers who have a large number of idle land and unsold commodity properties. Banks should not accept mortgages of commodity properties remaining unsold for three years or longer;

(b) From June 1, 2006 and onward, purchasers need to pay a minimum of 30% of the purchase price as down payment, except for apartments with a floor area of 90 square

meters or less for residential purposes, for which the existing requirement of 20% of the purchase price as down payment remains unchanged.

According to the “Circular on Standardizing the Admittance and Administration of Foreign Capital in Real Estate Market” enforced on July 11, 2006, foreign invested real estate development enterprises which have not paid up their registered capital fully, or failed to obtain a land use rights certificate, or with under 35% of the capital for the project, will not be allowed to obtain a loan in or outside China, and foreign exchange administration departments will not approve any settlement of foreign loans by such enterprises.

On July 10, 2007, SAFE issued a circular indicating that, for foreign-invested enterprises in the property sector, it would not process any foreign debt registration or conversion of foreign debt that was approved by the local MOFCOM and filed with the MOFCOM after June 1, 2007. See “—B. Foreign investment real estate development enterprises”.

On September 27, 2007, the PBOC and the CBRC issued the “Circular on Strengthening the Credit Management for Commercial Real Property”, with a supplement issued in December 2007. The circular aims to tighten the control over property loans from commercial banks to prevent excessive credit granting. The measures adopted include:

- for a first time home buyer, increasing the minimum amount to 30% of the purchase price as down payment where the property has a unit floor area of 90 square meters or above and the purchaser is buying the property as for own residence;
- for a second time home buyer, increasing (i) the minimum amount of down payment to 40% of the purchase price and (ii) the minimum mortgage loan interest rate to 110% of the relevant PBOC benchmark bank lending interest rate. If a member of a family (including the buyer, his/her spouse and their children under 18) finances the purchase of a residential unit, any member of the family that buys another residential unit with loans from banks will be regarded as a second time home buyer;
- for a commercial property buyer, (i) requiring banks not to finance any purchase of pre-sold properties, (ii) increasing the minimum amount of down payment to 50% of the purchase price, (iii) increasing the minimum mortgage loan interest rate to 110% of the relevant PBOC benchmark bank lending interest rate, (iv) limiting the terms of such bank loans to no more than ten years, although commercial banks are allowed flexibility based on its risk assessment;
- for a buyer of commercial/residential dual-purpose properties, increasing the minimum amount of down payment to 45% of the purchase price, with the other terms to be decided by reference to commercial properties; and
- prohibiting commercial banks from providing loans to property developers who have been found by relevant government authorities to be holding excessive amounts of land and properties.

In addition, commercial banks are also prohibited from providing loans to projects that have less than 35% of capital funds (proprietary interests), or where there is failure to obtain land use rights certificates, construction land planning permits, construction works planning permits and construction permits. Commercial banks are also prohibited from accepting commercial premises that have been vacant for more than three years as collateral for loans. In principle, property

development loans provided by commercial banks should only be used for projects in areas where the commercial bank is located. Commercial banks may not provide loans to property developers to finance the payment of land use rights grant fees.

According to the notice on “Enlarging the Floating Range of the Downward Movement of Interest Rates for Individual Mortgage Loans”, the PRC government lowered the minimum interest rate for individual mortgage loans to 70% of the corresponding PBOC benchmark bank lending rates. Further, the minimum down payment ratio of residential properties was lowered to 20%.

G. Insurance of a property project

There are no mandatory provisions in the PRC laws, regulations and government rules which require a property developer to take out insurance policies for its property projects.

In light of the “Construction Law of the People’s Republic of China” enacted by the Standing Committee of the National People’s Congress on November 1, 1997 and enforced on March 1, 1998, construction enterprises must maintain accident and casualty insurance for workers engaged in dangerous operations. In the “Opinions of the Ministry of Construction on Strengthening the Insurance of Accidental Injury in the Construction Work” by the Ministry of Construction on May 23, 2003, the Ministry of Construction further emphasized the importance of insurance to cover accidental injury in construction work and put forward detailed guidance. The “Guidance on the Insurance of Accidental Injury in the Construction Work of Guangdong Province” enacted by the construction department of Guangdong Province on September 8, 2004 prescribes the scope, object, term, coverage, amount and premium of insurance for accidental injury. It further emphasizes that the persons who have been already insured for work-related injury insurances still need accidental injury insurance when he or she takes part in the on-site construction work. According to the common practice of the property industry in Guangdong, except for the accidental injury insurance, construction companies are usually required to submit insurance proposals in the course of tendering and bidding for construction projects. Construction companies shall pay for the insurance premium at their own costs and take out various types of insurance to cover their liabilities, such as property risks, third party’s liability risk, performance guarantee in the course of construction and all-risks associated with the construction and installation work throughout the construction period. The requirements for insurance for all the aforementioned risks shall cease immediately after the completion and acceptance upon inspection of construction.

H. Major taxes applicable to property developers

(a) Income tax

According to the “Income Tax Law of The People’s Republic of China for Enterprises with Foreign Investment and Foreign Enterprises” enacted by National People’s Congress on April 9, 1991 and enforced on July 1, 1991 and its detailed rules enacted by the State Council on June 30, 1991, the rate of enterprise income tax for foreign-invested enterprises and enterprise income tax for entities and premises engaged in production and operation by foreign enterprises in China is 30%, and the rate of local income tax is 3%.

Pursuant to the “Provisional Regulations of the People’s Republic of China on Enterprise Income Tax” issued by the State Council on December 13, 1993 and enforced on January 1, 1994 and its

Implementation Rules enacted by the Ministry of Finance (“MOF”) on February 4, 1994, the income tax rate applicable to Chinese enterprises other than foreign-invested enterprises and foreign enterprises is 33%.

According to the PRC Enterprise Tax Law enacted by the National People’s Congress on March 16, 2007 and enforced from January 1, 2008 onwards, a uniform income tax rate of 25% will be applied towards foreign-invested enterprises and foreign enterprises which have set up production and operation facilities in the PRC as well as PRC enterprises.

Furthermore, unlike the Income Tax Law of the People’s Republic of China for Enterprise with Foreign investment and Foreign Enterprise currently in effect, which specifically exempts withholding tax on any dividends payable to non-PRC investors, the PRC Enterprise Tax Law and its implementation provide that an income tax rate of 10% will normally be applicable to dividends payable to non-PRC enterprise investors which are derived from sources within the PRC, unless there exists a tax treaty between the PRC and the relevant jurisdictions in which such non-PRC enterprise shareholders reside whereupon the relevant tax may be reduced or exempted.

(b) Business tax

Pursuant to the “Interim Regulations of the People’s Republic of China on Business Tax” enacted by the State Council on December 13, 1993 and enforced on January 1, 1994 and its “Detailed Implementation Rules on the Provisional Regulations of The People’s Republic of China on Business Tax” issued by the Ministry of Finance on December 25, 1993, the tax rate on transfer of immovable properties, their superstructures and attachments is 5%.

(c) LAT

According to the requirements of the Provisional Regulations of The People’s Republic of China on Land Appreciation Tax (the “Land Appreciation Provisional Regulations”) which was enacted on December 13, 1993 and become effective on January 1, 1994, and the Detailed Implementation Rules on the Provisional Regulations of The People’s Republic of China on Land Appreciation Tax (the “Land Appreciation Detailed Implementation Rules”) which was enacted and enforced on January 27, 1995, any appreciation gained from taxpayer’s transfer of property shall be subject to LAT. LAT is set at four different rates: 30% on appreciation not exceeding 50% of the sum of deductible items; 40% on appreciation exceeding 50% but not exceeding 100% of the sum of deductible items; 50% on appreciation exceeding 100% but not exceeding 200% of the sum of deductible items; and 60% on appreciation exceeding 200% of the sum of deductible items. The deductible items include the following:

- amount paid for obtaining the land use rights;
- costs and expenses for development of land;
- costs and expenses of new buildings and ancillary facilities, or estimated prices of old buildings and constructions;
- related tax payable for transfer of property; and
- other deductible items as specified by MOF.

According to the requirements of the Land Appreciation Provisional Regulations, the Land Appreciation Detailed Implementation Rules and the Notice issued by the MOF in respect of the

“Levy and Exemption of Land Appreciation Tax for Development and Transfer Contracts” signed before January 1, 1994 which was announced by the MOF and State Administration of Taxation on January 27, 1995, LAT shall be exempted under any one of the following circumstances:

- For ordinary standard residential properties (i.e. residential properties built in accordance with the local standard for general civilian residential properties and not deluxe apartments, villas, resorts etc. where the appreciation amount does not exceed 20% of the sum of deductible items;
- Where property taken over and repossessed according to laws due to the construction requirements of the State;
- Due to for individuals who relocate as a result of redeployment of work or improvement of living standard from originally self-used residential property but only where they have been living for 5 years or more, and after obtaining tax authorities’ approval;
- For property transfer contracts which were signed before January 1, 1994, whenever the properties are transferred, LAT shall be exempted;
- If the property assignments were signed before January 1, 1994 or the project proposal has been approved and that capital was injected for development in accordance with the conditions agreed, LAT shall be exempted if the properties are transferred for the first time within five years after January 1, 1994. The date of signing the contract shall be the date of signing the sale and purchase agreement. For particular property projects approved by the Government for the development of the entire piece of land and long-term development, if the properties are transferred for the first time after the five-year tax-free period, after auditing being conducted by the local financial and tax authorities, and approved by the MOF and the State Administration of Taxation, the tax-free period would be appropriately prolonged.

On December 24, 1999, the MOF and the State Administration of Taxation issued the “Notice in respect of the extension of the period for the Land Appreciation Tax Exemption Policy”, extending the period for the LAT exemption policy as mentioned in the last bullet above to the end of 2000.

After the issuance of the “Land Appreciation Provisional Regulations” and the “Land Appreciation Detailed Implementation Rules”, due to the relatively long period required for property development and transfer, many districts, while they were implementing the regulations and rules, did not mandatorily require the real estate development enterprises to declare and pay LAT. Therefore, in order to assist the local tax authorities in the collection of LAT, the MOF, State Administration of Taxation, the Ministry of Construction and the Ministry of Land and Resource had separately and jointly issued several notices to restate the following: After the assignments are signed, the taxpayers should declare the tax to the local tax authorities where the property are located, and pay LAT in accordance with the amount as calculated by the tax authority and within the specified time limit. For those who fail to acquire proof of tax payment or tax exemption from the tax authorities, the property administration authority shall not process the relevant title change procedures, and shall not issue the property title certificate.

The State Administration of Taxation also issued the “Notice issued by State Administration of Taxation in respect of the Serious Handling of Administration Work in relation to the Collection

of Land Appreciation Tax" on July 10, 2002 to request local tax authorities to modify the management system of LAT collection and operation procedures, to build up a proper tax return system for LAT, to improve the methods of pre-levying for the pre-sale of property. That notice also pointed out that the preferential policy of LAT exemption for first time transfer of properties under property development contracts signed before January 1, 1994 or project proposal that has been approved and for which capital was injected for development is expired, and that such tax shall be levied again.

The State Administration of Taxation issued the "Notice of State Administration of Taxation in respect of the Strengthening of Administration Work in relation to the Collection of Land Appreciation Tax" on August 2, 2004 and the "Notice of State Administration of Taxation in respect of the Further Strengthening of Administration Work in relation to the Collection of Land Appreciation Tax and Land Use Tax in Cities and Towns" on August 5, 2004. The aforesaid notices point out that the administration work in relation to the collection of LAT should be further strengthened. The preferential policy of LAT exemption for the first time transfer of properties under property development contracts signed before January 1, 1994 is expired and such tax shall be levied again. Where such taxes were still not levied, the situation should be corrected immediately. Also, the notice required that the system of tax declaration and tax sources registration in relation to LAT should be further improved and perfected.

On March 2, 2006, the MOF and State Administration of Taxation issued the "Notice of Certain Issues Regarding Land Appreciation Tax". The notice clarifies the relevant issues regarding LAT as follows:

(a) Tax Collection and Exemption in the Sale of Ordinary Standard Residential Properties

The notice sets out the recognized standards for ordinary standard residential properties. Where any developers build ordinary standard residential properties or commercial properties, the value of land appreciation shall be assessed individually. No retroactive adjustment will be made in respect of ordinary standard residential properties for which application for tax exemption has been filed before the notice is issued and for which LAT exemption has been granted by the tax authority on the basis of the standards of ordinary residential properties originally set down by the people's government of the province, autonomous region or municipality directly under the Central Government.

(b) Advance Collection and Settlement of LAT

- All regions shall further improve the measures for the advance collection of LAT, and decide the advance collection rate in a scientific and reasonable manner, and adjust it at a proper time according to the level of value appreciation in the property industry and market conditions within the region and on the basis of the specific property categories, namely, ordinary standard residential properties, non-ordinary standard residential properties and commercial properties. After a project is completed, the relevant settlement shall be handled in a timely manner, with any overpayment refunded or any underpayment being made up.
- If any tax pre-payment is not paid within the advance collection period, overdue fines will apply as of the day following the expiration of the prescribed advance collection period.

- As to any property project that has been completed and gone through the acceptance, where the floor area of the property as transferred makes up 85% or more in the saleable floor area, the tax authority may require the relevant taxpayer to conduct the settlement of LAT on the transferred property according to the matching principles regarding the proportion between the income generated from the transfer of property and the deductible items. The specific method of settlement shall be prescribed by the local tax authority.

On December 28, 2006, the State Administration of Taxation issued the “Notice on the Administration of the Settlement of Land Appreciation Tax of Property Development Enterprises” which came into effect on February 1, 2007. The notice sets out further provisions concerning the settlement of LAT by property developers by clarifying issues on responsibility for the settlement of LAT, requirements, materials to be submitted, auditing and verification, recognition of revenue of indirect sale and self-use properties, deductible items and the handling of transfer after tax is imposed and settled etc. Local provincial tax authorities can formulate their own implementation rules according to the notice and local situation.

Pursuant to the notice, a property developer shall settle and clear the LAT payment of its development projects that meet certain criteria with the tax authorities in accordance with the applicable LAT tax rates. The LAT shall be settled for projects approved by the competent authorities; and for projects developed in different stages, the LAT shall be settled in stages. LAT must be settled if (1) the property development project has been completed and fully sold; (2) the property developer transfers the whole incompleting development project; or (3) the land-use rights with respect to the project is transferred. In addition, the relevant tax authorities may require the developer to settle the LAT if either of the following criteria is met: (1) for completed property development projects, the transferred GFA represents more than 85% of total salable GFA, or the proportion represented is less than 85%, but the remaining salable GFA has been leased out or used by the developer; (2) the project has not been sold out for more than three years after obtaining the sale or pre-sale permit; (3) the developer applies for cancellation of the tax registration without having settled the relevant LAT; or (4) other conditions stipulated by the tax authorities.

The notice also indicates that if a property developer satisfies any of the following circumstances, the tax authorities will levy and collect LAT as per the levying rate no lower than the pre-payment rate with reference to the bearing rate of LAT of local enterprises with a similar development scale and income level: (i) failure to maintain account book as required by law or administrative regulation; (ii) destroying the account book without authorization or refusing to provide taxation information; (iii) the accounts are disorganized or illegible, or cost materials, income vouchers and cost vouchers are damaged and incomplete, making it difficult to determine transferred income or amount of deductible items; (iv) failure to go through LAT settlement within the prescribed period without being remedied within the period required by the relevant tax authorities; (v) the basis for tax calculation as submitted is obviously low without justifiable cause. Local provincial tax authorities can formulate their own implementation rules according to the notice and local situation.

(d) Deed tax

Pursuant to the “Interim Regulations of the People’s Republic of China on Deed Tax” enacted by the State Council on July 7, 1997 and enforced on October 1, 1997, the transferee, whether an

entity or individual, of the title to a land site or building in the PRC shall have to pay deed tax. The rate of deed tax is 3%–5%. Provincial, regional or municipal governments directly under the central government may, within the aforesaid range, determine and report their effective tax rates to the MOF and the State Administration of Taxation for the record.

(e) Urban land use tax

Pursuant to the “Provisional Regulations of the People’s Republic of China Governing Land Use Tax in Cities and Towns” enacted by the State Council on September 27, 1988 and revised on December 31, 2006, the land use tax in respect of urban land is levied according to the area of the relevant land. The annual tax as of January 1, 2007 shall be between RMB0.6 and RMB30.0 per square meter of urban land, calculated according to the tax rate determined by local tax authorities.

(f) Buildings tax

Under the “Interim Regulations of the People’s Republic of China on Buildings Tax” enacted by the State Council on September 15, 1986 and enforced on October 1, 1986, buildings tax is 1.2% if it is calculated on the basis of the residual value of a building, and 12% if it is calculated on the basis of the rental.

(g) Stamp duty

Under the “Interim Regulations of the People’s Republic of China on Stamp Duty” enacted by the State Council on August 6, 1988 and enforced on October 1, 1988, for property rights transfer instruments, including those in respect of property ownership transfer, the rate of stamp duty is 0.05% of the amount stated therein; for permits and certificates relating to rights, including property title certificates and land use rights certificates, stamp duty is levied at RMB5 per item.

(h) Municipal maintenance tax

Under the “Interim Regulations of the People’s Republic of China on Municipal Maintenance Tax” enacted by the State Council on February 8, 1985, any taxpayer, whether an entity or individual, of product tax, value-added tax or business tax is required to pay municipal maintenance tax. The tax rate shall be 7% for a taxpayer whose domicile is in an urban area, 5% for a taxpayer whose domicile is in a county or a town, and 1% for a taxpayer whose domicile is not in any urban area or county or town. Under the “Circular Concerning Temporary Exemption from Municipal Maintenance Tax and Education Surcharge For Enterprises with Foreign Investment and Foreign Enterprises” and the “Approval on Exemption of Municipal Maintenance Tax and Education Surcharge in Foreign Invested Freightage Enterprises” issued by State Administration of Taxation on February 25, 1994 and on September 14, 2005, respectively, whether foreign-invested enterprises are subject to municipal maintenance tax will be determined in accordance with notices issued by the State Council; and such tax is not applicable to enterprises with foreign investment for the time being, until further explicit stipulations are issued by the State Council.

(i) Education surcharge

Under the “Interim Provisions on Imposition of Education Surcharge” enacted by the State Council on April 28, 1986 and revised on June 7, 1990 and August 20, 2005, a taxpayer, whether an entity or individual, of product tax, value-added tax or business tax is required to pay an education surcharge, unless such taxpayer is instead required to pay a rural area education surcharge as provided by the “Notice of the State Council on Raising Funds for Schools in Rural Areas”. Under the “Supplementary Notice Concerning Imposition of Education Surcharge” issued by the State Council on October 12, 1994, the “Circular Concerning Temporary Exemption from Municipal Maintenance Tax and Education Surcharge For Enterprises with Foreign Investment and Foreign Enterprises” and the “Reply on Exemption of Municipal Maintenance Tax and Education Surcharge in Foreign-Invested Freightage Enterprises” issued by State Administration of Taxation on February 25, 1994 and on September 14, 2005, respectively, whether foreign-invested enterprises are subject to the education surcharge will be determined in accordance with notices issued by the State Council; and such tax is not applicable to enterprises with foreign investment for the time being, until further explicit stipulations are issued by the State Council.

I. Measures on adjusting the structure of housing supply and stabilizing housing price

The General Office of the State Council enacted the “Circular on Stabilizing Housing Price” on March 26, 2005, requiring measures to be taken to restrain the housing price from increasing too fast and to promote the healthy development of the property market.

In April 2005, the Ministry of Construction and certain other Chinese government authorities jointly issued the Notice of Stabilizing Property Prices, followed by a set of new measures. As a result:

- as from June 1, 2005, a business tax will be levied on property sales proceeds subject to the length of the period for which the property has been held and type of property concerned;
- transfer of uncompleted properties is banned;
- a “land idle fee” will be imposed on land the development of which does not commence within one year of the commencement date stipulated in the land grant contract and the land use rights granted will be canceled for land sitting idle for two years or more;
- planning permits in relation to projects which are not in compliance with their respective planning permits will be revoked; and
- land provision for villa construction is banned and land provision for high end residential property construction is restricted.

On May 9, 2005, the General Office of the State Council issued the Opinion of the Ministry of Construction and other Departments on Doing a Good Job of Stabilizing House Prices, the opinion provides:

(a) Intensifying the planning and control and improving the supply structure of houses

Where the housing price is growing excessively and where the supply of ordinary commodity houses in the medium or low price range, and economical houses is insufficient, construction of

residential properties should mainly involve projects of ordinary commodity houses in the medium or low price range and economical houses. The construction of low-density, upmarket houses shall be strictly controlled. With respect to construction projects of medium- or low-price ordinary commodity houses, before any grant of land, the municipal planning authority shall, according to the level of control required, set out conditions for planning and design such as height of buildings, plot ratio and green space. The property authority shall, in collaboration with other relevant authorities, set forth such controlling requirements as sale price, type and apartment sizes. Such conditions and requirements will be set out as preconditions of land assignment to ensure an effective supply of small or medium-sized houses at moderate and low prices. The local government must intensify the supervision of planning permit for property development projects. Housing projects that have not commenced within two years must be examined again, and those that turn out to be not in compliance with the planning permits will be revoked.

(b) Intensifying the control over the supply of land and rigorously enforcing the administration of land

Where the price of land for residential use and residential properties grows too rapidly, the proportion of land for residential use to the total land supply should be appropriately raised, and the land supply for the construction of ordinary commodity houses in the medium- or low-price range and economical house should be increased. Land supply for villa construction continues to be suspended, and land supply for high-end housing property construction is strictly restricted.

(c) Adjusting the policies of business tax on residential property house transfer and strictly regulating the collection and administration of tax

From June 1, 2005, the business tax on transfer of a residential property by an individual within two years of the purchase will be levied on the basis of the full amount of the sale proceeds. Transfer of an ordinary residential property by an individual who sells two years or more after the purchase is exempted for business tax. For transfer of a house other than ordinary residential property by an individual two years or more after the purchase, the business tax will be levied on the basis of the balance between the proceeds from selling the property and the purchase price.

(d) Rectifying and regulating for an orderly market

The buyer of a pre-completion commodity property is prohibited from conducting any transfer of the pre-sale commodity property that he has bought that is still under construction. A real name system for property purchase should be applied, and an immediate archival filing network system for advance sales contracts of commodity properties should be carried out.

On May 24, 2006, the State Council forwarded the “Opinion on Adjusting the Housing Supply Structure and Stabilizing Property Prices (關於調整住房供應結構穩定住房價格的意見)” (the “Opinion”) of the Ministry of Construction and other relevant government authorities. The opinion provides the following:

(1) Adjusting the Housing Supply Structure

- Developers must focus on providing small- to medium-sized ordinary commodity properties at low- to mid-level prices to cater to the demands of local residents.

- As of June 1, 2006, newly approved and newly commenced building construction projects must have at least 70% of the total construction work area designated for small apartments with floor areas of 90 sq.m. or below (including economically affordable apartments). If municipalities directly under the central government, cities listed on state plans (計劃單列市) or provincial capital cities (省會城市) have special reasons to adjust such prescribed ratio, they must obtain special approval from the Ministry of Construction. Construction projects that have been approved but have not yet obtained a construction permit must follow the prescribed ratio.

(2) Further adjustments by tax, loan and land policies

- From June 1, 2006, business tax will be levied on the full amount of the sale proceeds on conveyance of residential properties within a period of five years from the date of purchase. If an individual sells his ordinary standard apartment after five or more years from the date of purchase, business tax will normally be exempted. If an individual sells his non-ordinary apartment after five or more years from the date of purchase, business tax will be levied on the balance between the selling price and the purchase price.
- Commercial banks are not allowed to advance loan facilities to property developers who do not have the required 35% minimum of the total capital for the construction projects. Commercial banks should be prudent in granting loan facilities and/or revolving credit facilities in any form to the property developers who have a large number of idle lands and unsold commodity apartments. Banks shall not accept mortgages of commodity apartments remaining unsold for three years or more.
- According to regulations issued by the CBRC, purchasers of homes equal to or smaller than 90 sq.m. are required to pay a minimum of 20% of the purchase price as down payment. If the purchased home is larger than 90 sq.m., a minimum of 30% of the purchase price as down payment is required, pursuant to a regulation from June 1, 2006. Furthermore, on September 27, 2007 the PBOC and the CBRC increased the minimum down payment for purchasers of second homes from 30% to 40% of the purchase price regardless of the size of the second home, if the purchaser obtained his or her first home through a mortgage. Moreover, the mortgage loan rates for subsequent mortgages are required to be not less than 1.1 times the corresponding PBOC benchmark lending rates. Monthly mortgage payments are limited to 50% of an individual borrower's monthly income.
- At least 70% of the total land supply for residential property development must be used for developing small-to-medium-sized low-cost public housing. Based on the restrictions of residential property size ratio and residential property price, land supply will be granted by way of auction to the property developer who offers the highest bid. Land supply for villa construction will continue to be suspended, and land supply for low-density and large-area housing property construction will be restricted.
- The relevant authorities will levy a higher surcharge against those property developers who have not commenced the construction work for longer than one year from the commencement date stipulated in the construction contract and will order them to set a date for commencing the construction work and a date of completion. The relevant authorities will confiscate without compensation the land from those property developers who have not commenced the construction work beyond two years from the

commencement date stipulated in the construction contract without proper reasons. The relevant authorities will dispose of the idle land of those property developers who have suspended construction work for one year without an approval, who have invested less than one-fourth of the total proposed investment and who have developed less than one-third of the total proposed construction area.

(3) Reasonably Monitoring the Scope and Progress of Demolition of Urban Housing

- The management and reasonable control of the scope and progress of the demolition of urban housing should be strengthened to halt “excessive property growth triggered by passive means” (被動性住房需求的過快增長).

(4) Further Rectifying and Regulating the Order of the Property Market

- In order to ensure that the prescribed ratio regarding types and sizes is followed, the relevant authorities will need to re-examine the approval of those construction projects which have been granted planning permit but have not been commenced. The relevant authorities will ensure that no planning permit (規劃許可證), construction permit (施工許可證) or permit for pre-sale of commodity properties (商品房預售許可證) are issued to those construction projects which do not satisfy the regulatory requirements, in particular, the prescribed ratio requirement. If the property developers, without an approval, alter the architectural design, the construction items, and exceed the prescribed ratio, the relevant authorities have the power to dispose of the land and to confiscate the land in accordance with the law.
- The property administration authority and the administration of industry and commerce will investigate illegal dealings such as contract fraud cases in accordance with the law. The illegal conduct of pre-completion sale of commodity apartments without satisfying all the conditions is prohibited and an administrative penalty will be imposed on offenders in accordance with the law. For property developers who deliberately manipulate the supply of commodity housing, the relevant authorities will impose substantial administrative penalties, including revoking the business licenses of serious offenders and pursuing personal liability for individuals concerned.

(5) Gradually relieving the housing demands for low-income families

- To expedite the establishment of low-cost public housing supply system in various cities and counties; to monitor and regulate the construction of economically affordable apartments; to aggressively develop the second-hand property market and property rental market.

(6) Improving information disclosure system and system for collecting property statistics

On July 6, 2006, the Ministry of Construction promulgated a supplemental Opinion on Carrying Out the Residential Property Size Ratio in Newly-Built Residential Buildings (Jianzhufang 2006 No. 165) (關於落實新建住房結構比例) (“the Supplemental Opinion”). The Supplemental Opinion provides the following:

- As of June 1, 2006, of the newly approved and newly commenced construction projects in different cities including town and counties at least 70% of the total

construction area must be used for building small apartments with unit floor area of 90 sq.m. or below (including economically affordable apartments). The relevant authorities in different localities must strictly follow the prescribed ratio requirement in their respective locality.

- The relevant authorities must ensure the conditions of newly built commodity apartments including the planning and the design, and must ensure that the property size ratio is adhered to. If a property developer has not followed the ratio requirement without providing proper reasons, the town planning authorities will not issue a planning permit. If the property developer has not followed the requirements of the planning permit, the relevant authority reviewing the planning documents will not issue a certification, the construction authority will not issue a construction permit, and the property authority will not issue a permit for pre-completion sale of the commodity apartments.

In the case of construction projects that were granted approval before June 1, 2006 but that were not granted a construction work permit by that date, the relevant local governments in different localities should ascertain the details of the projects and ensure that the prescribed residential property size ratio requirement is complied with.

On September 27, 2007, the PBOC and the CBRC further tightened mortgage lending by PRC banks, by increasing the amount of down payment a property purchase must make before seeking mortgage financing. See “—Legal supervision relating to property sector in the PRC—Property Financing”.

(e) Implementing restrictions on the payment terms for land use rights

On October 10, 2007, the Ministry of Land and Resources issued a regulation, which reiterated that property developers must fully pay the land premium for the entire parcel under the land grant contract before they can receive a land use rights certificate or commence development on the land, effective November 1, 2007.

Pursuant to the notice on “Enlarging the Floating Range of the Downward Movement of Interest Rates for Individual Mortgage Loans”, the PRC government lowered the minimum interest rate for individual mortgage loans to 70% of the corresponding PBOC benchmark bank lending rates. Further, the minimum down payment ratio of residential properties was lowered to 20%.

On October 22, 2008, the Ministry of Finance and the State Administration of Taxation issued the “Notice on the Adjustments to Taxation on Real Property Transactions”, pursuant to which, from November 1, 2008, the rate of deed tax has been reduced to 1% for a first time home buyer of an ordinary residence with a unit floor area less than 90 square meters, individuals who are to sell or purchase residential properties are temporarily exempted from stamp duty and individuals who are to sell residential properties are temporarily exempted from land value-added tax.

On December 20, 2008, the General Office of the State Council issued the “Several Opinions on Facilitating the Healthy Development of the Real Estate Market”, which aims to, among other things, encourage the consumption of ordinary residential units and support property developers in changing market conditions. Pursuant to the opinion, in order to encourage the consumption of ordinary residential units, from January 1, 2009 to December 31, 2009, (i) business tax will be imposed on the full amount of the sale price, upon the transfer of a non-ordinary residential unit by an individual within two years from the purchase date; (ii) for the transfer of a non-ordinary residential unit which has been held by the purchaser for more

than two years from the purchase date and a ordinary residential unit which has been held by the purchaser for two years or less from the purchase date, the business tax is to be levied on the difference between the sale price and the purchase price; (iii) and in the case of an ordinary residential unit, business tax is fully exempted if that transfer occurs after two years from the purchase date. Furthermore, individuals with an existing ordinary residential unit that is smaller than the average size for their locality may buy a second ordinary residential unit under favorable loan terms similar to first time buyers. In addition, support for property developers to deal with the changing market is to be provided by increasing credit financing services to “low-to medium-level price” or “small- to medium-sized” ordinary commercial housing projects, particularly those under construction, and providing financial support and other related services to property developers with good credit standing for merger and acquisition activities.

On December 29, 2008, the Ministry of Finance and the State Administration of Taxation issued the “Notice on the Policy of Business Tax on Re-sale of Personal Residential Properties”, which reiterates the measures regarding business tax set forth in the above Several Opinions on Facilitating the Healthy Development of the Real Estate Market.

Legal supervision relating to hotel sector in the PRC

A. Foreign invested hotel project

According to the Guidance Catalog, construction and operation of high-end hotels falls within the category of “Restricted Foreign Investment Industry”. Construction and operation of common and economic hotels other than high-end hotels fall within the category of “permitted foreign investment industry”. The Ministry of Commerce and the NDRC amended the Guidance Catalog in October 2007 which provides that, effective from December 1, 2007, the property development business falls within the category of industries in which foreign investment is permitted, except that the development of a whole land lot which shall be operated only by sino-foreign equity joint ventures or sino-foreign co-operative joint ventures, the construction and operations of high-end hotels, villas, premium office buildings and international conference centers, property transactions in the secondary market and property intermediaries fall within the category of industries in which foreign investment is subject to restrictions. A foreign-invested enterprise investing in the hotel business can set up an enterprise in the form of Sino-foreign equity joint venture, Sino-foreign co-operative joint venture or wholly foreign-owned enterprise according to the Guidance Catalog and the requirements of the relevant laws and the administrative regulations on foreign-invested enterprises. A foreign-invested enterprise in the hotel business should apply for an approval with the relevant department of commerce, and obtain an approval certification for a foreign-invested enterprise before registering with the administration of industry and commerce.

B. Hotel management

The procedures involved in hotel construction in China including obtaining approval for land use, project planning and project construction shall also be subject to the aforementioned regulations relating to property project development. There is currently no special authority in China responsible for the daily management of hotel business. The supervision of daily management of hotel business belongs to different authorities in accordance with the respective business scopes of different hotels. The supervision mainly includes the following:

(a) Legal supervision on security and fire control

Pursuant to the "Measures for the Control of Security in the Hotel Industry" issued by the Ministry of Public Security of the People's Republic of China and enforced on November 10, 1987, a hotel can operate only after obtaining an approval from the local public security bureau and a business license has been granted. The hotel enterprise should make a filing with the local public security bureau and its branches in the county or city, if hotel enterprise has any change including closing, transferring or merging of business, changing place of business and name, etc. Pursuant to the "Provisions on the Administration of Fire Control Safety of State Organs, Organizations, Enterprises and Institutions" enacted by the Ministry of Public Security on November 14, 2001 and enforced on May 1, 2002, hotels (or motel) are units which require special supervision on fire control and safety. When a hotel is under construction, renovation or re-construction, a fire control examination procedure is required and when the construction, renovation or re-construction project is completed, a hotel can only open for business after passing a fire control inspection.

(b) Supervision on public health

According to relevant regulations and rules in relation to public health, hotels fall in the scope of public health supervision. The operating enterprise should gain the sanitation license. The measures for granting and managing sanitation license are formulated by public health authority of province, autonomous region, and municipality directly under the central government. The sanitation license is signed by the relevant public health administration and the public health and epidemic prevention institutions grant the license. The sanitation license should be reviewed once every two years.

(c) Supervision on food hygiene

According to the relevant regulations and rules in relation to food hygiene supervision, hotels operating catering services should obtain food hygiene licenses. Food hygiene licenses are granted by food hygiene administrative bodies above county level. The purchase, reserve and processing of food, tableware, and service should meet relevant requirements and standards of food hygiene.

(d) Supervision on entertainment

According to the "Regulation on the Administration of Entertainment Venues" enacted by the State Council on January 29, 2006 and enforced on March 1, 2006, hotels that operate singing, dancing and game places for profits should apply to the relevant local competent departments for culture administration for entertainment commercial operation approval. The relevant local

competent departments for entertainment administration shall issue a license for entertainment business operations, which verifies the number of consumers acceptable to the entertainment venue according to the prescriptions set down by the competent department governing entertainment administration under the State Council if it approves the relevant local application. According to the regulations concerning broadcast, movie and TV, hotels above three-star or the second rank of the national standards may apply to local broadcast and television administration of the county or above for setting ground equipment receiving satellite signal to receive entertainment programs from abroad. After finishing setting ground equipment and gaining the approval from broadcast and television administration from the relevant provincial, regional and municipal government and the approval from state security administration, the permit of receiving foreign television program from satellite is issued.

(e) Supervision on disposition of sewage and pollutants

According to Regulations of the Ministry of Construction on the "Conditions for the Fifteen Items of Administrative Licensing that are Included in the Decisions of the State Council" enacted by the Ministry of Construction on October 15, enforced on December 1, 2004, hotels that have been using or planning to use the city sewage system for water drainage should apply to the local city construction authority for city water-draining permit. According to the "Provisional Measures on Management of Water-draining Permit" enacted and enforced by the State Environmental Protection Administration on March 22, 1988, hotels that directly or indirectly discharge pollutants to a body of water should apply to environmental protection administrations of the district or county level for a drainage permit or a temporary drainage permit.

(f) Supervision on special equipment security

Elevators (lifts or escalators), boilers and pressure containers and so on are special equipment. According to the "Regulations on Security Supervisal of Special Equipment" enacted by the State Council on March 11, 2003 and enforced on June 1, 2003, hotels should register with the special equipment security supervision authority of municipal government or city which has set up districts, and should apply for inspection regularly with the special equipment examination institution a month before the expiration of security examination according to the requirement of regular examination by technical security standard.

(g) Supervision on sale of tobacco and alcohol

According to law and regulations in relation to sale of tobacco, hotels that sell tobacco should apply to the tobacco monopoly administration for a Tobacco Monopoly Retail License. According to the "Measures for the Administration on Foreign Investment in Commercial Fields" enacted by Ministry of Commerce on April 16, 2004 and enforced on June 1, 2004, a foreign-invested enterprise that operates wholesale and retail is not allowed to operate in tobacco business. According to the "Measures for the Administration of Alcohol Circulation" enacted by Ministry of Commerce on November 7, 2005 and enforced on January 1, 2006, an enterprise that sells alcohol should handle the archival filing and registration in the administrative department of commerce at the same level as the administrative department for industry and commerce where the registration is handled. The licensing system shall apply in those regions where the licensing administration of alcohol circulation has been carried out according to law.

Legal supervision relating to property management sector in the PRC

A. Foreign-invested real estate management enterprises

According to the Guidance Catalog, property management falls within the category of permitted foreign-invested industries. According to the Guidance Catalog and the relevant requirements set out under the laws and the administrative regulations on foreign-invested enterprises, a foreign-invested real estate management enterprise can be set up in the form of a Sino-foreign equity joint venture, a Sino-foreign cooperative joint venture or a wholly foreign owned enterprise. Before the administration of Industry and Commerce registers a foreign-invested enterprise as a foreign invested real estate management enterprise, the foreign invested real estate management enterprise should obtain an approval from the relevant department of commerce and receive a "foreign-invested enterprise approval certificate".

B. Qualifications of a real estate management enterprise

According to the "Regulation on Real Estate Management" enacted by the State Council on June 8, 2003 and enforced on September 1, 2003, as amended on August 26, 2007 and effective on October 1, 2007, the state implements a qualification scheme system in monitoring the real estate management enterprises. According to the "Measures for Administration of Qualifications of Real Estate Management Enterprises" enacted by the Ministry of Construction on March 17, 2004 and enforced on May 1, 2004, a newly established real estate management enterprise shall, within 30 days from the date of receiving its business license, apply to the relevant local bureau in charge of the property management under the local government or to the municipalities directly under the central government for a grading assessment. The departments of qualification examination and approval will check and issue a "real estate management qualification certificate" corresponding to their grading assessment results.

According to the "Measures for the Administration on Qualifications of Real Estate Management Enterprises", real estate management enterprise shall be classified as either class one, class two or class three. The competent construction department of the State Council is responsible for the issuance and administration of the qualification certificate for class one real estate management enterprises. The competent construction departments of the relevant provincial and regional government is responsible for issuing and administrating the qualification certificate for class two real estate management enterprises, and the competent realty departments of the relevant municipal government is responsible for issuing and administrating the qualification certificate for class two and three real estate management enterprises. The competent realty departments of the people's governments of the cities divided into districts shall be responsible for the issuance and administration of the qualification certificate of the class three real estate management enterprises.

The real estate management enterprises with class one qualification may undertake various property management projects. The real estate management enterprises with class two qualification may undertake the property management business of residential management projects of less than 300,000 sq.m. and non-residential management projects of less than 80,000 sq.m. The real estate management enterprises with class three qualification may undertake the property management business of residential projects of less than 200,000 sq.m. and non-residential projects under 50,000 sq.m.

An annual inspection system shall be implemented on the qualifications of real estate management enterprises. The annual inspection on the real estate management enterprises of varied classes of qualifications shall be presided over by the corresponding departments of qualification examination and approval.

C. Employment of a real estate management enterprise

According to the "Regulation on Real Estate Management", owners may engage or dismiss a property management company with the consent of more than half of the owners who in the aggregate hold more than 50% of the total non-communal area of the building. If, before the formal employment of a property management by the owners or the general meeting, the construction unit is to employ a real estate management enterprise, it shall enter into a preparation stage property services contract in writing with the real estate management enterprise.

Legal supervision relating to construction sector in the PRC

A. Foreign-invested construction enterprise

According to the Guidance Catalog, construction business falls within the category of permitted foreign investment industries. According to the "Regulations on the Administration of Foreign-invested Construction Enterprise" jointly enacted by the Ministry of Construction and the Ministry of Foreign Economic Cooperation (now changed to the MOFCOM) on September 27, 2002 and enforced on December 1, 2002, a foreign investor that establishes foreign-invested construction enterprises in China that carry on construction operations will have to (a) obtain the approval certification of foreign-invested enterprise; (b) register with the SAIC or local administration of industry and commerce; and (c) obtain a qualification certificate of construction enterprise from construction administration authorities.

B. The qualification of a construction enterprise

According to "Construction Law of the People's Republic of China" passed by the Standing Committee of the National People's Congress on November 1, 1997 and enforced on March 1, 1998 and the "Provisions on the Administration of Qualifications of Enterprises in Construction Industry" enacted by the Ministry of Construction on April 18, 2001 and enforced on July 1, 2001, the enterprises in construction industry shall be classified into different qualification classes pursuant to, amongst other things, the amount of its registered capital, net asset value, professional personnel, technical equipments and performance records of completed construction works. A construction enterprise can engage in construction activities within its approved scope after obtaining the construction qualification certificate.

According to above-mentioned "Provisions on the Administration of Qualifications of Enterprises in Construction Industry", the qualifications will be divided into three categories, namely, that for undertaking the whole of a construction project, that for undertaking a specialized contract and that for undertaking a labor service by subcontract. The categories of qualifications for undertaking the whole of a construction project, undertaking a specialized contract and undertaking a labor service by subcontract are divided into several qualification types according to the nature of the project and technical features. Each qualification type is further divided into several classes according to the prescribed conditions.

The department in charge of construction under the State Council is responsible for the approval of the qualification of special class or first class enterprises for undertaking the whole of a construction project, and the qualification of the first class enterprises for undertaking the specialized contract. The administrative department in charge of construction of the relevant provincial, regional or municipal government at the place where the concerned enterprise is registered is responsible for the approval of the qualification of the second class or below enterprises for undertaking the whole of a construction project or undertaking a specialized contract or the qualification of an enterprise of labor service by subcontract.

The department in charge of construction implements the system of annual inspection on qualification for enterprises in construction industry. The administrative department in charge of construction under the State Council is responsible for the annual inspection on the qualification of special class or the first class enterprises for undertaking the whole of a construction project, and the qualification of the first class enterprises for undertaking specialized contract. The administrative department in charge of construction of the people's government of the relevant provincial, regional or municipal government at the place where the concerned enterprise is registered, is responsible for the annual inspection on the qualification of the second class or below enterprises for undertaking the whole of a construction project or undertaking a specialized contract or the qualification of an enterprise of labor service by subcontract. According to the "Measures of the Ministry of Construction for the Implementation of the Relevant Qualification Administration Provided in the Provisions on the Administration of Foreign Funded Construction Enterprises" enacted by the Ministry of Construction and enforced on April 8, 2003, where a foreign enterprise purchases a domestic-funded construction enterprise, and the enterprise is restructured into a foreign-funded construction enterprise, the qualification of that enterprise is reviewed anew according to the standard it actually meets.

According to the "Provisions on the Administration of Qualifications of Enterprises in Construction Industry", an enterprise which undertakes a project without obtaining the qualification certificate for enterprises in construction industry shall be banned, and be imposed a fine of 2% to 4% of the contractual price of the project. If it obtains any illegal proceeds, such proceeds shall be confiscated.

C. The business scope of qualifications for a wholly foreign owned construction enterprise

According to the "Rules for the Administration of Foreign-funded Construction Enterprises", a wholly foreign owned construction enterprise is allowed to contract, within its scope of qualifications, the following projects: (a) a project that is to be constructed totally with the investment of a foreign country or the donation of a foreign country or the investment and donation of a foreign country; (b) a project funded by an international financial institution or granted through international bidding according to terms of loan; (c) a joint construction project of which foreign investment holds 50% or more, and a Sino-foreign joint construction enterprise in which foreign investment holds less than 50% but which cannot be independently implemented by any Chinese construction enterprise due to technical difficulties and has been approved by the administrative department of construction of the relevant provincial, regional or municipal government; and (d) a construction project using Chinese investment but that cannot be independently implemented by any Chinese construction enterprise due to technical difficulties and for which the administrative department of construction of the relevant

provincial, regional or municipal government has approved being jointly contracted by Chinese and foreign construction enterprises.

Regulation on foreign exchange registration of offshore investment by PRC residents

Pursuant to the SAFE's Notice on Relevant Issues Concerning Foreign Exchange Administration for PRC Residents to Engage in Financing and Inbound Investment via Overseas Special Purpose Vehicles (國家外匯管理局關於境內居民通過境外特殊目的公司融資及返程投資外匯管理有關問題的通知), or Circular No. 75 and its implementation rules, issued on October 21, 2005, ("Circular No.106"), issued on May 2007, (i) a PRC resident, including a PRC resident natural person or a PRC company, shall register with the local branch of the SAFE before it establishes or controls an overseas special purpose vehicle, or SPV, for the purpose of overseas equity financing (including convertible debt financing); (ii) when a PRC resident contributes the assets of or its equity interests in a domestic enterprise into a SPV, or engages in overseas financing after contributing assets or equity interests into a SPV, such PRC resident shall register his or her interest in the SPV and the change thereof with the local branch of the SAFE; and (iii) when the SPV undergoes a material event outside the PRC, such as change in share capital or merger and acquisition, the PRC resident shall, within 30 days from the occurrence of such event, register such change with the local branch of the SAFE. Under Circular No. 75, failure to comply with the registration procedures set forth above may result in penalties, including restrictions on the PRC subsidiary's foreign exchange activities and its ability to distribute dividends to the SPV.

As a result, under Circular No. 75, if the PRC resident or the SPV described above engages in an overseas offering or otherwise undergoes a material event outside the PRC, such PRC resident and SPV are required to register such change with the local branch of the SAFE within 30 days from the occurrence of such offering or event.

Management

The following table sets forth certain information with respect to our directors and senior management as of the date hereof.

| Name | Age | Title |
|---------------------------|-----|-------------------------------------|
| Mr. Yeung Kwok Keung | 54 | Chairman and an Executive Director |
| Mr. Cui Jianbo | 44 | President and an Executive Director |

Directors

Our Board currently consists of 12 directors, three of whom are independent non-executive directors. Mr. Yang Erzhu was appointed as an executive director in November 2006. All the remaining directors were appointed in December 2006.

Executive directors

Yeung Kwok Keung (楊國強), aged 54, is the chairman and an executive director of our Company. Mr. Yeung graduated from the School of Economic Management of Jinan University (暨南大學). Mr. Yeung is responsible for the formulation of development strategies, investment planning and overall project planning. From 1992 to 1997, he was the general manager of Shunde Sanhe Property Development Co., Ltd. (順德市三和物業發展有限公司). From 1986 to 1997, Mr. Yeung served as the general manager of Shunde Beijiao Construction Company Limited (順德市北濠建築工程有限公司) and also served as the general manager of the Group from 1997 to 2003. He had been the chairman of the Group from 2003 to 2005 and became chairman of the Company after its formation in 2006. Mr. Yeung has over 32 years of experience in construction and over 18 years of experience in property development. Mr. Yeung was recognized as "Guangzhou Real Estate Excellent Contributor for 20

years” in 2005. Mr. Yeung is currently a member of the Standing Committee of the People’s Political Consultative Conference of Guangdong Province (廣東省政協常務委員).

Cui Jianbo (崔健波), aged 44, is the president and an executive director of our Company. Mr. Cui graduated from the Beijing Institute of Technology (北京理工大學), majoring in accounting and is a qualified PRC accountant. He is primarily responsible for the management of daily operation and general administration of the Group. Prior to joining the Group in 2003 as the president, Mr. Cui was the deputy secretary of Shunde Local Taxation Bureau (順德市地方稅局) from 1995 to 2000 and the mayor of Beijiao Town Government (北滘鎮政府) from 2000 to 2003. Mr. Cui is also currently the deputy chairman of the Guangdong Real Estate Association (廣東省房地產協會).

Yang Huiyan (楊惠妍), aged 27, is an executive director of our Company. Ms. Yang graduated from Ohio State University with a degree in marketing and logistic. She joined the Group in 2005 and served as the manager of the procurement department. She is primarily responsible for the overall supervision on procurement, enterprise resources management and formulation of development strategies. Ms. Yang is the daughter of Mr. Yeung Kwok Keung.

Yang Erzhu (楊貳珠), aged 58, is an executive director of our Company. Mr. Yang graduated from the School of Economic Management of Jinan University. He is primarily responsible for managing our tender management department and Finest Decoration Co., our wholly-owned subsidiary providing fitting and decoration services to our projects. He is also responsible for coordinating and managing our procurement department and project cost management department, as well as assisting our chairman in investment planning. From 1994 to 1997, Mr. Yang served as a deputy general manager of Shunde Sanhe Property Development Co., Ltd. From 1986 to 1997, Mr. Yang served as a deputy general manager of Shunde Beijiao Construction Company Limited and has served as a director and deputy general manager of Giant Leap Construction Co. and Shunde Country Garden Co. since 1997. Since 1999, he has been serving as a director and deputy general manager of Finest Decoration Co. in Shunde District, Foshan City. Mr. Yang has over 32 years of experience in construction and approximately 16 years of experience in property development.

Su Rubo (蘇汝波), aged 55, is an executive director of our Company. Mr. Su graduated from the School of Economic Management of Jinan University. He is primarily responsible for construction management, supervision and coordination of our property development projects in Anhui Province, Shenyang City in Liaoning Province and Taizhou City in Jiangsu Province. From 1994 to 1997, Mr. Su served as a deputy general manager of Shunde Sanhe Property Development Co., Ltd. From 1986 to 1997, Mr. Su served as deputy general manager of Shunde Beijiao Construction Company Limited and has been serving as a director and deputy general manager of Giant Leap Construction Co. and Shunde Country Garden Co. since 1997. Mr. Su has over 32 years of experience in construction and approximately 15 years of experience in property development and approximately 13 years of experience in procurement of construction materials.

Zhang Yaoyuan (張耀垣), aged 63, is an executive director of our Company. He is primarily responsible for construction management, supervision and coordination of our property development projects in Guangdong Province. From 1994 to 1997, Mr. Zhang served as a deputy general manager of Shunde Sanhe Property Development Co., Ltd. From 1986 to 1997, Mr. Zhang served as manager and deputy general manager of Shunde Beijiao Construction Company Limited and has been serving as a director and deputy general manager of Giant Leap Construction Co. and Shunde Country Garden Co. since 1997. Mr. Zhang has over 42 years of

experience in construction and approximately 16 years of experience in the management of property development.

Ou Xueming (區學銘), aged 60, is an executive director of our Company. He is primarily responsible for construction management, supervision and coordination of our property development projects in Inner Mongolia Autonomous Region, Wuhan City in Hubei Province and Chongqing Municipality. From 1994 to 1997, Mr. Ou served as a deputy general manager of Shunde Sanhe Property Development Co., Ltd. From 1986 to 1997, Mr. Ou served as deputy general manager of Shunde Beijiao Construction Company Limited and has been acting as a director and deputy general manager of Giant Leap Construction Co. and Shunde Country Garden Co. since 1997. Mr. Ou has over 32 years of experience in construction and approximately 16 years of experience in the operation and management of property development.

Yang Zhicheng (楊志成), aged 36, is an executive director of our Company and the director and general manager of Changsha Venice Co. He is primarily responsible for the overall development and management of our property project in Changsha, Hunan Province. Prior to joining the Group in 1997, Mr. Yang had worked in Shunde Sanhe Property Development Co., Ltd. as project manager. He had also served as the general manager of Jun'an Country Garden Co. and project general manager of the Group. Mr. Yang has approximately 16 years of experience in project development. Mr. Yang is a nephew of Mr. Yeung Kwok Keung.

Yang Yongchao (楊永潮), aged 34, is an executive director of our Company and the general manager of our sales center. He is primarily responsible for our overall sales management. He has been responsible for the management of the operation and sales center of Shunde Country Garden Co. since 1997. Mr. Yang has approximately 13 years of experience in property sales management, market research, product planning proposal, pricing, marketing, sales and customer resource management. Mr. Yang is a nephew of Mr. Yeung Kwok Keung.

Independent non-executive directors

Lai Ming, Joseph (黎明), aged 64, is an independent non-executive director, chairman of the audit committee and a member of the remuneration committee of our Company. Mr. Lai is a fellow member of Hong Kong Institute of Certified Public Accountants ("HKICPA"), CPA Australia and the Chartered Institute of Management Accountants ("CIMA") and the Hong Kong Institute of Directors. He was the president of HKICPA in 1986 and the president of the Hong Kong Branch of CIMA in 1974 to 1975 and 1979 to 1980. Mr. Lai is an independent non-executive director and chairman of the audit committee of Dynasty Fine Wines Group Limited, Shinhint Acoustic Link Holdings Limited, Jolimark Holdings Limited and Guangzhou R&F Properties Co., Limited, all of which are companies whose shares are listed on the Hong Kong Stock Exchange. Mr. Lai also holds directorships in several private companies engaging in property development in Canada. Mr. Lai is also a director of the Hong Kong University of Science and Technology R & D Corporation Limited and an advisor to the corporate governance committee of the Hong Kong China Division of CPA Australia.

Shek Lai Him, Abraham (石禮謙) SBS, JP, aged 64, is an independent non-executive director, a member of the audit committee and remuneration committee of our Company. Mr. Shek is a member of the Hong Kong Legislative Council representing the Real Estate and Construction Functional Constituency and was appointed a Justice of the Peace in 1995 and was awarded the Silver Bauhinia Star by the government of HK SAR in 2007. Mr. Shek is an independent non-executive director of Midas International Holdings Limited, Lifestyle International Holdings

Limited, NWS Holdings Limited, Titan Petrochemicals Group Limited, ITC Corporation Limited, Hop Hing Group Holdings Limited, Hsin Chong Construction Group Limited, Mass Transit Railway Corporation Limited, SJM Holdings Limited Paliburg Holdings Limited and Chuang's Consortium International Limited and a chairman of Chuang's China Investments Limited, each a company whose shares are listed on the Hong Kong Stock Exchange. Mr. Shek is currently an independent non-executive director of Eagle Asset Management (CP) Limited (the manager of Champion Real Estate Investment Trust) and Regal Portfolio Management Limited (the manager of Regal Real Estate Investment Trust). Mr. Shek also holds directorships in several property-related private companies. He is a director of The Hong Kong Mortgage Corporation Limited.

Tong Wui Tung, Ronald (唐滙棟), aged 59, is an independent non-executive director, a member of the audit committee and remuneration committee of our Company. He has been practicing as a solicitor in Hong Kong for over 20 years and is a partner of the law firm, Messrs. Cheung, Tong & Rosa. He is also a Notary Public and a China Appointed Attesting Officer, and is admitted as a solicitor in several other jurisdictions.

Mr. Tong is currently a non-executive director of Yip's Chemical Holdings Limited, a company listed on the Hong Kong Stock Exchange.

Mr. Tong was a non-executive director of Innovative International (Holdings) Limited ("Innovative International") (subsequently renamed as Carico (Holdings) Limited, which was listed on the Hong Kong Stock Exchange) between August 1995 and December 2002. Innovative International entered into a debt restructuring agreement in July 2001 for an amount of debt of approximately HK\$660 million. Receivers and managers of all the property and assets of Innovative International were appointed in October 2001 pursuant to terms of a composite guarantee and debenture granted to its secured creditors. Thereafter, Innovative International entered into schemes of arrangement for restructuring in both Hong Kong and Bermuda. Mr. Tong remained as a non-executive director of Innovative International until the restructuring was completed on December 20, 2002. Mr. Tong has confirmed that there was no wrongful act on his part leading to the debt restructuring of Innovative International and that, as far as Mr. Tong is aware, no actual or potential claim has been or will be made against him as a result of such debt restructuring.

Chief financial officer

Ng Yi Kum, Estella (伍綺琴), aged 52, is the chief financial officer of the Company with effect from January 2008. From September 2005 to November 2007, Ms. Ng was an executive director of Hang Lung Properties Limited, a company listed on the Hong Kong Stock Exchange. Prior to her joining Hang Lung Properties in 2003, she was employed by the Hong Kong Stock Exchange in a number of senior positions, most recently as Senior Vice President of its Listing Division. Prior to that she gained valuable auditing experience with Deloitte Touche Tohmatsu. Ms. Ng is a qualified accountant and holds a Master of Business Administration degree from the Hong Kong University of Science and Technology. She is an associate of The Institute of Chartered Accountants in England and Wales, The Institute of Chartered Secretaries and Administration and a Fellow of the Association of Chartered Certified Accountants, the Hong Kong Institute of Certified Public Accountants and a member of the American Institute of Certified Public Accountants. She has also contributed her time to various public service appointments including being a co-opted member of the Audit Committee of the Hospital Authority, and Corporate Advisor to the Business School of Hong Kong University of Science and Technology.

Company secretary

Huen Po Wah (胡寶華), aged 60, is our company secretary. Mr. Huen joined the Group in March 2007. Mr. Huen is an associate of The Hong Kong Institute of Chartered Secretaries and also an associate of The Institute of Chartered Secretaries and Administrators. Mr. Huen is also a director of Fair Wind Secretarial Services Limited. Mr. Huen has over 26 years of experience in company management and secretarial fields and has served in many listed companies over the years.

Senior management

Song Jun (宋軍), aged 41, is a vice-president of our Company. Mr. Song graduated from the Chongqing College of Construction and Architecture (重慶建築工程學院), currently known as Chongqing University (重慶大學), with a degree in architecture and is a qualified PRC architect. Mr. Song is responsible for the overall management and supervision of our property development projects. Prior to joining the Group in 1997, he worked in Hunan Province Jishou City Construction Institute (湖南省吉首市建築規劃勘察設計院) and Elite Architectural Co. with responsibility for architectural design work. Since 1997, he has been serving in Shunde Country Garden Co. as project manager and project supervisor responsible for the management of property development. Mr. Song has approximately 12 years of experience in the management of property development.

Xie Shutai (謝樹太), aged 45, is a vice-president of our Company. Mr. Xie graduated from Hunan University (湖南大學) with a degree in civil engineering and is a qualified PRC civil engineer. He is responsible for the overall management of our hotels and property management companies. Prior to joining the Group in 1997, he worked in Hengyang City Construction Institute (衡陽市建築設計研究院) from 1986 to 1991 where he was responsible for structural design work. Mr. Xie worked in Shunde Sanhe Property Development Co., Ltd. from 1992 to 1997 where he was responsible for property management. Since 1997, he has been working in Shunde Country Garden Co. and Guangdong Management Co. where he is responsible for the overall property and hotel management of the Group. Mr. Xie has approximately 17 years of experience in property management and approximately 12 years of experience in hotel management.

Wang Zhidun (王志敦), aged 40, is a vice-president of our Company. Mr. Wang graduated from Shantou University (汕頭大學), majoring in international business laws and is a qualified PRC lawyer. Mr. Wang is responsible for investment development and legal matters of the Group. He joined the Group in 2003 and prior to joining the Group, Mr. Wang was a partner in Guangdong Bowen Law Offices from 1996 to 2003.

Chen Hua (陳華), aged 60, is a vice-president of our Company. Mr. Chen graduated from Jilin Industrial University (吉林工業大學) majoring in tractor design, Heilongjiang University (黑龍江大學) majoring in national economic management and Northeast Agricultural University (東北農業大學), majoring in Agriculture Economic Management. He is in charge of our public relations matters and human resources department. He is also the general manager of Eastern Guangdong Region and is responsible for the management of charity and commonwealth projects endowed by the Company. Prior to joining the Group in 2007, he was a director of Poverty Alleviation and Development Office of Heilongjiang Provincial Government and has over 32 years of working experience in government. Mr. Chen is the father-in-law of Ms. Yang Huiyan.

Compensation of directors

Our executive directors receive remuneration in the form of salaries, discretionary bonuses, contributions to pension schemes and benefits in kind. The aggregate salary paid to our executive directors for each of the three years ended December 31, 2006, 2007 and 2008, and the six months ended June 30, 2009, was RMB7.4 million, RMB18.5 million, RMB15.3 million and RMB7.9 million, respectively. In accordance with the rules and regulations in the PRC, our PRC based employees, including employees who are directors, participate in various defined contribution retirement benefit plans organized by the relevant municipal and provincial governments in the PRC under which we and the PRC based employees are required to make monthly contributions to these plans calculated as a percentage of the employees' salaries. For the years ended December 31, 2006, 2007 and 2008, and the six months ended June 30, 2009, we contributed RMB15,000, RMB28,000, RMB36,000 and RMB19,000, respectively, to the plans in respect of our executive directors. The aggregate amounts of compensation (including salaries, discretionary bonuses, contributions to pension schemes and benefits in kind) which were paid to our executive directors during each of the three years ended December 31, 2006, 2007 and 2008, and the six months ended June 30, 2009, were RMB8.9 million, RMB18.5 million, RMB15.4 million and RMB8.0 million, respectively.

Save as disclosed above, no other amounts have been paid or are payable by us to the directors in respect of each of the three years ended December 31, 2006, 2007 and 2008, and the six months ended June 30, 2009.

Audit committee

We have established an audit committee. The audit committee is to serve as a focal point for communication between our directors, our external auditors and our internal auditors (where an internal audit function exists) as regards their duties relating to financial and other reporting, internal controls, external and internal audits and such other financial and accounting matters as the Board determine from time to time. The audit committee is to assist our board of directors in providing an independent review of the effectiveness of our financial reporting process, internal control and risk management system, overseeing the audit process and performing other duties and responsibilities as may be assigned by our board of directors from time to time. The members of the audit committee are our independent non-executive directors, namely Mr. Lai Ming, Joseph, Mr. Shek Lai Him, Abraham and Mr. Tong Wui Tung, Ronald. Mr. Lai Ming, Joseph is the chairman of the audit committee.

Remuneration committee

We have established a remuneration committee. The remuneration committee consists of five members, of whom two are executive directors being Mr. Yeung Kwok Keung and Mr. Cui Jianbo, and three are independent non-executive directors being Mr. Lai Ming, Joseph, Mr. Shek Lai Him, Abraham and Mr. Tong Wui Tung, Ronald. The primary duty of the remuneration committee is to review and formulate policies in respect of remuneration structure for all our directors and senior management and make recommendations to our board of directors for its consideration. Mr. Yeung Kwok Keung is the chairman of the remuneration committee.

Directors' and chief executives' interests

As of August 31, 2009, the interests of the directors and chief executives of the Company in the shares, underlying shares and debentures of the Company as recorded in the register which were required to be kept under section 352 of the Securities and Futures Ordinance ("SFO"), or as otherwise notified to the Company and the Hong Kong Stock Exchange pursuant to the Model Code for Securities Transactions by Directors of Listed Issuers (the "Model Code") were as follows:

| Name of director | Capacity | Number of ordinary shares | Percentage to issued share capital |
|---------------------------|---|---------------------------|------------------------------------|
| Ms. Yang Huiyan | Interest of Controlled Corporation ⁽¹⁾ | 9,760,945,999 | 59.33% |
| Mr. Yang Erzhu | Interest of Controlled Corporation ⁽¹⁾ | 972,000,000 | 5.91% |
| Mr. Zhang Yaoyuan . . . | Interest of Controlled Corporation ⁽¹⁾ | 816,000,000 | 4.96% |
| Mr. Ou Xueming | Interest of Controlled Corporation ⁽¹⁾ | 736,000,000 | 4.47% |
| Mr. Su Rubo | Interest of Controlled Corporation ⁽¹⁾ | 716,000,000 | 4.35% |
| Mr. Cui Jianbo | Interest of Spouse ⁽²⁾ | 7,993,396 | 0.05% |
| Mr. Yang Yongchao . . . | Interest of Spouse ⁽³⁾ | 3,310,000 | 0.02% |

Notes:

- (1) These shares represent shares held by Concrete Win Limited, Automic Group Limited, Easy Hope Holdings Ltd, Acura International Global Limited and Highlander Group Limited in which Ms. Yang Huiyan, Mr. Yang Erzhu, Mr. Su Rubo, Mr. Zhang Yaoyuan and Mr. Ou Xueming beneficially owns the entire issued share capital, respectively.
- (2) These shares represent shares held by Ms. He Jianxun, who is the spouse of Mr. Cui Jianbo.
- (3) These shares represent shares held by Ms. Su Yuming, who is the spouse of Mr. Yang Yongchao.

Employee incentive scheme

We are in the process of setting up an employee incentive scheme (the "Employee Incentive Scheme"), under which we expect to acquire shares of the Company in the secondary market and grant them to our employees based on certain criteria. The purpose of the Employee Incentive Scheme is to motivate our employees and to enhance their performance and efficiency. As of August 31, 2009 we had acquired a total of 59,247,718 shares of the Company for purposes of the Employee Incentive Scheme. The total consideration to acquire these shares was approximately RMB306 million. As of the date hereof, no shares have been granted under the Employee Incentive Scheme.

Share option scheme

We adopted a share option scheme (the "Share Option Scheme") on March 20, 2007. The purpose of the Share Option Scheme is to provide incentives to our employees including our executive directors and non-executive directors (each a "participant"). Our board of directors may, at any time within 10 years after the date of adoption of the Share Option Scheme, make an offer to any participant. The subscription price for shares granted pursuant to the Share Option Scheme is the highest of:

- the closing price of the shares of the Company on the Hong Kong Stock Exchange on the business day on which an offer is made to a participant;
- the average of the closing prices of the shares on the Hong Kong Stock Exchange for the five business days immediately preceding the date on which such offer is made; and

- the nominal value of the shares of the Company.

The total number of shares which may be issued upon exercise of all options granted under the Share Option Scheme must not, in aggregate, exceed 10% of the issued share capital of the Company at the date of approval of the Share Option Scheme. The 10% limit may be refreshed with the approval by ordinary resolution of our shareholders. The maximum number of shares which may be issued upon exercise of all outstanding options granted, and yet to be exercised, under the Share Option Scheme must not exceed 30% of our issued share capital.

The total number of shares issued and to be issued upon exercise of all options granted under the Share Option Scheme to each participant (including both exercised, cancelled and outstanding options) in any 12-month period shall not exceed 1% of the total number of issued shares of the Company. If shares issued and to be issued upon exercise of all options granted under the Share Option Scheme (including options exercised, cancelled and outstanding) to a participant who is a substantial shareholder or an independent non-executive director of the Company in any 12-month period, (i) represent in aggregate more than 0.1% of the total number of shares in issue and (ii) have an aggregate value, based on the closing price of the shares of the Company at the date of each grant, in excess of HK\$5,000,000, the proposed grant of option must be approved by our shareholders by poll in a general meeting.

The exercise period of any option granted under the Share Option Scheme shall not be longer than 10 years from the date of grant of the relevant option. Our board of directors has the authority to determine the minimum period for which an option must be held before it can vest.

As of the date hereof, no share options have been granted under the Share Option Scheme.

Principal shareholders

As of August 31, 2009, the interested persons, other than the directors or chief executive of the Company in the shares and the underlying shares of the Company representing 5% or more of the nominal value of shares comprised in the relevant share capital of the Company as recorded in the register kept by the Company under Section 336 of the SFO were as follows:

| Name of shareholder | Capacity | Number of ordinary shares | Percentage to issued share capital |
|---------------------------------|------------------|------------------------------|------------------------------------|
| Concrete Win Limited | Beneficial Owner | 9,760,945,999 ⁽¹⁾ | 59.33% |
| Automic Group Limited | Beneficial Owner | 972,000,000 ⁽²⁾ | 5.91% |

Notes:

- (1) These 9,760,945,999 shares are held by Concrete Win Limited, the entire issued share capital of which is beneficially owned by Ms. Yang Huiyan.
- (2) These 972,000,000 shares are held by Automic Group Limited, the entire issued share capital of which is beneficially owned by Mr. Yang Erzhu.

Save as disclosed, none of the directors knows of any person (not being a director or chief executive of the Company) who will have an interest or short position in the shares or underlying shares of the Company as representing 5% or more of the nominal value of Shares comprised in the relevant share capital of the Company.

Related party transactions

The following discussion describes certain material related party transactions in 2006, 2007, 2008 and the six months ended June 30, 2009 between our consolidated subsidiaries and our directors, executive officers and original shareholders and, in each case, the companies with which they are affiliated. In 2006, 2007 and 2008 and the six months ended June 30, 2009, the aggregate amount of our related party transactions (in accordance with HKFRS) was RMB695.0 million, RMB851.9 million, RMB745.1 million and RMB348.2 million, respectively. We discontinued some of these related party transactions after our IPO in April 2007.

The following table summarizes our related party transactions for the periods indicated.

| (RMB in thousands) | Year ended December 31, | | | Six months ended June 30, | |
|---|-------------------------|----------------|----------------|-------------------------------|----------------|
| | 2006 | 2007 | 2008 | (unaudited) 2008 2009 | |
| Construction and decoration service income | | | | | |
| Controlled by original shareholders ⁽¹⁾ | 404,540 | 585,385 | 335,109 | 204,204 | 255,545 |
| Purchase of design service | | | | | |
| Controlled by original shareholders | 70,928 | 74,755 | 180,955 | 107,209 | 51,863 |
| Purchase of construction material and water | | | | | |
| Controlled by original shareholders and their close family members | 67,909 | 165,327 | 208,058 | 110,929 | 31,038 |
| Key management compensation | | | | | |
| Salaries and other short-term employee benefits | 10,690 | 26,444 | 20,937 | 15,957 | 9,788 |
| Others⁽²⁾ | 140,956 | - | - | - | - |
| Total | 695,023 | 851,911 | 745,059 | 438,299 | 348,234 |

Note:

(1) Our "original shareholders" refer to Yang Huiyan, Yang Erzhu, Su Rubo, Zhang Yaoyuan and Ou Xueming.

(2) These related party transactions were mainly related to construction and decoration services, sales of properties, purchases of construction materials and loans, which have been discontinued after our IPO.

Substantially all of our related parties transactions after our IPO arose from trade activities. As of June 30, 2009, we had the following significant trading balances with our related parties:

| Balances due from related parties— | As of December 31, | | | As of |
|--|--------------------|----------------|----------------|------------------|
| | 2006 | 2007 | 2008 | June 30, 2009 |
| | (RMB in thousands) | | | (unaudited) |
| Included in trade receivables | - | - | - | 380,653 |
| Included in amounts due from customers for contract work | 92,623 | 19,319 | 292,624 | 149,993 |
| Included in other receivables | 638,797 | 275,250 | - | - |
| Total | 731,420 | 294,569 | 292,624 | 530,646 |
| Balances due to related parties— | | | | |
| Included in trade payables | 37,567 | 51,926 | 49,724 | 42,960 |
| Included in advanced proceeds from customers | - | - | - | - |
| Included in other payables | - | - | 23,100 | 23,100 |
| Total | 37,567 | 51,926 | 72,824 | 66,060 |

Construction and decoration services

A substantial amount of our related party transactions consist of construction and decoration services we provided to related parties. Pursuant to various contracts, we provide construction services through our subsidiaries, Giant Leap Construction Co., to Qingyuan Country Garden Co., a company controlled by our original shareholders. We sell such construction services to Qingyuan Country Garden Co. with reference to market prices and on terms no more favorable than those offered by independent third parties for comparable services. In 2006, 2007 and 2008 and the six months ended June 30, 2009, the aggregate services fees we received from Qingyuan Country Garden Co. amounted to RMB380.8 million, RMB555.1 million, RMB335.1 million and RMB255.5 million, respectively. We estimate that the maximum total fee for construction will not exceed RMB590.0 million for the year ending December 31, 2009.

We also provide construction and decoration services to Qingyuan Country Cultural Development Co., Ltd. and Guangdong Country Garden School. The total service fees we received from them in 2006, 2007 and 2008 and the six months ended June 30, 2009 were, respectively, RMB23.7 million, RMB30.3 million, nil and nil.

Purchase of design services

Our design work is mainly undertaken by Elite Architectural Co., which is controlled by one of our original shareholders. The design services are provided on terms (including but not limited to pricing) no less favorable than those offered by independent third parties for comparable services. For the same periods, the total purchase prices amounted to RMB70.9 million, RMB74.8 million, RMB181.0 million and RMB51.9 million, respectively. We estimate that the maximum total fees for design services provided by Elite Architectural Co. to us will not exceed RMB300.0 million for each of two years ending December 31, 2009 and 2010.

Purchase of cement products

We purchase cement products from Foshan Shunde Grand Cement Co., Ltd. ("Grand Cement Co."), a company controlled by our original shareholders, for the construction of most of our property development projects. The cement products are sold to us on terms (including but not limited to pricing) no less favorable than those offered by Grand Cement Co. to independent third parties. For each of the three years ended December 31, 2006, 2007 and 2008 and for the six months ended June 30, 2009, purchases of cement products from Grand Cement Co. amounted to RMB55.5 million, RMB152.2 million, RMB190.7 million and RMB23.8 million, respectively. We estimate that the maximum amount of annual purchases of cement products by us from Grand Cement Co. will not exceed RMB240.0 million for the year ending December 31, 2009.

Purchase of water

We purchase water pursuant to the following agreements:

- the water supply agreement dated March 27, 2007 between Shunde Country Garden Property Development Co., Ltd. ("Shunde CG") and Foshan Shunde Jiangkou Water Plant Co., Ltd. ("Jiangkou Water Plant Co.");
- the Jiangkou water supply supplemental agreement dated June 20, 2008 ("Jiangkou Water Supply Supplemental Agreement"); and
- the water agreement ("Crystal Water Supply Agreement") dated March 27, 2007 between Zengcheng Country Garden Property Development Co., Ltd. ("Zengcheng CG") and Zengcheng Crystal Water Plant Co., Ltd. ("Crystal Water Plant Co.").

Jiangkou Water Plant Co. and Crystal Water Plant Co. provide us with water for use in operations in Panyu and Shunde Districts and in Zengcheng District. The terms of Jiangkou Water Supply Supplemental Agreement is for three years commencing from January 1, 2008 and subject to the annual caps of not exceeding RMB6.0 million for each of 2008, 2009 and 2010 respectively. The terms of Crystal Water Supply Agreement is for three years commencing from January 1, 2007 and subject to the annual caps of not exceeding RMB17.0 million for each of 2007, 2008 and 2009 respectively. The water supply shall be at rates no less favorable than rates chargeable by other water plants operated by independent third parties in Panyu District, Shunde District and Zengcheng District. The water we paid to Jiangkou Water Plant Co. and Crystal Water Plant Co. were RMB3.5 million and RMB8.9 million respectively in 2007, and RMB5.3 million and RMB12.0 million respectively in 2008.

Other related party transactions

Other related transactions include the purchase of construction materials and water from our original shareholders and their controlled companies. Generally, the terms of such transactions (including but not limited to pricing or rates, as applicable) are no less favorable than those offered by independent third parties for comparable products and services. We estimate that the maximum total fee for other such ongoing transactions will not exceed an aggregate of approximately RMB20.0 million for each of three years ending December 31, 2009, 2010 and 2011.

Guarantee and pledge

For further information about our related party transactions, see Note 35 to the financial statements as of and for the years ended December 31, 2007 and 2008, and Note 22 to the financial information as of June 30, 2009 and for the six months ended June 30, 2008 and 2009.

Description of other material indebtedness

To fund our existing property projects and to finance our working capital requirements, we have borrowed money from various banks. As of June 30, 2009, our total borrowings (including the Convertible Bonds) totaled RMB14,974.8 million. We set forth below a summary of the material terms and conditions of these loans and other indebtedness.

Project loan agreements

Certain of our PRC subsidiaries have entered into loan agreements with various PRC banks, primarily Bank of China, Agricultural Bank of China, China Construction Bank, Industrial and Commercial Bank of China, China Minsheng Bank Corp. Ltd., Shunde Beijiao Agricultural Credit Union, Guangzhou Panyu Agricultural Credit Union, Guangdong Development Bank, Shenzhen Development Bank and Huishang Bank. These loans typically are project loans to finance the construction of our projects (the "project loans") and have terms ranging from one year to five years, which generally correspond to the construction periods of the particular projects.

Interest

The principal amounts outstanding under the project loans generally bear interest at floating rates calculated by reference to the relevant bank's benchmark interest rate per annum. Floating interest rates generally are subject to review by the banks annually. Interest payments generally are payable either monthly or quarterly and must be made on each payment date as provided in the particular loan agreement. As of June 30, 2009, the weighted average interest rate on the aggregate outstanding amount of our project loans was 5.46% per annum.

Covenants

Under these project loans, many of our subsidiary borrowers have agreed, among other things, not to take the following actions without first obtaining the lenders' prior consent:

- create encumbrances on any part of their properties or assets or deal with their assets in a way that may adversely affect their ability to repay their loans;
- grant guarantees to any third parties that may adversely affect their ability to repay their loans;
- make any major changes to their corporate structures, such as entering into joint ventures, mergers and acquisitions and reorganizations or change the company's status, such as liquidation and dissolution;
- alter the nature or scope of their business operations in any material respect;
- transfer part or all of the liabilities under the loans to a third party; and
- prepay the loan.

Dividend restriction

Pursuant to the project loans with Industrial and Commercial Bank, China Construction Bank, Bank of China and Agricultural Bank of China, some of our PRC subsidiaries also agreed not to distribute any dividends:

- if the borrower's after-tax net profit is nil or negative; or
- before the principal amount of and accrued interest on the relevant project loan have been fully paid.

Guarantee and security

Certain of our PRC subsidiaries and associates have entered into guarantee agreements with the PRC banks in connection with some of the project loans pursuant to which these subsidiaries and associates have guaranteed all liabilities of the subsidiary borrowers under these project loans.

Customer guarantees

In line with industry practice, we provide guarantees to mortgagee banks in respect of mortgage loans taken out by purchasers of our properties. Such guarantee obligations typically terminate upon the delivery of the relevant property ownership certificates on the underlying property to the bank. As of June 30, 2009, the aggregate outstanding amount guaranteed was RMB11,262.6 million.

Convertible Bonds

On February 22, 2008, we issued an aggregate principal amount of RMB3,595,000,000 U.S. dollar settled 2.5% convertible bonds due 2013. The aggregate principal amount of the Convertible Bonds was increased to RMB4,314,000,000 on March 3, 2008 as a result of over-subscription. The Convertible Bonds will mature on February 22, 2013. As of the date hereof, RMB4,314,000,000 of the Convertible Bonds are outstanding.

Conversion

The Convertible Bonds are, at the option of the holders, convertible on or after April 3, 2008 up to the close of business on February 15, 2013 into our fully paid ordinary shares with a par value of HK\$0.10 each at an initial conversion price of HK\$9.05 per share with a fixed exchange rate of RMB0.922 to HK\$1.00. The conversion price is subject to adjustment for, among other things, subdivision or consolidation of shares, bonus issues, rights issues, capital distributions and other dilutive events as described in the trust deed and the terms and conditions relating to the Convertible Bonds.

Optional redemption by holders

On February 22, 2011, the holder of each Convertible Bond will have the right, at such holder's option, to require us to redeem, in whole or in part, of the Convertible Bonds at an amount equal to the U.S. dollar equivalent of their RMB principal amount multiplied by 111.997%, together with any accrued but unpaid interest to the date of redemption.

Optional redemption by us

At any time after March 8, 2011 and prior to February 22, 2013, we may redeem, in whole but not in part, of the Convertible Bonds at a redemption price equal to the U.S. dollar equivalent of their early redemption amount (as determined based on a pre-set formula) on the redemption date, together with any accrued but unpaid interest to the date of redemption, if the closing price of our shares translated into Renminbi at the prevailing rate applicable to the relevant trading day for 20 out of 30 consecutive trading days, where the last day of such 30-day period falls within five trading days prior to the date upon which notice of such redemption is given, was at least 130% of the applicable early redemption amount divided by the conversion ratio. The conversion ratio equals to the RMB principal amount of each Convertible Bond translated into H.K. dollars at the fixed rate of RMB0.922 to HK\$1.00 divided by the applicable conversion price determined under the terms and conditions relating to the Convertible Bonds.

We may redeem all but not some only of the Convertible Bonds at a redemption price equal to the U.S. dollar equivalent of their early redemption amount on the redemption date, together with any accrued but unpaid interest to the date of redemption, if at any time at least 90% in principal amount of the Convertible Bonds has already been converted, redeemed or purchased and cancelled.

Term loans

CITIC Ka Wah Bank Limited facility

On June 10, 2008, we entered into a facility agreement with CITIC Ka Wah Bank Limited (“CKWB”). The loan facility is a dual-currency term loan facility with an aggregate principal amount up to US\$35.0 million (the “CKWB Loan”). The CKWB Loan has a drawdown period of six months (the “Available Period”). As of June 30, 2009, the outstanding amount of the CKWB Loan was approximately RMB235.4 million.

The loan facility is repayable in three installments after the Available Period as follows:

| Repayment Date (in months after the date of the CKWB Loan) | Percentage of Repayment Amount |
|---|---|
| 18 months | 15% |
| 30 months | 15% |
| 36 month | 70% |
| TOTAL: | 100% |

We may prepay, on the last day of an interest period applicable to it, all or any part of the CKWB Loan provided we give 30 days’ notice of such expected prepayment. We have received a consent letter from CKWB waiving this notice requirement.

Guarantee and security

All our subsidiaries incorporated outside of the PRC (other than Power Great Enterprises Limited) have guaranteed our payment and other obligations under the CKWB Loan. As continuing security, all the shares of the guarantors are mortgaged to secure our obligations under the CKWB Loan and the guarantees of the guarantors given to CKWB relating to the CKWB Loan.

The Bank of East Asia, Limited facility

On July 9, 2009, we signed a facility letter with The Bank of East Asia, Limited (“**BEA**”). The loan facility is a Hong Kong dollar denominated term loan facility with an aggregate principal amount of up to HK\$200.0 million (the “**BEA Loan**”). The BEA Loan has a one lump sum drawdown within seven business days from July 9, 2009. As of August 31, 2009, we had drawn down the entire principal amount available under this facility.

The BEA Loan has a final maturity date of July 14, 2010. We may not prepay within the first six months from July 9, 2009 but may prepay with accrued interest on the amount prepaid subject to five business days’ prior written notice of prepayment to BEA, specifying the amount to be prepaid and the date of such prepayment.

Interest

The BEA Loan bears interest at the rate of 3% per annum over HIBOR on the first day of each interest period for an interest period, which may be one, two or three months as selected by us. Any overdue amount under the BEA Loan will be subject to a penalty interest accruing from the due date up to the date of actual payment at a rate of 5% per annum over the applicable interest rates on the BEA Loan.

Covenants

Pursuant to the BEA Loan, we agreed to the following financial covenants:

- our consolidated tangible net worth will not be less than RMB17,000.0 million;
- our consolidated net borrowings will not exceed 75% of our consolidated tangible net worth; and
- we will maintain interest coverage ratio at not less than 3.0x.

We have further agreed, among other things that:

- Ms. Yang Huiyan will remain as our single largest direct or indirect shareholder;
- Mr. Yeung Kwok Keung will remain as our chairman; and
- we maintain our listing on the Hong Kong Stock Exchange.

Events of default

The BEA Loan contains certain customary events of default, including nonpayment of principal or interest, cross default, insolvency and breaches of the terms of the BEA Loan. If an event of default has occurred, BEA may, without prior notice to the Company demand immediate payment or repayment of all amounts outstanding including all interest accrued thereon.

Chinese Mercantile Bank loan

On August 14, 2009, we entered into a facility agreement with Chinese Mercantile Bank (“**CMB**”). The loan facility is a Hong Kong dollar denominated term loan facility with an aggregate principal amount of up to HK\$200.0 million (the “**CMB Loan**”). As of August 31, 2009, we had drawn down the entire principal amount available under this facility.

The CMB Loan will mature 18 months from the date of the first drawdown. We cannot prepay the CMB Loan without prior approval of CMB.

Interest

The CMB Loan bears interest at the rate of 2.5% per annum over HIBOR, which is renewed semi-annually and payable on a quarterly basis.

Guarantee and security

Our obligations under the CMB Loan is guaranteed by Zengcheng Country Garden Property Development Co., Ltd. ("Zengcheng Country Garden"), our wholly-owned subsidiary. Zengcheng Country Garden is required, under the guarantee agreement, to make a cash dividend of HK\$100 million or equivalent amount of foreign currency to be deposited into our bank account maintained with an offshore branch of CMB. CMB is allowed to apply such deposit as partial repayment of the CMB Loan.

Covenants

Pursuant to the CMB Loan, we agreed to the following financial covenants:

- the Company will not repay any of our shareholders loans before the principal amount of and accrued interest on the CMB loan has been fully paid;
- the Company will not sell, transfer or dispose of 10% or more of its assets without giving prior notice to CMB;
- CMB may, upon giving prior written notice, require us to repay, in part or in full, the principal amount of and accrued interest on the CMB Loan;
- the Company will maintain an aggregate amount of not less than RMB100.0 million in our CMB bank account at each month's end, which is subject to CMB's quarterly inspection; and
- dividend distributions from our related parties (including subsidiaries) shall be first applied to repay the CMB Loan on its scheduled repayment date.

Events of default

The CMB Loan contains certain customary events of default, including nonpayment of principal or interest, cross default, insolvency and breaches of the terms of the CMB Loan. If an event of default has occurred, CMB may, without prior notice to the Company, demand immediate payment and/or repayment of all amounts outstanding including all interest accrued thereon.
